An American Health Dilemma W. Michael Byrd, Linda A. Clayton, 2001-12-21 First published in 2002 *An American Health Dilemma* is the story of medicine in the United States from the perspective of people who were consistently officially mistreated, abused or neglected by the Western medical tradition and the US health care system It is also the compelling story of African Americans fighting to participate fully in the health care professions in the face of racism and the increased power of health corporations and HMOs This tour de force of research on the relationship between race, medicine and health care in the United States is an extraordinary achievement by two of the leading lights in the field of public health Ten years out it is finally updated with a new third volume taking the story up to the present and beyond remaining the premiere and only reference on black public health and the history of African American medicine on the market today No one who is concerned with American race relations with access to and quality of health care or with justice and equality for humankind can afford to miss this powerful resource

Tulane Clarence L. Mohr, Joseph E. Gordon, 2001-03-01 *Tulane* is the story of a southern school striving for national recognition in the post World War II era of American research universities Clarence L. Mohr and Joseph E. Gordon present a candid in depth treatment of the 150 year old New Orleans institution during this transformative period when it grappled with such pervasive issues as federal and private funding, academic freedom, an enrollment surge set in motion by the GI Bill and sustained by the postwar baby boom, the cold war, desegregation, the antiwar civil rights and student power movements, expanding intercollegiate athletics, censorship, the clash between liberal and utilitarian conceptions of higher learning, revision of curricular content and the role of universities as platforms for social criticism, all of which together profoundly altered the mission of American higher learning In addition to these external forces the authors examine the many individuals, administrators, professors and students whose responses in both calm and crises shaped the evolution of Tulane's unique academic, physical and demographic design Like its regional peers in

the 1950s and 1960s Tulane faced the challenge of transcending its past without repudiating traditions of lasting value From a loose confederation of locally oriented undergraduate and professional schools it developed into a nationally focused research university serving a diverse student body selected through rigorous admissions standards Its journey over the past half century should remind those who support study or teach in American universities that their own institutions during that period have in a very real sense made history as well

Curators and Culture Joel J. Orosz,2002-06-28 The author researched ten museums founded prior to 1870 using primary sources Those chosen comprised a geographically diverse sample of pre 1870 American museums and covered a range of disciplines among them art history and natural science

The Birth of Development Amy L. S. Staples,Amy L. Sayward,2006 A comprehensive examination of economic globalization Focused on the creation and evolution of post 1945 internationalist ideology The Birth of Development highlights efforts to diffuse the destructive role of the nation state in world affairs by constructing truly international organizations with global agendas the World Bank the Food and Agriculture Organization and the World Health Organization These organizations and the men and women who worked for them pioneered the advancement of the quality of life for all and established an ongoing obligation to promote worldwide economic development As author Amy Staples reveals the results of their efforts were mixed Grounded in archival research conducted in the archives of the World Bank Food and Agriculture Organization and World Health Organization as well as in other archives in the United States Canada and Great Britain The Birth of Development provides a foundational understanding for many of today s debates on economic globalization especially those that involve the World Bank and World Trade Organization Given the current role of international peacekeepers and multinational aid agencies this story is timely and makes clear that the issues that confronted early postwar planners and reformers remain in many ways unsolved even today The Birth of Development is the only comparative study of these crucial architects of the theory and practice of economic development and it contributes significantly to the ongoing effort to view the postwar period as more than simply an East West Cold War It breaks new ground conceptually and methodologically and will be a welcome addition to the literature in the fields of modern diplomatic history and international relations
