Making Alternative Histories:

The Fiction Writer's Guide to Alternate History Jack Dann, 2023-07-13 A comprehensive guide to the speculative sub genre of alternate history fiction this book maps the unique terrain of this vibrant mode of storytelling and then explains how to write it First giving a concise conceptual overview and the critical tools to differentiate the different forms of counterfactual fiction Jack Dann lays out the tricks of the trade such as Heinleinizing how to create recognizable divergent points and how to employ paratextual elements and layering to overcome readers unfamiliarity with invented counterfactual events and cultures Alongside this Dann takes you step by step through a complete short story to demonstrate line by line how alternative history fiction works As well as Dann's exacting methodology for writing professional quality alternate history stories this book also features a live on the page Q A with some of the most esteemed alternate history writers working today including Kim Stanley Robinson John Birmingham and Lisa Goldstein among many others who will detail their own particular hacks theories processes methods and strategies Combining extensive and deep knowledge of the field with accessible writing advice this is the ultimate guidebook to the broad and complex sub genre of counterfactual and alternative history fiction

Alternate History Kathleen Singles, 2013-10-14 While strictly speaking Alternate Histories are not Future Narratives their analysis can shed a clear light on why Future Narratives are so different from past narratives Trying to have it both ways most Alternate Histories subscribe to a conflicting set of beliefs concerning determinism and freedom of choice contingency and necessity For the very first time Alternate Histories are here discussed against the backdrop of their Other Future Narratives The volume contains in depth analyses of the classics of the genre such as Philip K Dick's *The Man in the High Castle* and Philip Roth's *The Plot against America* as well as less widely discussed manifestations of the genre such as Dieter Kehn's *N* Christian Kracht's *Ich werde hier sein im Sonnenschein und im Schatten* and Quentin Tarantino's film *Inglourious Basterds*

Making Ecuadorian Histories O. Hugo Benavides, 2010-01-01 In Ecuador as in all countries archaeology and history play fundamental roles in defining national identity Connecting with the prehistoric and historic pasts gives the modern state legitimacy and power But the state is not the only actor that lays claim to the country's archaeological patrimony nor is its official history the only version of the story Indigenous peoples are increasingly drawing on the past to claim their rights and standing in the modern Ecuadorian state while the press tries to present a neutral version of history that will satisfy its various publics This pathfinding book investigates how archaeological knowledge is used for both maintaining and contesting nation building and state hegemony in Ecuador Specifically Hugo Benavides analyzes how the pre Hispanic site of Cochasqui has become a source of competing narratives of Native American Spanish and Ecuadorian occupations which serve the differing needs of the nation state and different national populations at large He also analyzes the Indian movement itself and the recent controversy over the final resting place for the traditional monolith of San Birtute Offering a more nuanced view of the production of history than previous studies Benavides demonstrates how both

official and resistance narratives are constantly reproduced and embodied within the nation state's dominant discourses

Alternate Histories Evelyn Saxon, AI, 2025-05-05 *Alternate Histories* explores the compelling genre of alternate history dissecting how authors build believable what if scenarios The book examines the intricate relationship between historical accuracy imaginative world building and character development within these fictional realms Intriguingly even subtle changes to established timelines can ripple outwards creating vastly different social political and technological landscapes One key insight is that the most compelling narratives are not mere fantasy but carefully constructed explorations of consequence The book analyzes how authors use meticulous research to ground speculative narratives in historical plausibility and create believable character arcs within altered realities It also addresses ethical considerations in reimagining historical events Progressing from theoretical frameworks to literary analysis *Alternate Histories* examines the cultural impact of these narratives revealing how they inspire critical thinking challenge conventional history and influence contemporary discourse It offers a unique lens through which to examine the nature of causality the fragility of historical outcomes and the enduring impact of human choices

The Alternate History Karen Hellekson, 2001 What would the world be like if history had taken a different course Science fiction literature has long contemplated this question and this text analyzes alternate history science fiction through a variety of historical models It raises questions of narrative writers temporality and time

