Gregory,2017-03-27 Richard Gregory was one of the major scientific thinkers of our time Originally published in 1986 here he presents essays on the rich subject of perception How we experience colours shapes sounds touches tickles tastes and smells is a mysterious and rich inquiry Wonderful as these sensations are though he argues that perception becomes really interesting when we consider how objects are identified and located in space and time as things we interact with using our intelligence to understand them Gregory s essays convey the crucial importance of the major scientists and their achievements in the study of perception but they also show us how much we can learn from our surroundings our language our times our successes and our failures Why are we so often fooled in scientific as well as everyday life *The Infinite*

Playground Bernard De Koven,2022-06-21 This final work from a visionary game designer reveals how a surprising range of play based experiences can unlock our imagination and help us capture the power of fun and delight Bernard De Koven 1941 2018 was a pioneering designer of games and theorist of fun He studied games long before the field of game studies existed For De Koven games could not be reduced to artifacts and rules they were also about experiencing fun His final book *The Infinite Playground* is about the power of the imagination the imagination as a playground a possibility space and a gateway to wonder De Koven guides the readers through a series of observations and techniques interspersed with games He begins with the fundamentals of play and proceeds through the private imagination the shared imagination and imagining the world observing the things we imagine can become the world Along the way he reminisces about playing ping pong with basketball great Bill Russell begins the instructions for a game called Reception Line with Mill around and introduces blathering games Blather Group Blather Singing Blather and The Blather Chorale that allow the player s consciousness to meander freely The

Infinite Playground extends a play centered invitation to experience the power and delight unlocked by imagination offering a curriculum for playful learning

Secrets of Screen Acting Patrick Tucker, 2014-11-13 When it was first published in 1993 *Secrets of Screen Acting* broke new ground in explaining how acting for the camera is different from acting on stage Reaction time is altered physical timing and placement are reconceived and the proportions of the digital frame itself become the measure of all things so the director must conceptualize each image in terms of this new rectangle and actors must fit into the frame Based on a revolutionary non Method approach to acting this book shows what actually works how an actor an announcer anyone working in front of the cameras gives excellent performances on screen Instead of starting with what is real and trying to wrestle that onto the screen Patrick Tucker explains how to work with the realities of a shoot and work from there towards the real His step by step guide to the elements of effective screen acting is an extension and explanation of a lifetime of work in the field containing over 50 acting exercises and the tried and tested Screen Acting Checklist As well as being completely updated to cover new techniques film references and insights this third edition now includes a set of Film Clip Time Codes for each film These not only itemise the films discussed in each chapter but also pinpoint the precise moments where each example can be found so that students teachers and professional actors can refer to them quickly and easily

The ^AAI Mirror Shannon Vallor,2024-05-06 For many AI technology inspires hope for the future the promise of shared human flourishing and collective liberation from drudgery that defines the good life but always seems to elude our species Yet today s AI technology is forged from human generated data into immensely powerful but flawed mirrors that endlessly reflect the same errors biases and failures of wisdom we are striving to escape To open new futures for ourselves with these tools is as misguided as gazing into a mirror while trying to climb an uncharted mountain At this crucial juncture for humanity and our planet we need something new from AI and more importantly from ourselves We need to find new hope not to surrender our greatest moral and intellectual ambitions to machines that have none but to renew those ambitions collectively for ourselves Shannon Vallor makes a wide ranging prophetic and philosophical case for what AI could be and what we can be with it She calls us to reclaim our human potential for moral and intellectual growth rather than losing sight of our shared humanity as we gaze dully into our AI mirrors **In Your Face** David Perrett,2017-09-16 In our daily lives in our memories and fantasies our mental worlds overflow with faces But what do we really know about this most remarkable feature of the human body Why do we have faces at all and brains that are good at reading them What do our looks say and not say about our personalities And perhaps the most compelling question of all Why are we attracted to some faces more than others In Your Face is an engaging and authoritative tour of the science of facial beauty and face perception David Perrett the pre eminent scholar in the field reveals and interprets the most remarkable findings and in the process demolishes many popular myths setting the record straight on what neuroscience and evolutionary psychology are teaching us about beauty The record is more surprising and often more unsettling than you might think [Encyclopaedia Britannica](#),1810
