Makers Of China Confucius To Mao:

Makers of China, Confucius to Mao Bernard Martin, Chien-Tung Shui, Jianliu Sang, 1972 *Authority and Welfare in China* M. Twohey, 1998-12-07 This book describes the relationship between political authoritarianism and people's welfare in modern China Based on a study of Chinese political discourse from the 1898 reform period to the present the book demonstrates that support for authoritarian rule in modern China is best understood when compared to ancient political traditions of authority and welfare that were established in China's late Zhou dynasty by the Confucian philosopher Xunzi 298-238 BC

Ling, 1975 *A History of the Chinese Secret Service* Richard Deacon, 1974 **The End of the Maoist Era: Chinese Politics During the Twilight of the Cultural Revolution, 1972-1976** Frederick C Teiwes, Warren Sun, 2014-12-18 This book launches an ambitious reexamination of the elite politics behind one of the most remarkable transformations in the late twentieth century As the first part of a new interpretation of the evolution of Chinese politics during the years 1972-82 it provides a detailed study of the end of the Maoist era demonstrating Mao's continuing dominance even as his ability to control events ebbed away The tensions within the gang of four the different treatment of Zhou Enlai and Deng Xiaoping and the largely unexamined role of younger radicals are analyzed to reveal a view of the dynamic of elite politics that is at odds with accepted scholarship The authors draw upon newly available documentary sources and extensive interviews with Chinese participants and historians to develop their challenging interpretation of one of the most poorly understood periods in the history of the People's Republic of China

The State, Identity, and the National Question in China and Japan Germaine A. Hoston, 2021-02-09. The first decades of the twentieth century witnessed an explosion of nationalist sentiment in East Asia as in Europe. This comprehensive work explores how radical Chinese and Japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity, social revolution, and the role of the national state in achieving socio-economic development. Focusing on the adaptation of anarchism and then Marxism-Leninism to non-European contexts, Germaine Hoston shows how Chinese and Japanese theorists attempted to reconcile a relatively new appreciation for the nation-state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism. Given the influence of Western experience on Marxism, Chinese and Japanese theorists found the Marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative value of Eastern and Western cultures. Marxism argues Hoston thus placed native Marxists in tension with their own heritage and national identity. The author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the tension persists as Chinese and Japanese dissidents seek identity-affirming modernity in accordance with the Western democratic model. China's English Bob Adamson, 2004-04-01. This book traces the history of English

education in the People's Republic of China from 1949 to the present day. It uses the junior secondary school curriculum as the means to examine how English curriculum developers and textbook writers have confronted the shifting ambiguities and dilemmas over five distinct historical periods. The study of the processes of curriculum development and the products such as syllabi and textbooks offers insights into the construction of an official English as well as what was considered as acceptable content in English. This book addresses fundamental and significant questions concerning the English promoted in China: namely its characteristics, its changes over time and explanations for such changes and the kind of content that has been viewed as appropriate for textbooks. To investigate these issues, the analysis draws on qualitative and quantitative data such as interviews with principal stakeholders and analysis of the syllabus and recommended textbooks. Specifically, it looks at the choice and organization of linguistic components and the orientation and messages of the curriculum. Language education in China during the second half of the twentieth century might arguably be called the world's largest language engineering project. In this comprehensive study, Dr Adamson examines a part of that project by charting the twists and turns of English language education from the pre-revolutionary period to the present. He successfully illustrates how tensions in China's massive educational system are negotiated from center to periphery, how textbook writers adapt to the socio-political mandates of their time to construct formal school curricula. Adamson also raises significant questions regarding the contradictions inherent in Chinese globalization.

Heidi Ross, Professor, Department of Educational Leadership and Policy Studies, School of Education, Indiana University at Bloomington.

Bob Adamson has provided in this book one of the first detailed studies published in English of the history of a school subject in the PRC. The study provides fascinating insights into the changing nature of the English curriculum, the shifting socio-political context of the PRC and their complex inter-relationships.

Paul Morris, President, The Hong Kong Institute of Education. The learning of English is a crucial aspect of China's opening up to the world and increasingly prominent global role. This welcome volume provides an in-depth historical perspective on this important subject, including the recent periods of modernization (1978-1993) and globalization (1993 to the present). It should be compelling reading for all those involved with contemporary China across a wide spectrum of areas.

Ruth Hayhoe, University of Toronto; President Emerita, The Hong Kong Institute of Education.
