Lantis, 2016-03-22 This book shows how one of the most powerful tools of security studies strategic culture illuminates the origins and implications of the Asia Pacific region s difficult issues from the rise of China and the American pivot to the shifting calculations of many other actors Strategic culture sometimes challenges and always enriches prevailing neo realist presumptions about the region It provides a bridge between material and ideational explanations of state behavior and helps capture the tension between neoclassical realist and constructivist approaches The case studies in this book survey the role of strategic culture in the behaviors of Australia China Japan the Philippines South Korea and the United States They show the contrast between structural expectations and cultural predispositions as realist geopolitical security threats and opportunities interact with domestic elite and popular interpretation of historical narratives and distinctive political military cultures to influence security policies The concluding chapter devotes special attention to methodological issues at the heart of strategic cultural studies as well as how culture may impact the potential for future conflict or cooperation in the region The result is a body of work that helps deepen our understanding of strategic cultures in the Asia Pacific in comparative perspective and enrich security studies This book was published as a special issue of Contemporary Security Policy Weak States, Vulnerable Governments, and Regional Cooperation Atena Ștefania Feraru, 2021-10-31 War famine poverty organized crime environmental catastrophes refugees epidemics and pandemics modern slavery all these affect people in the non Western world to an increasingly

disproportionate extent It is also where wealthy governments wield economic leverage and military force to renegotiate existing norms of international relations Under these circumstances it is difficult to overestimate the importance and urgency of comprehending the mechanisms and motivations driving these phenomena This book is the outcome of a decade long effort to advance both theoretical and empirical understanding of what motivates non Western governments decisions to cooperate not cooperate regionally It starts by acknowledging the Western centrism of prevailing international relations theories abandoning deeply entrenched assumptions regarding the nature and roles of states and redefining state weakness The inquiry continues by elaborating this new concept and applying it to Southeast Asian polities while positing that it creates governments vulnerable to internal and external threats in line with Joel S Migdal s well known findings on the topic A set of regional cooperation strategies is then inferred based on the survival needs of insecure governing elites and its empirical validity is tested against the experience of regional organizations in Africa Asia and the Americas The second part of the book provides an in depth examination of how Southeast Asian governments shared security needs and interests shaped the emergence of the identified regional cooperation pattern and its evolution over 50 years of cooperation within the Association of Southeast Asian Nations ASEAN Overall this book is a call to international relations scholars to do our part in understanding non Western experiences and making a substantive contribution to addressing humanity s most intractable security threats
