Lower Paleolithic Site At Hoxne England:

The Lower Paleolithic Site at Hoxne, England Ronald Singer, Bruce G. Gladfelter, John Wymer, 1993 At the edge of the small Suffolk village of Hoxne lies what is arguably the single most important Middle Pleistocene archaeological site in Europe Here the deposits contain not only prehistoric artifacts but also extraordinary records of fossil flora and fauna making Hoxne one of the few paleolithic sites where early hominid materials can be found with other types of information in their primary contexts Much controversy has surrounded the interpretation of these prehistoric materials and their stratigraphic position since John Frere published the first account of the site in 1797 Seeking to resolve some of the disputes a team from the University of Chicago began in 1971 the most extensive series of excavations yet undertaken This profusely illustrated volume presents the results of the team's five summers of excavations which ended in 1978 and includes contributions by twelve specialists who represent many branches of Quaternary science Although some uncertainty remains on various minor questions this will stand for many years to come as the definitive study of Hoxne's archaeological and geochronological significance Ronald Singer is the Robert R Bensley Professor in the Departments of Anatomy and Anthropology at the University of Chicago Bruce G Gladfelter is associate professor in the Department of Geography at the University of Illinois at Chicago John Wymer a self employed archaeologist has been a field officer with the Norfolk Archaeological Unit and the Essex Archaeological Unit

A Prehistory of the North John F. Hoffecker, 2005 Annotation Early humans did not drift north from Africa as their ability to cope with cooler climates evolved Settlement of Europe and northern Asia occurred in relatively rapid bursts of expansion This study tells the complex story spanning almost two million years of how humans inhabited some of the coldest places on earth

The Archaeology of V. Gordon Childe Vere Gordon Childe, 1994-07 Although V Gordon Childe died 36 years ago he remains the world's most renowned prehistorian His *What Happened in History* first published in 1942 is probably the most widely read book ever written by an archaeologist His influence and reputation endure despite the fact that many of the theoretical ideas he propounded as well as his interpretations of European and West Asian prehistory have been profoundly modified or even rejected since his death With contributions from such distinguished prehistorians as Kent V Flannery David Harris Leo S Klejn John Mulvaney Colin Renfrew Michael Rowlands and Bruce Trigger *The Archaeology of V Gordon Childe* is an attempt to evaluate Childe's achievement from different partly national perspectives and to assess how far and why his work remains significant today The contributors examine such persistent themes in Childe's thought as the nature of culture and the role of diffusion in cultural evolution and debate the question of whether Childe anticipated processual archaeology in his famous models of the Neolithic and Urban Revolutions Also included are evaluations of Childe's early career in Australia his relations with Soviet archaeology including a previously unknown letter from Childe to Soviet archaeologists and his impact on American archaeology

excavations at Combe Capelle Bas a Middle Paleolithic site in southern France The site is situated directly on a source of good quality flint and recent theories suggest that such a setting may have certain predictable effects on the lithic industries These effects and others relating to current models of raw material procurement and use are discussed This book will appeal to anyone interested in Paleolithic archaeology lithic analysis raw material use and site formation and taphonomy University Museum Monograph 91

The British Palaeolithic Paul Pettitt, Mark White, 2012 The British Palaeolithic provides the first academic synthesis of the entire British Palaeolithic from the earliest occupation to the end of the Ice Age It fills a major gap in teaching resources as well in research by providing a current synthesis of the latest research on the period

A Global History of The Earlier Palaeolithic Mark J. White, 2022-10-10 This book tells the story of both the ancient humans who made handaxes and the thoughts and ideas of scholars who have spent their lives trying to understand them Beginning with the earliest known finds this volume provides a linear and thematic account of the history of the Old Stone Age or Palaeolithic period covering major discoveries interpretations and debates worldwide a story that takes us from the embers of the Great Fire of London to the beginning of the Covid 19 pandemic It offers a comprehensive and unique history of archaeological theory and interpretation seeking to explain how we know what we know about the deep past and how ideas about it have changed over time reflecting both scientific and societal change At its heart lies the quest for an answer to a most curious and sometimes beautiful tool ever made the handaxe While focused on the Earlier Palaeolithic period the book provides a readable account of how ideas about the prehistoric past generally were formed and altered showing how the wider discipline came to be dominated by a succession of different theoretical paradigms each seeking different answers from the same data set Serving a dual purpose as a historical narrative and as a reference source this book will be of interest to all students and researchers interested in deep human prehistory and evolution archaeological theory and the history of archaeology

The Lower to Middle Palaeolithic Transition in Northwestern Europe Ann Van Baelen, 2017-10-17 A well preserved early Middle Palaeolithic site set against a wider northwestern European context The shift from Lower to Middle Palaeolithic in northwestern Europe dated to around 300 000 250 000 years ago remains poorly understood and underexplored compared to more recent archaeological transitions During this period stone tool technologies underwent significant changes but the limited number of known sites and the general low spatio temporal resolution of the archaeological record in many cases has impeded detailed behavioural inferences Brickyard quarrying activities at Kesselt Op de Schans Limburg Belgium led to the discovery and excavation of a well preserved early Middle Palaeolithic level buried beneath a 10 m thick loess palaeosol sequence The present volume offers a comprehensive report on the site dated to around 280 000 years ago set against a wider northwestern European context An in depth study of the lithic assemblage including an extensive refitting analysis provides detailed information on the technological behaviour of prehistoric hominins in the Meuse basin during this crucial time period Contributors Jozef J Hus Royal Meteorological Institute of Belgium Frank Lehmkuhl
