An Engraved Landscape: Rock carvings in the Wadi al-Ajal, Libya Tertia Barnett,2023-02-23 An Engraved Landscape is a contextual analysis of a substantial new corpus of engravings from the Wadi al Ajal situated in the Central Saharan region of south west Libya The wadi is renowned as the heartland of the Garamantian civilization which emerged from local mobile Pastoral communities in the 1st millennium BC and dominated trans Saharan trade and politics for over a thousand years Extensive archaeological and palaeoenvironmental investigations in recent years have provided detailed insight into the later prehistory and protohistory of the wadi and surrounding areas However prior to the fieldwork detailed in this work only a handful of carvings had been recorded in the wadi This work is based on systematic survey conducted between 2004 and 2009 which recorded around 2 500 previously unknown or unpublished engraved and inscribed rock surfaces All forms of engraving whether figurative or surface markings were viewed as significant residues of human interaction with the rock surface and were recorded The resulting database provides an opportunity to analyze the

engravings in relation to their changing physical and cultural contexts and the discussion offers a fresh interpretation of Saharan rock art based on this substantial new evidence An Engraved Landscape also captures in detail a unique heritage resource that is currently inaccessible and threatened This record of the fragile engravings provides an important source of information for researchers and students

The Primeval Flood Catastrophe Y. S. Chen, 2013-12-12

Previous research on Mesopotamian Flood traditions tended to focus on a few textual sources How the traditions originated and developed as a whole has not been seriously investigated By systematically examining a large body of relevant cuneiform sources of diverse genres from the Early Dynastic III period ca 2600 2350 B C to the end of the first millennium B C this book observes that it is during the Old Babylonian period ca 2000 1600 and classical attestations of the Flood traditions are found On linguistic conceptual and literary historical grounds the book argues that the Flood traditions emerged relatively late in Sumerian traditions It traces different evolutionary stages of the Flood traditions from the emergence of the Flood motif within the socio political and cultural contexts of the early Isin dynasty ca 2017 1896 B C to the diverse mythological

representations of the motif in literary traditions to the historicisation of the motif in chronography and finally to the interactions between various strands of the Flood traditions and other Mesopotamian literary traditions such as Sumerian and Babylonian compositions about Gilgames. By uncovering the processes through which the Flood traditions were constructed the book offers a valuable case study on the complex and dynamic relationship between myth making the development of literature the rise of historical consciousness and historiography and socio political circumstances in the ancient world. The origins and development of the Flood traditions examined in the book furthermore represent one of the best documented examples illustrating the continuities and changes in Mesopotamian intellectual linguistic literary socio political and religious history over the course of two and a half millennia. The Great Dedicatory Inscription of Ramesses II Anthony John Spalinger, 2009. Studying Ramesses II's Dedicatory Inscription in detail allows one to connect it with the development of the Solar Osirian theology postdating the Amarna Period of Egypt. This study thus links the historical background of the pharaoh's visit to Abydos at the very beginning of his first regnal year with the religious aspects of early Dynasty XIX. **Reliquiæ Hearnianæ: the remains of Thomas Hearne, extracts from his MS. diaries, collected with a few notes by P.
