new complex reality that urban manufacturing now sits squarely at the intersection of research education and neighborhood

to the design of districts and buildings but to the design of policy as well the special roles that governments local
development corporations and not for profit organizations all have to play in supporting manufacturing This book presents
current models for working neighborhoods where factories enable fine grained mixed use communities and face to face
contact while creatively solving the very real problems of goods movement and functional buildings Design guidelines and
policy recommendations are calibrated to different types of production districts The Design of Urban Manufacturing is the
essential resource for policy makers designers and students in urban design planning and urban and economic development
