*Making America* Luther S. Luedtke, 1992 In this richly interdisciplinary work twenty eight of the nation s leading critics and scholars offer a comprehensive exploration of American society and culture Each outstanding in his or her own field the contributors address America from a diversit *Making America* , 1992 *Making America* Luther S. *Making America* Luther S. Luedtke, 1992 *A readers guide to Making America* Luther S. Luedtke, 1992 *Making America* Luther S. Luedtke, 1990 *Making America* Luther S. Luedtke, 1987 *The American Civilizing Process* Stephen Mennell, 2013-04-24 Since 9 11 the American government has presumed to speak and act in the name of civilization But isthat how the rest of the world sees it And if not why not Stephen Mennell leads up to such contemporary questions through a careful study of the whole span of American development from the first settlers to the American Empire He takes a novel approach analysing the USA s experience in the light of Norbert Elias s theory of civilizing and decivilizing processes Drawing comparisons between the USA and other countries of the world the topics discussed include American manners and lifestyles Violence in American society The impact of markets on American social character American expansion from the frontier to empire The curse of the American Dream and increasing inequality The religiosity of American life Mennell shows how the long term experience of Americans has been of growing more and more powerful in relation to their neighbours This has had all pervasive effects on the way they see themselves their perception of the rest of the world and how the rest of the world sees them Mennell s compelling and provocative account will appeal to anyone concerned about America s role in the world today including students and scholars of American politics and society **The Pentagon's Battle for the American Mind** Lori L. Bogle, 2004-10-12 The U S military has historically believed itself to be the institution best suited to develop the character spiritual values and patriotism of American youth In *Strategy for Survival* Lori Bogle investigates how the armed forces assigned itself the role of guardian and interpreter of national values and why it sought to create ideologically sound Americans capable of defeating communism and assuring the victory of democracy at home and abroad Bogle shows that a tendency by some in the armed forces to diffuse their view of America s civil religion among the general population predated tension with the Soviet Union Bogle traces this trend from the Progressive Era though the early Cold War when the Truman and Eisenhower administrations took seriously the battle of ideologies of that era and formulated plans that promised not only to meet the armed forces manpower needs but also to prepare the American public morally and spiritually for confrontation with the evils of communism Both Truman s plan for Universal Military Training and Eisenhower s psychological warfare programs promoted an evangelical democracy and sought to inculcate a secular civil military religion in the general public During the early 1960s joint military civilian anticommunist conferences organized by the authority of the Department of Defense were exploited by ultra conservative civilians advancing their own political and religious agendas Bogle s analysis suggests that cooperation among evangelicals the military and government was considered both necessary

and normal The Boy Scouts pushed a narrow vision of American democracy and Joe McCarthy's chauvinism was less an aberration than a particularly noxious manifestation of a widespread attitude To combat communism American society and its armed forces embraced brainwashing narrow moral education that attacked everyone and everything not consonant with their view of the world and how it ought to be ordered Exposure of this alliance ultimately dissolved it However the cult of toughness and the blinkered view of reality that characterized the armed forces and American society during the Cold War are still valued by many and are thus still worthy of consideration Critical Essays on Barack Obama Melvin B.

Rahming, 2011-12-15 This collection of critical essays explores the life and writings of President Barack Obama The individual essays written by a diverse body of scholars examine specific facets of Obama's career from personal communal national and international reactions to his presidential election to his controversial contributions to the global conversation about race his impact on popular culture and race relations his literary political and philosophical visions his attitude toward the American constitution his enactment of new legislation to the manner in which he attempts to influence American public policy and to the implications his presidency holds for Europe Africa and the Caribbean Ranging far beyond the presentation of personal opinions about the Obama Administration these essays offer scholarly perspectives on Obama's two books and on his multidimensional efforts to remove the obstacles to equality of opportunity in the United States They also explore Obama's potential for re-shaping the American social and cultural terrain and by extension for re-vitalizing the American Dream This book should be of interest to scholars of political science literature history philosophy religion and psycho-culture as well as to the general reading public **Learning To Be American** Rubén Peinado Abarrio, 2017-07-26 Pocos novelistas contemporáneos han analizado la cultura americana con el detalle con el que lo ha hecho Richard Ford en su trilogía sobre Frank

Bascombe The Sportswriter Independence Day y The Lay of the Land Un trptico sobre la idiosincrasia de la sociedad norteamericana expuesto por uno de los narradores más meticulosos de la nación Este libro se aventura en un territorio sin explorar revelando cómo el singular sabor americano de las novelas de Frank Bascombe también surge de escenarios peculiares y de los personajes marginales que proponen modelos de identidad alternativos Esta obra redescubre la esencia del principal proyecto novelístico de Ford desvelándolo como una fuente infinita de percepciones para cualquier lector interesado en la gente los mitos y las narrativas que construyen el ser americano **Making America: A Readers Guide**