Historical Archaeology in Africa Peter Ridgway Schmidt, 2006 *Historical Archaeology in Africa* is an inquiry into historical questions that count proposing different ways of thinking about historical archaeology Peter Schmidt challenges readers to expand their horizons Confronting topics of oral traditions the role of cultural landscapes in social memory and historical misrepresentations of various cultures Schmidt calls for a new pathway to an enriched more nuanced and more inclusive historical archaeology Allowing Africa to speak for itself without colonial interpreters *Historical Archaeology in Africa* will be of interest not only to historians and archaeologists but to all concerned with Africa's past and present

FASHODA - ALTERNATE HISTORY TALES, *Relativism, Alternate History, and the Forgetful Reader* Derek Thiess, 2014-11-25 The writer of alternate history asks what if What if one historical event were different what would the world look like today In a similar way the postmodern philosopher of history suggests that history is literature or that if we read certain historical details differently we would get a distinctly different interpretation of past events While the science fiction alternate history means to illuminate the past to increase our understanding of past events however the postmodern approach to history typically suggests that such understanding is impossible To the postmodern philosopher history is like literature in that it does not offer the reader access to the past but only an interesting story Building on criticism that suggests personal psychological reasons for this obscuring the past and using a literary theory of readership this book challenges the postmodern approach to history It channels the speculative power of science fiction to read the works of postmodern philosophy of history as alternate histories themselves and to map the limits and pathology of their forgetful

reading of the past History in Black Yaacov Shavit,2001 The effort to trace the origins of human culture to Africa rather than to Greece as dominant European thought has long contended says Shavit history of the Jewish people Tel Aviv U is part of obsession with initial sources a reaction to white western supremacy that glosses over the vast web of transmission and borrowing that comprises the history of culture Like European origin myths he agrees that it has value for the self awareness of African Americans and their status in society Distributed in the US by ISBS Annotation copyrighted by Book News Inc Portland OR Turning Points—Actual and Alternate Histories Rodney P. Carlisle,J. Geoffrey Golson,2007-09-26 This fascinating work is a series of explorations of key events in the administrations of Ronald Reagan and George H W Bush each of which speculates on what might have happened if events had unfolded differently The Reagan Era explores a time that saw the rise of the political conservatism that has dominated U S politics in recent years as well as the end of the Cold War which drove American foreign policy for nearly a half century What if Jimmy Carter had successfully navigated the energy shortage and the Iranian hostage crisis What if the assassination attempt on Reagan had succeed What if Iran Contra had not become a scandal These are among the specific topics examined in the book which looks at 11 crucial events and speculates on the effects of alternative outcomes By showing how easily the world might be different The Reagan Era reveals the lasting impact of that era s defining moments **Connecting Values to Action** Christopher M. Hartt,2019-08-26 Why do we make the decisions we do And how can we understand what influences our decisions Editor Christopher M Hartt and contributors explore Non Corporeal Actant Theory which analyzes our decisions and outcomes through the perspective of values beliefs ideas and concepts **The Ancient World in Alternative History and Counterfactual Fictions** Alberto J. Quiroga Puertas,Leire Olabarria,2024-08-22 Focusing in turn on history powerful individuals under represented voices and the arts the essays in this collection cover a wide variety of modern and contemporary narrative fiction from Jo Walton and L Sprague De Camp to T S Chaudhry and Catherynne M Valente Chapters look into the question of chance versus determinism in the unfolding of historical events the role individuals play in shaping a society or occasion and the way art and literature symbolise important messages in counterfactual histories They also show how uchronic narratives can take advantage of modern literary techniques to reveal new and relevant aspects of the past giving voices to marginalised minorities and suppressed individuals of the ancient world Counterfactual fiction and uchronic narratives have been largely up until now the domain of literary critics However these modes of literature are here analysed by scholars of Ancient History Egyptology and Classics shedding important new light on how cultures of the ancient world have been and still are perceived and to what extent our conceptions of the past are used to explore alternate presents and futures Alternate history entices the imagination of the public by suggesting hypothetical scenarios that never occurred underlining a latent tension between reality and imagination and between determinism and contingency This interest has resulted in a growing number of publications that gauge the impact of what if narratives and this one is the first to give scholars of the ancient world centre

