Recording History Peter Martland, 2013 In Recording History Peter Martland uses a range of archival sources to trace the genesis and early development of the British record industry from 1888 to 1931 A work of economic and cultural history that draws on a vast range of quantitative data it surveys the commercial and business activities of the British record industry like no other work of recording history has before Martland s study charts the successes and failures of this industry and its impact on domestic entertainment Showcasing its many colorful pioneers from both sides of the Atlantic Recording History is first and foremost an account of The Gramophone Company Ltd a precursor to today s recording giant EMI and then the most important British record company active from the late 19th

century until the end of the second decade of the twentieth century Martland's history spans the years from the original inventors through industrial and market formation and final take off including the riveting battle in recording formats Special attention is given to the impact of the First World War and the that followed in its wake Scholars of recording history will find in Martland's study the story of the development of the recording studio of the artists who made the first records from which some like Italian opera tenor Enrico Caruso earned a fortune and the change records wrought in the relationship between performer and audience transforming the reception and appreciation of musical culture Filling a much needed gap in scholarship Recording History documents the beginnings of the end of the contemporary international record industry

Rural Rhythm Tony Russell, 2021-02-01 There are many biographies and histories of early country music and its creators but surprisingly little attention has been given to the actual songs at the heart of these narratives In this groundbreaking book music historian Tony Russell turns the spotlight on seventy eight original 78rpm discs of songs and tunes from the 1920s and 1930s uncovering the hidden stories of how they came to be recorded the musicians who sang and played them the record companies that marketed them and the listeners who absorbed them In these essays based upon new research contemporary newspaper accounts and previously unpublished interviews and copiously illustrated with rare images readers will find songs about home and family love and courtship crime and punishment farms and floods chain gangs and chain stores journeys and memories and many other aspects of life in the period Rural Rhythm not only charts the tempos and styles of rural and small town music making and the origins of present day country music but also traces the larger rhythms of life in the American South Southwest and Midwest What emerges is a narrative that ingeniously blends the musical and social history of the era

The Process of Psychotherapy Donald J. Kiesler, 2017-09-29 To understand the process of psychotherapeutic change one must look for the answers in the psychotherapeutic process itself This process involves the exchange of communications between two or more participants and as a result of the exchange modifications in the personality and behavior of the patient are expected to occur But what is the nature of the therapeutic messages How do they produce changes in the patient What aspects of the messages are important for therapeutic change And if the therapeutic force is somehow encoded in the messages where shall we look for it in sentence structure in emotional overtones in gestures and body movements The Process of Psychotherapy is divided into two major parts dealing respectively with method and with systems In Part I the author presents an analysis of psychotherapy process research from a communications perspective developing an incisive and detailed analysis of the methodological issues that confront researchers in this field and suggesting theoretical and empirical strategies for addressing these issues Part II provides the first exhaustive and detailed summary of extant psychotherapy process systems The author first deals with direct systems those procedures of content analysis or rating scales that have been developed to assess the exchanges between therapists and patients Seventeen major direct process systems are presented in detail and are summarized with ample citations to the

literature The final section of the book offers an exhaustive listing and concise description of various indirect measures of psychotherapy process which do not assess the verbatim interview exchanges of the participants in therapy but rather assess the participants perceptions via self report or standard analogue procedures This book is a basic sophisticated and exhaustive coverage of psychotherapy process and content analysis that will become the standard and authoritative source for anyone interested in the process of psychotherapy whether as student researcher or practitioner
