Children on the autistic spectrum experience varying degrees of difficulties all of which can be understood as a disassociation of mind and body Expressing feelings making eye contact keeping a steady heartbeat and recognizing faces are all part of the autism dilemma which can be explored through Shakespeare's plays because of the wealth of his poetic definitions of seeing thinking and loving Over ten years Hunter worked with children on all points of the spectrum developing drama games for the specific purpose of combating autism Shakespeare's Heartbeat is a step by step guide detailing how to demonstrate play and share these sensory games The book includes games based on A Midsummer Night's Dream and The Tempest tips and advice for playing one on one with the children This book provides an indispensable learning tool for those wishing to encourage children's eye contact and facial expression improve their spatial awareness and language skills and introduce them to imaginative play **Emotion of Love** Sanford Bell, 2015-11-09 The emotion of love between the sexes has as yet received Pg 325 no thorough scientific treatment No writer so far as I can find has treated it from a genetic standpoint The literature upon the subject is therefore meager In his recent treatise upon The Psychology of the Emotions Ribot 2 remarks The sex instinct the last in chronological order with man and the higher animals gives rise to the emotion of love with its numerous individual varieties Most psychologists have been very sparing of details where it is concerned and one might mention certain voluminous treatises which contain no mention of it Is this through exaggerated delicacy Or is it because the authors think that their place has been usurped by the novelists who have so obstinately confined themselves to the study of this passion But the novelist's mode of analysis is different from the psychological mode and does not exclude it This author then devotes one chapter of eleven pages to the treatment of the sexual instinct which includes Pg 326 what he has to say upon sex love Brief as this treatment is it is valuable both for the facts it presents and for the problems it suggests Havelock Ellis who has perhaps done more than any other investigator in the field of the normal Psychology of Sex says in his most recent work 3 It is a very remarkable fact that although for many years past serious attempts have been made to elucidate the psychology of sexual perversions little or no endeavor has been made to study the psychologic development of the normal sexual emotions Nearly every writer seems either to take for granted that he and his readers are so familiar with

all the facts of normal sex psychology that any detailed statement is altogether uncalled for or else he is content to write a few introductory phrases mostly made up from anatomic philosophic and historical work     Jolly games for happy homes Georgiana Charlotte Clark,1876     *Playthings in Early Modernity* Allison Levy,2017-02-22 An innovative volume of fifteen interdisciplinary essays at the nexus of material culture performance studies and game theory *Playthings in Early Modernity* emphasizes the rules of the game s as well as the breaking of those rules Thus the titular plaything is understood as both an object and a person and play in the early modern world is treated not merely as a pastime a leisurely pursuit but as a pivotal part of daily life a strategic psychosocial endeavor     Making Deep Games Doris C. Rusch,2017-01-12 Like movies television and other preceding forms of media video games are undergoing a dynamic shift in its content and perception While the medium can still be considered in its infancy the mark of true artistry and conceptual depth is detectable in the evolving styles various genres and game themes Doris C Rusch s *Making Deep Games* combines this insight along with the discussion of the expressive nature of games various case studies and hands on design exercises This book offers a perspective into how to make games that tackle the whole bandwidth of the human experience games that teach us something about ourselves enable thought provoking emotionally rich experiences and promote personal and social change Grounded in cognitive linguistics game studies and the reflective practice of game design *Making Deep Games* explores systematic approaches for how to approach complex abstract concepts inner processes and emotions through the specific means of the medium It aims to shed light on how to make the multifaceted aspects of the human condition tangible through gameplay experiences     A Diva's love Affair Krystina V,2012-04-11 A Diva s Love Affair Will have you believe in the power of love again     Centuries' Ends, Narrative Means Interdisciplinary Group for Historical Literary Study,1996 This pathbreaking work uses the approaching conclusion of the second millennium as a context for discussing questions concerning temporal division and narrative continuity It investigates assumptions about teleology and eschatology while exploring the ways in which temporal division affects the creation and production of cultural texts and reciprocally the ways in which narrative techniques forms and conventions shape explain and justify history Through this exploration the volume examines how temporal thresholds tend simultaneously to reinforce and to disrupt conceptual boundaries The sixteen essays use the significance typically invested in historical junctures marked by a centenary advance to investigate perceived paradigm shifts and the consequent reactions to these implicit and explicit transitions By doing so they also seek to illuminate the relations between narrative and history and to enhance understanding of our present historical moment     **Embodied Metaphors in Film, Television, and Video Games** Kathrin Fahlenbrach,2015-10-05 In cognitive research metaphors have been shown to help us imagine complex abstract or invisible ideas concepts or emotions Contributors to this book argue that metaphors occur not only in language but in audio visual media well This is all the more evident in entertainment media which strategically sell their products by addressing their viewers immediate reflexive understanding through pictures sounds and language This volume
