Powerfuels Nils Bullerdiek, Ulf Neuling, Martin Kaltschmitt, 2024-12-05

Powerfuels are the subject of intense and often contentious current discussions within industry research politics as well as the overall society. These discussions primarily revolve around the practical and technical feasibility of power to X processes and applications, their economic viability, the respective environmental benefits, the contribution to climate protection as well as the social acceptability. Thus, the primary aim of this book is to provide a comprehensive overview of various aspects, diverse considerations and different perspectives regarding the future role and utilization of power to X pathways on a global scale. This encompasses the challenge of sourcing necessary educts, feedstock options, their conversion into different products and product groups, exploring the possibilities of using these electricity based fuels, hydrocarbons in various markets and establishing suitable framework conditions for viable and sustainable markets in the years to come. These objectives are achieved through a collection of papers contributed by experts actively engaged in various fields related to power to X.

Handbook of Computer Networks and Cyber Security Brij B. Gupta, Gregorio Martinez Perez, Dharma P. Agrawal, Deepak Gupta, 2019-12-31. This handbook introduces the basic principles and fundamentals of cyber security towards establishing an understanding of how to protect computers from hackers and adversaries. The highly informative subject matter of this handbook includes various concepts, models and terminologies along with examples and illustrations to demonstrate substantial technical details of the field. It motivates the readers to exercise better protection and defense mechanisms to deal with attackers and mitigate the situation. This handbook also outlines some of the exciting areas of future research where the existing approaches can be implemented. Exponential increase in the use of computers as a means of storing and retrieving security intensive information requires placement of adequate security measures to safeguard the entire computing and communication scenario. With the advent of Internet and its underlying technologies, information security aspects are becoming a prime concern towards protecting the networks and the cyber ecosystem from variety of threats which is illustrated in this handbook. This handbook primarily targets professionals in security, privacy and trust to use and improve the reliability of businesses in a distributed manner as well as computer scientists and software developers who are seeking to carry out research and develop software in information and cyber security. Researchers and advanced level students in computer science will also benefit from this reference.

Newborn Screening for Sickle Cell Disease and other Haemoglobinopathies Stephan Lobitz, Jacques Elion, Raffaella Colombatti, Elena Cela, 2019-10-07. Newborn Screening for Sickle Cell Disease and other Haemoglobinopathies is a Special Issue of the International Journal of Neonatal Screening. Sickle cell disease is one of the most common inherited blood disorders with a huge impact on health care systems due to high morbidity and high mortality associated with the undiagnosed disease.
