Sowards,2022-04-15 In the United States the federal government owns more than a quarter of the nation's landscape nearly

640 million acres or more than a million square miles which if consolidated would make it the tenth largest nation on earth. Primarily managed by four federal agencies: the Bureau of Land Management, the U S Forest Service, the U S Fish and Wildlife Service, and the National Park Service, American public lands have been central to developing the American economy, state, and identity. The history of these lands intersects with critical components of the American past: namely, nature, politics, and economics. From the beginning, the concept of public has been the subject of controversy, from visions of homesteaders realizing the ideal of the Jeffersonian republic to western ranchers who use the open range to promote a free enterprise system to wilderness activists who see these lands as wild places free from human encumbrance. Environmental historian Adam Sowards synthesizes public lands history from the beginning of the republic to recent controversies. Since public lands are located everywhere, including iconic national parks like Yellowstone or the Grand Canyon, Americans at large have a stake in these lands. They are, after all, ours. In a real sense, this book is for those citizens who camp in the national forests, drive through the national parks, or admire distant wilderness landscapes. These readers will gain a greater appreciation for the long and complex history of the range of these places.

The End of Affirmative Action: Making America Colorblind Again

Pasquale De Marco, 2025-03-09. In this groundbreaking book, we make a compelling case against affirmative action, arguing that it is a failed policy that has actually harmed the very people it was intended to help. Affirmative action is based on the assumption that certain groups of people are inherently disadvantaged and therefore deserve preferential treatment. This assumption is not only false but it is also harmful. It sends the message that members of these groups are not capable of succeeding on their own and that they need special help in order to get ahead. This is a demeaning and demoralizing message that has no place in a free and just society. Affirmative action also harms the very people it is intended to help. By giving preferential treatment to members of certain groups, affirmative action creates a system in which these groups are constantly being compared to others. This leads to a sense of resentment and division and it undermines the goal of creating a truly unified society. In addition to being unfair and harmful, affirmative action is also unnecessary. There is no evidence that affirmative action has actually helped to level the playing field for historically disadvantaged groups. In fact, there is evidence that it has actually made things worse. For example, a study by the National Bureau of Economic Research found that affirmative action programs in higher education have led to a decline in the quality of education for all students. We believe that colorblind justice is the only way to achieve a truly just and equal society. Colorblind justice means judging individuals solely on their merits without regard to their race, gender, or other group affiliation. This is the only way to ensure that everyone has a fair shot at success. This book is a call to action for all Americans who believe in colorblind justice. We must work together to end affirmative action and create a society in which everyone is judged solely on their merits. If you like this book, write a review.