stage **The Routledge Companion to Global Indigenous History** Ann McGrath, Lynette Russell, 2021-09-30 The Routledge Companion to Global Indigenous History presents exciting new innovations in the dynamic field of Indigenous global history while also outlining ethical political and practical research Indigenous histories are not merely concerned with the past but have resonances for the politics of the present and future ranging across vast geographical distances and deep time periods The volume starts with an introduction that explores definitions of Indigenous peoples followed by six thematic sections which each have a global spread European uses of history and the positioning of Indigenous people as history s outsiders their migrations and mobilities colonial encounters removals and diasporas memory identities and narratives deep histories and pathways towards future Indigenous histories that challenge the nature of the history discipline itself This book illustrates the important role of Indigenous history and Indigenous knowledges for contemporary concerns including climate change spirituality and religious movements gender negotiations modernity and mobility and the meaning of nation and the global Reflecting the state of the art in Indigenous global history the contributors suggest exciting new directions in the field examine its many research challenges and show its resonances for a global politics of the present and future This book is invaluable reading for students in both undergraduate and postgraduate Indigenous history courses **Historical**

Archaeologies of Capitalism Mark P. Leone, Parker B. Potter Jr., 2012-12-06 American things American material culture and American archaeology are the themes of this book The authors use goods used or made in America to illuminate issues such as tenancy racism sexism and regional bias Contributors utilize data about everyday objects from tin cans and bottles to namebrand items from fish bones to machinery to analyze the way American capitalism works Their cogent analyses take us literally from broken dishes to the international economy Especially notable chapters examine how an archaeologist formulates questions about exploitation under capitalism and how the study of artifacts reveals African American middle class culture and its response to racism Cultural Heritage and Human Rights Helaine Silverman, D. Fairchild

Ruggles, 2008-10-14 Is there a universal right to the free expression and preservation of cultural heritage and if so where is that right articulated and how can it be protected No corner of today s world has escaped the effects of globalization for better or worse This volume addresses a deeply political aspect of heritage preservation and management as it relates to human rights **History Is in the Land** T. J. Ferguson, Chip Colwell, 2015-09-01 Arizona s San Pedro Valley is a natural

corridor through which generations of native peoples have traveled for more than 12 000 years and today many tribes consider it to be part of their ancestral homeland This book explores the multiple cultural meanings historical interpretations and cosmological values of this extraordinary region by combining archaeological and historical sources with the ethnographic perspectives of four contemporary tribes Tohono O odham Hopi Zuni and San Carlos Apache Previous research in the San Pedro Valley has focused on scientific archaeology and documentary history with a conspicuous absence of indigenous voices yet Native Americans maintain oral traditions that provide an anthropological context for interpreting the

history and archaeology of the valley The San Pedro Ethnohistory Project was designed to redress this situation by visiting archaeological sites studying museum collections and interviewing tribal members to collect traditional histories The information it gathered is arrayed in this book along with archaeological and documentary data to interpret the histories of Native American occupation of the San Pedro Valley This work provides an example of the kind of interdisciplinary and politically conscious work made possible when Native Americans and archaeologists collaborate to study the past As a methodological case study it clearly articulates how scholars can work with Native American stakeholders to move beyond confrontations over who owns the past yielding a more nuanced multilayered and relevant archaeology

Weird Westerns Kerry Fine, Michael K. Johnson, Rebecca M. Lush, Sara L. Spurgeon, 2020-08 2021 Top Ten Finalist for the Locus Awards in Nonfiction Joshua Smith's chapter Uncle Tom's Cabin Showdown won the 2021 Don D Walker Prize from the Western Literature Association *Weird Westerns* is an exploration of the hybrid western genre an increasingly popular and visible form that mixes western themes iconography settings and conventions with elements drawn from other genres such as science fiction horror and fantasy Despite frequent declarations of the western's death the genre is now defined in part by its zombie like ability to survive in American popular culture in weird reanimated and reassembled forms The essays in *Weird Westerns* analyze a wide range of texts including those by Native American authors Stephen Graham Jones Blackfeet and William Sanders Cherokee the cult television series *Firefly* and *The Walking Dead* the mainstream feature films *Suicide Squad* and *Django Unchained* the avant garde and bizarre fiction of Joe R Lansdale the tabletop roleplaying game *Deadlands* The *Weird West* and the comic book series *Wynonna Earp* The essays explore how these weird westerns challenge conventional representations by destabilizing or subverting the centrality of the heterosexual white male hero but also often surprisingly reinforce existing paradigms in their inability to imagine an existence outside of colonial frameworks

