King,2011-09-19 **Powerhouses of the Sierra Nevada** Steve Hubbard,2007 The historic powerhouses of the Sierras have been powering much of California's growth for the past hundred years or so Located in canyons where water can be dropped thousands of feet from ridges above they were California's first source of electrical power The oldest powerhouses were built by survivors of the original gold rush who turned metalworking and pipe fitting skills to the task of generating electricity The resulting machines were curious amalgamations of steam valves riveted pipes waterwheels and rudimentary electrical devices imported from the East Coast These views show how miners chipped out a small ledge on a granite cliff hundreds of feet below Spaulding Lake dam to create an anchor point for a powerhouse that seems embedded in the rock itself They also celebrate the genius of mining camp tinkerer Lester Pelton who in 1880 invented a more efficient waterwheel capable of spinning a generator shaft at high speed His invention bore his name and the basic design is used to this day throughout the world **Sierra-Nevada Lakes** George Henry Hinkle, Bliss McGlashan Hinkle,2020-03-05 Of the world's famous mountain ranges the Sierra Nevada is one of the most spectacular in the number and variety of its lakes From Lassen Peak in the north to Mount Whitney in the south the crest and Banks of the great barrier are flecked with the blue of thousands of them there are 429 in Yosemite Park alone and in a single area of 220 square miles at the southern end of Lake Tahoe there is a galaxy of more than a hundred These ice blue pools lie casually in the most unexpected places in bleak cirques well above timber line in river bottoms in densely timbered canyons and on the summits of boulder strewn passes They range in size from navigable bodies of 300 square miles to small glacial ponds of a few acres Almost every imaginable geologic origin is represented somewhere among them as well as some unimaginable freaks of contour As John Muir was probably the first to point out theirs is the charm of the unpredictable Around them centers much of the history of California and Nevada and until now no comprehensive effort has been made by anyone to narrate it Dr and Mrs Hinkle who are well nigh ideally equipped to delineate the fascinating history of the Sierra lakes and their near lying Great Basin neighbors Both are the descendants of long lines of pioneer forebears Both were born and grew up in Truckee the main gateway of the transcontinental route between Nevada and California Both are inheritors of a great love for the region and of a great mass of family and traditionary lore concerning it Both are trained in the employment of bibliographical and historical tools for the writing of history Finally as husband and wife they constitute a well geared smoothly functioning literary team each member of which reinforces and supplements the labors and perceptions of the other *Mountaineering in the Sierra Nevada* Clarence KING (of Rhode Island.),1872 Sierra Nevada Ecosystem Project Final Report to Congress: Assessment summaries and management strategies Sierra Nevada Ecosystem Project,1996
