Environmental Injustices, Political Struggles David Enrique Cuesta Camacho, 1998 In the United States few issues are more socially divisive than the location of hazardous waste facilities and other environmentally harmful enterprises Do the negative impacts of such polluters fall disproportionately on African Americans Hispanics Native Americans and Asian Americans Environmental Injustices Political Struggles discusses how political economic social and cultural factors contribute to local government officials consistent location of hazardous and toxic waste facilities in low income neighborhoods and how as a result low income groups suffer disproportionately from the regressive impacts of environmental policy David E Camacho's collection of essays examines the value laden choices behind the public policy that determines placement of commercial environmental hazards points to the underrepresentation of people of color in the policymaking process and discusses the lack of public advocates representing low income neighborhoods and communities This book combines empirical evidence and case studies from the failure to provide basic services to the colonias in El Paso

Diamond Steve Lerner, 2006-02-17 The story of how a mixed income minority community in Louisiana s Chemical Corridor fought Shell Oil and won For years the residents of Diamond Louisiana lived with an inescapable acrid metallic smell the toxic bouquet of pollution and a mysterious chemical fog that seeped into their houses They looked out on the massive Norco Industrial Complex a maze of pipelines stacks topped by flares burning off excess gas and huge oil tankers moving up the Mississippi They experienced headaches stinging eyes allergies asthma and other respiratory problems skin disorders and cancers that they were convinced were caused by their proximity to heavy industry Periodic industrial explosions damaged their houses and killed some of their neighbors Their small African American mixed income neighborhood was sandwiched between two giant Shell Oil plants in Louisiana s notorious Chemical Corridor When the residents of Diamond demanded that Shell relocate them their chances of success seemed slim a community with little political clout was taking on the second largest oil company in the world And yet after effective grassroots organizing unrelenting fence-line protests seemingly endless negotiations with Shell officials and intense media coverage the people of Diamond finally got what they wanted money from Shell to help them relocate out of harm s way In this book Steve Lerner tells their story Around the United States struggles for environmental justice such as the one in Diamond are the new front lines of both the civil rights and the environmental movements and Diamond is in many ways a classic environmental justice story a minority neighborhood faced with a polluting industry in its midst fights back But Diamond is also the history of a black community that goes back to the days of slavery In 1811 Diamond then the Trepagnier

Plantation was the center of the largest slave rebellion in United States history. Descendants of these slaves were among the participants in the modern day Diamond relocation campaign. Steve Lerner talks to the people of Diamond and lets them tell their story in their own words. He talks also to the residents of a nearby white neighborhood many of whom work for Shell and have fewer complaints about the plants and to environmental activists and Shell officials. His account of Diamond's 30 year ordeal puts a human face on the struggle for environmental justice in the United States.

Wicked Environmental Problems Peter J. Balint, Ronald E. Stewart, Anand Desai, Lawrence C. Walters, 2012-06-22. Wicked problems are large scale long term policy dilemmas in which multiple and compounding risks and uncertainties combine with sharply divergent public values to generate contentious political stalemates. Wicked problems in the environmental arena typically emerge from entrenched conflicts over natural resource management and over the prioritization of economic and conservation goals more generally. This new book examines past experience and future directions in the management of wicked environmental problems and describes new strategies for mitigating the conflicts inherent in these seemingly intractable situations. The book reviews the history of the concept of wicked problems, examines the principles and processes that managers have applied, explores the practical limitations of various approaches. Most important, the book reviews current thinking on the way forward, focusing on the implementation of learning networks in which public managers, technical experts and public stakeholders collaborate in decision making processes that are analytic, iterative and deliberative. Case studies of forest management in the Sierra Nevada, restoration of the Florida Everglades, carbon trading in the European Union and management of the Ngorongoro Conservation Area in Tanzania are used to explain concepts and demonstrate practical applications. *Wicked Environmental Problems* offers new approaches for managing environmental conflicts and shows how managers could apply these approaches within common real world statutory decision making frameworks. It is essential reading for anyone concerned with managing environmental problems.
