Conolly, 2004-11-30 Post Colonial Literatures in English together with English Literature and American Literature form one of the three major groupings of literature in English and as such are widely studied around the world Their significance derives from the richness and variety of experience which they reflect In three volumes this Encyclopedia documents the history and development of this body of work and includes original research relating to the literatures of some 50 countries and territories In more than 1 600 entries written by more than 600 internationally recognized scholars it explores the effect of the colonial and post colonial experience on literatures in English worldwide Canada in the Soviet Mirror J.L. Black, 1998-04-15 This is an original thoroughly researched account of the image of Canada in Soviet writings political journalistic and academic over the entire course of Soviet history A study of the role of ideology in Soviet foreign affairs the book traces the influence of an adjusting Marxist Leninist lens on policy formulated by the Kremlin and also explicitly on a public discourse rigidly controlled by government This public image has been collated with private opinion documented in recently opened Russian archives Canada clearly served a larger purpose in Soviet foreign policy than was previously assumed Uniquely Canadian issues and participants helped shape Soviet policy sometimes in very strange ways Both story and reference text *Canada in the Soviet Mirror* will interest readers in Soviet and Canadian studies journalism and popular culture Great World Writers Patrick M. When the North Was Red Dennis Bartels,Alice Bartels,1995 Dennis Bartels and Alice Bartels trace the development of Soviet policy towards Aboriginal peoples from 1917 to 1989 Focusing on educational and social policies and practices When the North Was Red reveals the problems encountered by Native peoples in Siberia and provides insights into Aboriginal issues facing other nations

Bare Poles Harold Strub,1996-04-15 Designing successfully for people in the world's coldest climates demands a broad understanding of site conditions and their unique social context Until now such knowledge often lay unarticulated in the minds of a few experienced practitioners or in the disappearing traditions of aboriginal peoples

Agitating Images Craig Campbell,2014-09-01 Following the socialist revolution a colossal shift in everyday realities began in the 1920s and 30s in the former Russian empire Faced with the Siberian North a vast territory considered culturally and technologically backward by the revolutionary government the Soviets confidently undertook the project of reshaping the ordinary lives of the indigenous peoples in order to fold them into the Soviet state In Agitating Images Craig Campbell draws a rich and unsettling cultural portrait of the encounter between indigenous Siberians and Russian communists and reveals how photographs from this period complicate our understanding of this history Agitating Images provides a glimpse into the first moments of cultural engineering in remote areas of Soviet Siberia The territories were perceived by outsiders to be on the margins of civilization replete with shamanic rituals and inhabited by exiles criminals and primitive indigenous peoples The Soviets hoped to permanently transform the mythologized landscape by establishing socialist utopian developments designed to incorporate minority cultures into the communist state This book delves deep into photographic archives from these Soviet programs but rather than using the photographs to complement an official history Campbell presents them as anti illustrations or intrusions that confound simple narratives of Soviet bureaucracy and power Meant to agitate these images offer critiques that cannot be explained in text alone and in turn put into question the nature of photographs as historical artifacts An innovative approach to challenging historical interpretation Agitating Images demonstrates how photographs go against accepted premises of Soviet Siberia All photographs Campbell argues communicate in unique ways that present new and even contrary possibilities to the text they illustrate Ultimately Agitating Images dissects our very understanding of the production of historical knowledge