Luther S. Luedtke, 1990 Collective Morality and Crime in the Americas Christopher Birkbeck, 2013 This book examines the nature of collective morality as it materializes in public commentary about crime in the Americas and identifies the ways in which the moral community is talked into being and how the imagined moral universe is mapped **Whiteness and Racialized Ethnic Groups in the United States** Sherrow O. Pinder, 2012-01-01 Whiteness and Racialized Ethnic Groups in the United States in order to account for the never ending discrimination toward racialized ethnic groups including First Nations blacks Chinese and Mexicans revisits the history of whiteness in the United States It shows the difference between

remembering a history of human indignities and recreating one that composes its own textual memory More specifically it reformulates how the historically reliant positionality of whiteness as a part of the everyday practice and discourse of white supremacy would later become institutionalized Even though whiteness studies with the intention of exposing white privilege has entered the realm of academic research and is moving toward antiracist forms of whiteness or at least toward antiracist approaches for a different form of whiteness it is not equipped to relinquish the privilege that comes with normalized whiteness Hence in order to construct a post white identity whiteness would have to be denormalized and freed of it of its presumptive hegemony

Architects of an American Landscape Hugh Howard, 2022-01-25 A dual portrait of America's first great architect Henry Hobson Richardson and her finest landscape designer Frederick Law Olmsted and their immense impact on America As the nation recovered from a cataclysmic war two titans of design profoundly influenced how Americans came to interact with the built and natural world around them through their pioneering work in architecture and landscape design Frederick Law Olmsted is widely revered as America's first and finest parkmaker and environmentalist the force behind Manhattan's Central Park Brooklyn's Prospect Park Biltmore's parkland in Asheville dozens of parks across the country and the preservation of Yosemite and Niagara Falls Yet his close friend and sometime collaborator Henry Hobson Richardson has been almost entirely forgotten today despite his outsized influence on American architecture from Boston's iconic Trinity Church to Chicago's Marshall Field Wholesale Store to the Shingle Style and the wildly popular open plan he conceived for family homes Individually they created much beloved buildings and public spaces Together they married natural landscapes with built structures in train stations and public libraries that helped drive the shift in American life from congested cities to developing suburbs across the country The small reserved Olmsted and the passionate Falstaffian Richardson could not have been more different in character but their sensibilities were closely aligned In chronicling their intersecting lives and work in the context of the nation's post war renewal Hugh Howard reveals how these two men created original all American idioms in architecture and landscape that influence how we enjoy our public and private spaces to this day

**United States Public Diplomacy in China** United States Advisory Commission on Public Diplomacy, 1989 A Fragile Capital Charles Chester Cole, 2001 Overall the book is organized by topic including business politics education religion the arts transportation and the press Cole shows how Columbus residents reacted to and reflected the major political economic and social trends in the United States at the time In contrast to earlier accounts that focused primarily on the male white leadership this book tries to encompass all economic classes and ethnic and racial groups

*You, the People* Vanessa B. Beasley, 2011-11-07 New in paperback As we ask anew in these troubled times what it means to be an American *You the People* provides perspective by casting its eye over the answers given by past U S presidents in their addresses to the public Who is an American and who is not And yet as Vanessa Beasley demonstrates in this eloquent exploration of a century of presidential speeches the questions are not new Since the Founders first identified the nation as we the people the faces and

accents of U S citizens have changed dramatically due to immigration and other constitutive changes U S presidents have often spoken as if there were one monolithic American people Here Beasley traces rhetorical constructions of American national identity in presidents inaugural addresses and state of the union messages from 1885 through 2000 She argues convincingly that while the demographics of the voting citizenry changed rapidly during this period presidential definitions of American national identity did not Chief executives have consistently employed a rhetoric of American nationalism that is simultaneously inclusive and exclusive Beasley examines both the genius and the limitations of this language *Making America / Making American Literature* ,2021-11-01 If 1776 heralds America s Birth of the Nation so too it witnesses the rise of a matching and overlapping American Literature For between the 1770s and the 1820s American writing moves on from the ancestral Puritanism of New England and Virginia though not as yet into the American Renaissance so strikingly called for by Ralph Waldo Emerson Even so the concourse of voices which arise in this period that is between and including Benjamin Franklin and James Fenimore Cooper mark both a key transitional literary generation and yet one all too easily passed over in its own imaginative right This collection of fifteen specially commissioned essays seeks to establish new bearings a revision of one of the key political and literary eras in American culture Not only are Franklin and Cooper themselves carefully re evaluated in the making of America s new literary republic but figures like Charles Brockden Brown Washington Irving Philip Freneau William Cullen Bryant the other Alexander Hamilton and the playwrights Royall Tyler and William Dunlop Other essays take a more inclusive perspective whether American epistolary fiction a first generation of American women authored fiction the public discourse of The Federalist Papers the rise of the American periodical or the founding African American generation of Phillis Wheatley What unites all the essays is the common assumption that the making of America was as much a matter of creating its national literature as the making of American literature was a matter of shaping a national identity *Movies as History* Marie L. Aquila,2014-04-22 Popular movies can enhance the study of history A dominant form of entertainment throughout the 20th century they can serve as nontraditional primary sources and offer remarkable opportunities to observe attitudes about social concerns gender or racial issues politics and historical events that were current when the movies were made This book is a topical guide for educators providing detailed analysis of 35 movies followed by discussion questions that will help students interpret how each movie s content and themes reflect the times when it was made The book covers four main topics the Great Depression World War II the early years of the Cold War and the changing expectations and images of women in movies from 1930 to 1970 An historical overview chronicles how each topic was treated in movies from that time period The movies should have wide appeal in grades 7 through 12 and can help students learn to think more critically about the images and messages that appear in popular media today
