Connecting the Isiac Cults Tomáš Glomb,2022-11-03 Why did Egyptian cults especially those dedicated to the goddess Isis and god Sarapis spread so successfully across the ancient Mediterranean after the death of Alexander the Great How are we limited by the established methodological apparatus of historiography and which innovative methods from other disciplines can overcome these limits In this book Tom Glomb shows that while the interplay of different factors such as the economy climate and politics created favorable conditions for the early spread of the Isiac cults the use of innovative quantitative methods can shed new light and help disentangle the complex interplay of individual factors Using a combination of geospatial modeling mathematical modeling and network analysis Glomb determines that at least in the regions of the Hellenistic Aegean and western Asia Minor the political channels created by the Ptolemaic dynasty were a dominant force in the local spread of the Isiac cults An important contribution to the historiography of the ancient Mediterranean this book answers the specific question of how it happened as well as how can we answer it beyond the limits of the established methodological apparatus in historiography *The Cult Connection* Carol A. Dennis,2021-10-07 To some this book will be an inspiration and a guide that sheds light on our current times to others a correction and a conviction Small it may be but powerful and direct This book serves as a study guide for those searching for relevance between our place as Christians and the confusion and chaos of our current times It is a call to the church and its earthly leadership to center their focus and submission to the love and authority of our Lord and Savior It is a warning to all children of God to be

wary and watchful for the signs of false teachings prophets and leaders 1 **Making the Cisco Connection** David Bunnell, Adam Brate, 2000-02-29 Cisco Systems is known among the technology elite in Silicon Valley as one of the most successful companies to emerge from the Valley in many years. It has been dubbed computing's next Superpower. Just as Intel and Microsoft soared to lofty heights with the rise of the personal computer, Cisco Systems is flying on the spectacular updraft of the Internet. The company, which makes specialized computers that route information through a network acting as a sort of data traffic cop, has captured 85 percent of the market for routers used as the backbone of the biggest network of them all: the Internet. As a result, over the last five years, the value of Cisco's total outstanding stock has risen over 2,000 percent, twice the increase of Microsoft Corp. stock in the same period. Beginning as a tale of two college sweethearts at Stanford University who cofounded the company fifteen years ago, the often-told Cisco legend has all the makings of a great novel: love, money, a villain, or two corporate coups, and the sweet taste of victory. But mostly, the Cisco story is a very unusual tale of corporate success. Despite the struggle of passing through several regimes, Cisco managed to hit all the crucial spots of its business. Cisco consistently bested competitors like 3Com and IBM with insight, innovation, customer focus, and one of the biggest corporate buying sprees in history. *Making the Cisco Connection* deftly traces the networking giant's path to success from its founding couple, Sandra Lerner and Leonard Bosack, to current CEO John Chambers. It highlights the company's astounding knack for buying other businesses and making them part of a huge conglomerate, its own highly developed use of technology, and its unusually tight-knit culture. Featuring the perspective of top Cisco executives and competitors, this book reveals how Cisco's technology, employees, and even its competition have blended to make Cisco possibly the most important company shaping the future of communications. Next to ruthless competitors Microsoft and Intel, Cisco shines with a kinder, gentler image, emphasizing happy customers and employees. You'll see how Cisco built its impressive culture by cultivating community, boosting morale, whittling down bureaucracy, and saving money to boot. This book also explains how Cisco is positioning itself to enter a new competitive playing field, moving beyond Internet routers in an attempt to build a single, giant global communications system based on the Internet that would make the current telephone system obsolete. Cisco wants to be the company that delivers the infrastructure of this new network, which will combine computer networks with telephones, television, radio, and satellite communications. To do that, it is now challenging global giants such as Lucent Technologies and Fujitsu. Cisco plans to become the backbone of the entire communications industry, making it a corporation of incredible power as the Internet Age blossoms in the new millennium. Provocative and instructive, *Making the Cisco Connection* traces the unique history of one of the most profitable and enduring technology companies in business today. Acclaim for *Making the CISCO Connection* If you want to learn the whole scoop about the first Internet Age company and one of the most successful firms of any age, you've come to the right place. Bunnell's treatment of Cisco's rise and continued rise is fascinating and full of human detail. It's clear that Cisco is not just a firm with great

technology but also great leaders and managers Thomas H Davenport Director Andersen Consulting Institute for Strategic Change Professor Boston University School of Management Cisco has emerged as a twenty first century leader David Bunnell captures the ongoing story of the Cisco executive team exploiting IT structuring a unique organization and creating a dynamic strategy for this breakaway dot com company Richard L Nolan William Barclay Harding Professor of Business Administration Harvard Business School **Creating Partnerships with Parents** Donald Lueder,2000-10-25 Are you wondering how to nurture a better relationship with the parents of your students This book provides teachers with comprehensive methods to bridge the gap between school and home in order to enhance the development of their students

Roman Faith and Christian Faith Teresa Morgan,2015-05-29 This study investigates why faith pistis fides was so important to early Christians that the concept and praxis dominated the writings of the New Testament It argues that such a study must be interdisciplinary locating emerging Christianities in the social practices and mentalit s of contemporary Judaism and the early Roman empire This can therefore equally be read as a study of the operation of pistis fides in the world of the early Roman principate taking one but relatively well attested cult as a case study in how micro societies within that world could treat it distinctively Drawing on recent work in sociology and economics the book traces the varying shapes taken by pistis fides in Greek and Roman human and divine human relationships whom or what is represented as easy or difficult to trust or believe in where pistis fides is deferred and reified in practices such as oaths and proofs how pistis fides is related to fear doubt and scepticism and which foundations of pistis fides are treated as more or less secure The book then traces the evolution of representations of human and divine human pistis in the Septuagint before turning to pistis pisteuein in New Testament writings and their role in the development of early Christologies incorporating a new interpretation of pistis Christou and ecclesiologies It argues for the integration of the study of pistis pisteuein with that of New Testament ethics It explores the interiority of Graeco Roman and early Christian pistis fides Finally it discusses eschatological pistis and the shape of the divine human community in the eschatological kingdom School-to-work Connections ,1992 **Making**