The Death of Prehistory Peter R. Schmidt, Stephen A. Mrozowski, 2013-11-28 Since the eighteenth century the concept of prehistory was exported by colonialism to far parts of the globe and applied to populations lacking written records Prehistory in these settings came to represent primitive people still living in a state without civilization and its foremost index literacy Yet many societies outside the Western world had developed complex methods of history making and documentation including epic poetry and the use of physical and mental mnemonic devices Even so the deeply engrained concept of prehistory deeply entrenched in European minds up to the beginning of the twenty first century continues to deny history and historical identity to peoples throughout the world The fourteen essays by notable archaeologists of the Americas Africa Europe and Asia provide authoritative examples of how the concept of prehistory has diminished histories of other cultures outside the West and how archaeologists can reclaim more inclusive histories set within the idiom of deep histories accepting ancient pre literate histories as an integral part of the flow of human history

History After the Three Worlds Arif Dirlik, Vinay Bahl, Peter Gran, 2000 History as a discipline faces a crisis of identity as Eurocentrism fades in a world where globalized

visions compete to explain historical processes Facing the challenge squarely this volume_ comprising specialists on Asia Africa and Latin America_ explores the state of historical analysis in various world regions and appraises current views on what defines and challenges historical knowledge It is widely accepted that Eurocentrism no longer seem acceptable in a world where others are reasserting their own notions of past and future The postDWorld War II spatialities that guided both historical analysis and the division of labor in historical work are in the process of disappearing into more globalized visions Constituencies left out of history in the past are making demands for the recognition of their historical presence History as epistemology is under attack as a marker of Eurocentric modernity from non historical ways of thinking as well as from ideologies of postmodernism that deny to history its claims to truth Indeed the current situation in the field has been described by one distinguished historian as a Ocacophonous confusion O The challenge historians face is how to imagine new ways of writing history that overcome this confusion without falling back upon ideological and methodological prejudices that reproduce the problems of the past in new guises The contributors discuss how these challenges are voiced and met in their different areas of specialization Unsurprising in a volume that addresses a variety of regions and issues that are not only technically historiographical but also deeply cultural and political the authors differ in their appraisal of the challenges presented by globalization postmodernism or postcolonialism Yet they are united in their recognition of the validity of historical ways of knowing and their reaffirmation of the importance of history in grasping contemporary cultural and political problems It is because history is entangled in a Eurocentric modernity that in a postmodern world it provides the medium for articulating alternatives to Eurocentrism_ and to history itself *Controlling the Past, Owning the Future* Ran Boytner, Lynn Swartz Dodd, Bradley J. Parker, 2010-12-15 What are the political uses and misuses of archaeology in the Middle East In answering this question the contributors to this volume lend their regional expertise to a variety of case studies including the Taliban s destruction of Buddhas in Afghanistan the commercialization of archaeology in Israel the training of Egyptian archaeology inspectors and the debate over Turkish identity sparked by the film Troy among other provocative subjects Other chapters question the ethical justifications of archaeology in places that have alternative engagements with the material past In the process they form various views of the role of the archaeologist from steward of the historical record to agent of social change The diverse contributions to this volume share a common framework in which the political use of the past is viewed as a process of social discourse According to this model political appropriations are seen as acts of social communication designed to accrue benefits to particular groups Thus the contributors pay special attention to competing social visions and the filters these impose on archaeological data But they are also attentive to the potential consequences of their own work Indeed as the editors remind us people s lives may be affected sometimes dramatically because of the material remains that surround them Rounding out this important volume are critiques by two top scholars who summarize and synthesize the preceding chapters
