Making Of A Nation Ebays On Nineteenth:

Basements and Attics, Closets and Cyberspace Linda M Morra, Jessica Schagerl, 2013-01-24 Women's letters and memoirs were until recently considered to have little historical significance. Many of these materials have disappeared or remain unarchived, often dismissed as ephemera and relegated to basements, attics, closets, and increasingly cyberspace rather than public institutions. This collection showcases the range of critical debates that animate thinking about women's archives in Canada. The essays in *Basements and Attics, Closets and Cyberspace* consider a series of central questions: What are the challenges that affect archival work about women in Canada today? What are some of the ethical dilemmas that arise over the course of archival research? How do researchers read and make sense of the materials available to them? How does one approach the shifting, unstable forms of new technologies? What principles inform the decisions not only to research the lives of women but to create archival deposits? The contributors focus on how a supple research process might allow for greater engagement with unique archival forms and critical absences in narratives of past and present. From questions of acquisition, deposition, and preservation to challenges related to the interpretation of material, the contributors track at various stages how fonds are created or sidestepped in response to national and other imperatives and to feminist commitments: how archival material is organized, restricted, accessed, and interpreted; how alternative and immediate archives might be conceived and approached; and how exchanges might be read when there are peculiar lacunae, missing or fragmented documents, or gaps in communication that then require imaginative leaps on the part of the researcher. **The Net Delusion** Evgeny Morozov, 2011 Publisher's description: The revolution will be Twittered, declared journalist Andrew Sullivan after protests erupted in Iran. Yet for all the talk about the liberalizing force of the internet, regimes in Iran and China are as stable and repressive as ever. In fact, authoritarian regimes are effectively using the internet to suppress free speech and democracy. What's more, the latest research shows that greater access to information pacifies a population as much as it incites it to revolution. If we in the West are to promote liberal ideals, we'll have to do more than fund Facebook. In this book, blogger and social commentator Evgeny Morozov tackles these issues with relentless energy and analytical savvy. Marshalling a compelling set of case studies, he shows why we must stop thinking of the internet and social media as instant cures for repression and how, in some cases, they can even threaten democracy. **The Newsom Nightmare** John H. Cox, 2023-11-14 In a time when American politics is at its lowest ebb and when political leadership is notably absent across the ideological spectrum, one politician stands apart as a particularly unfortunate exemplar of everything that is wrong with our national leadership: Gavin Newsom. In this detailed and infuriating exposé of how big money has corrupted the political process at every level of society, businessman and philanthropist John Cox uses Newsom's career to analyze how and why the system operates as it does. Politicians are bought and paid for by moneyed interests; media coverage is determined first and foremost by financial concerns; and the average citizen is fully disenfranchised from determining electoral or policy outcomes.

And nowhere is this more evident with tragic results than in Gavin Newsom's collapsing California. The cost of living is out of control, a homelessness epidemic is on the rise, there's a shortage of housing, water and energy, crime rates are at an all-time high, wildfires cause devastation at alarming rates each year, and high taxes make it nearly impossible to start a small business. We're beginning to see these trends spread throughout the United States. As the old saying goes, as goes California, so goes the nation. Our system must be reformed. This book doesn't just lay out the problems; it posits a workable and easy-to-implement solution that will work to get this country and California back on track. In *The Newsom Nightmare*, Cox deftly and succinctly provides an alternative that would, if implemented, put the American body politic back on solid ground. **Book**

Review Index, 2006. Every 3rd issue is a quarterly cumulation. **Cloud Empires** Vili Lehdonvirta, 2024-02-06. The rise of the platform economy into state-like dominance over the lives of entrepreneurs, users, and workers. The early Internet was a lawless place populated by scam artists who made buying or selling anything online a risky business. Then Amazon, eBay, Upwork, and Apple established secure digital platforms for selling physical goods, crowdsourcing labor, and downloading apps. These tech giants have gone on to rule the Internet like autocrats. How did this happen? How did users and workers become the hapless subjects of online economic empires? The Internet was supposed to liberate us from powerful institutions. In *Cloud Empires*, digital economy expert Vili Lehdonvirta explores the rise of the platform economy into state-like dominance over our lives and proposes a new way forward. Digital platforms create new marketplaces and prosperity on the Internet, Lehdonvirta explains, but they are ruled by Silicon Valley despots with little or no accountability. Neither workers nor users can vote with their feet and find another platform because in most cases there isn't one. And yet, using antitrust law and decentralization to rein in the big tech companies has proven difficult. Lehdonvirta tells the stories of pioneers who helped create or resist the new social order established by digital platform companies. The protagonists include the usual suspects: Amazon founder Jeff Bezos, Travis Kalanick of Uber, and Bitcoin's inventor Satoshi Nakamoto, as well as Kristy Milland, labor organizer of Amazon's Mechanical Turk, and GoFundMe, a crowdfunding platform that has emerged as an ersatz stand-in for the welfare state. Only if we understand digital platforms for what they are—institutions as powerful as the state—can we begin the work of democratizing them.

toward Ghana Abdul Razak Iddris, 2018-10-15. This book is the first of its kind to systematically compare the policies of George W. Bush and Barack H. Obama towards Ghana, with a focus on economic aid, military aid, and immigration. It examines George W. Bush and Barack H. Obama's economic aid policies, military aid policies, and immigration policies towards Ghana to identify not only the significant differences between the approaches of the two administrations but also the factors that influenced and exacerbated the difference in their approaches. The book is also significant in terms of its epistemological contributions to diplomatic praxes, the literature on United States foreign policy, and development theories. **Restoring**

Modernism on the Nile Alex Dika Seggerman, 2019-08-13 Analyzing the modernist art movement that arose in Cairo and Alexandria from the late nineteenth century through the 1960s Alex Dika Seggerman reveals how the visual arts were part of a multifaceted transnational modernism While the work of diverse major Egyptian artists during this era may have appeared to be secular she argues it reflected the subtle but essential inflection of Islam as a faith history and lived experience in the overarching development of Middle Eastern modernity Challenging typical views of modernism in art history as solely Euro American and expanding the conventional periodization of Islamic art history Seggerman theorizes a constellational modernism for the emerging field of global modernism Rather than seeing modernism in a generalized hyperconnected network she finds that art and artists circulated in distinct constellations that encompassed finite local and transnational relations Such constellations which could engage visual systems both along and beyond the Nile from Los Angeles to Delhi were materialized in visual culture that ranged from oil paintings and sculpture to photography and prints Based on extensive research in Egypt Europe and the United States this richly illustrated book poses a compelling argument for the importance of Muslim networks to global modernism
