The Making of Citizens Bryan R. Roberts, 1996-02-12 Originally published as *Cities of Peasants* this highly acclaimed account of the expansion of capitalism in the developing world has now been extensively reworked and updated The book links contemporary differences in the political and economic structure of developing countries to the historically specific way in which these have become part of the world economy **A Companion to the City** Gary Bridge, Sophie

Watson, 2008-04-15 A Companion to the City provides the reader with an indispensable and authoritative overview of the key debates controversies and questions concerning the city from a variety of theoretical vantage points with an international perspective Indispensable companion for students of the City Multidisciplinary approach of interest across several fields Includes contributions from major scholars in the field Rural-Urban Interaction in the Developing World Kenny

Lynch, 2004-11-10 Sustaining the rural and urban populations of the developing world has been identified as a key global challenge for the twenty first century Rural Urban Interaction in the Developing World is an introduction to the relationships between rural and urban places in the developing world and shows that not all their aspects are as obvious as migration from country to city There is now a growing realization that rural urban relations are far more complex Using a wealth of student friendly features including boxed case studies discussion questions and annotated guides to further reading this innovative book places rural urban interactions within a broader context thus promoting a clearer understanding of the opportunities as well as the challenges that rural urban interactions represent *Development Sociology* Norman Long, 2003-09-02 In this

exciting and challenging work Norman Long brings together years of work and thought in development studies to provide a key text for guiding future development research and practice Using case studies and empirical material from Africa and Latin America Development Sociology focuses on the theoretical and methodological foundations of an actor oriented and social constructionist form of analysis This style of analysis is opposed to the traditional structuralist institutional analysis which is often applied in development studies With an accessible mix of general debate critical literature reviews and original case study materials this work covers a variety of key development issues Among many important topics discussed the author looks at commoditisation small scale enterprise and social capital knowledge interfaces networks and power globalisation and localisation as well as policy formulation and planned intervention processes This book should be read for its desire to pursue a form of analysis that helps us to understand better and more realistically the kinds of development interventions and social transformations that have characterised the second half of the twentieth century and will no doubt continue to characterise future development studies *Challenges and Change in Middle America* Katie Willis, Cathy

McIlwaine, 2014-09-25 A comprehensive introduction to the important economic social and political processes and development issues in this extremely popular region The Central American nations and those of the Caribbean including Guyana Surinam and French Guiana on the mainland share many historical processes as well as experiencing similar

development problems today These include European colonialism structural adjustment small size reliance on primary production influence of the United States and moves towards democratisation While Mexico is obviously a much larger country in area economy and population terms it is included in this volume because of its close ties to the other countries in the region through processes such as trade and migration

Subsidizing Capitalism Tamar Diana Wilson, 2012-02-01 In Mexico self employed brickmakers support capitalist enterprise by providing bricks to build hotels factories office buildings and shopping malls at costs lower than those based on profit making principles Combining Chayanovian and neo Marxist approaches *Subsidizing Capitalism* asserts that the economic activities of these self employed brickmakers may be considered counterhegemonic because they avoid proletarianization in the formal sector Tamar Diana Wilson discusses the similarities between peasants and brickmakers the structural position of garbage pickers in relation to brickmakers the trajectory from piece worker to petty commodity producer to petty capitalist the economic value of women s and children s work as part of the family labor force and how the neopatriarchal household is intrinsic to petty commodity production Interspersed throughout are short stories and poems that offer the brickmakers perspectives and provide a rarely seen look into their lives

Democracy and Global Water Politics in Historical Perspective Jose Esteban Castro, 2024-12-23 This book addresses water privatization from a historical sociological perspective and argues against the unrelenting imposition of neoprivatist water politics worldwide Water is essential for life but it is also a source of economic and political power Prevailing water politics continues to erode the conditions of dignified living conditions of millions of human beings around the world including many living in Western capitalist democracies The book revisits water related myths fake truths and authoritarian practices promoted or employed by International Financial Institutions governments and other powerful actors to keep enforcing long failed policies grounded on ideological dogmas and short term interests and argues for the substantive democratization of water politics and management It rejects claims of scientific neutrality from academics and other actors across the political spectrum who are co responsible for the perpetuation of these conditions interrogating the ethics of scientific political pragmatism

The Caribbean City Rivke Jaffe, 2008 Caribbean cities are a unique yet underexposed phenomenon Their distinctiveness results from a combination of interrelated factors including a history of slavery development under the hemispheric hegemony of the United States and spatial limitations imposed by the settings of most Caribbean urban areas This innovative volume presents a detailed introduction to the spatial socio cultural and economic characteristics of the Caribbean city followed by case studies of selected cities in the Dutch Hispanophone Francophone and Anglophone Caribbean It discusses a broad range of disciplinary approaches in examining the urban Caribbean incorporating perspectives from anthropology sociology history political science geography and literary and cultural criticism

BOOK JACKET

Migration, Urbanization, and Development Richard E. Bilborrow, 1998 Internal migration and urbanization are key dimensions of the process of socioeconomic development The unprecedented movement of peoples within the

borders of their own countries is one of the greatest transformations witnessed in the 20th century Policy analysts especially those from developing countries where internal migration can be felt at first hand view migration as one of the most important factors affecting the course of development It is within this context that UNFPA convened the Symposium on Internal Migration and Urbanization in Developing Countries in January 1996 in preparation for the United Nations World Conference on Human Settlements in Istanbul in June 1996 The final results of the symposium are found in this book This volume provides a better understanding at global level of internal migration issues of concern to policy analysts

Contested Powers John-Andrew McNeish, Axel Borchgrevink, Owen Logan, 2015-06-11 In the global North the commoditization of creativity and knowledge under the banner of a creative economy is being posed as the post industrial answer to dependency on labour and natural resources Not only does it promise a more stable and sustainable future but an economy focused on intellectual property is more environmentally friendly so it is suggested Contested Powers argues that the fixes being offered by this model are bluffs development as witnessed in Latin American energy politics and governance remains hindered by a global division of labour and nature that puts the capacity for technological advancement in private hands The authors call for a multi layered understanding of sovereignty arguing that it holds the key to undermining rigid accounts of the relationship between carbon and democracy energy and development and energy and political expression Furthermore a critical focus on energy politics is crucial to wider debates on development and sustainability Contested Powers is essential reading for those wondering how energy resources are converted into political power and why we still value the energy we take from our surroundings more than the means of its extraction *Theory, Practice, and Community Development* Mark Brennan, Jeffrey Birdger, Theodore R. Alter, 2013-06-19 For many scholars the study of community and community development is at a crossroads Previously dynamic theories appear not to have kept pace with the major social changes of our day Given our constantly shifting social reality we need new ideas and research that pushes the boundaries of our extant community theories Theory Practice and Community Development stretches the traditional boundaries and applications of well established community development theory and establishes new theoretical approaches rooted in new disciplines and new perspectives on community development Expanded from a special issue of the journal Community Development Theory Practice and Community Development collects previously published and widely cited essays as well as new theoretical and empirical research in community development Compiled by the editors of Community Development the essays feature topics as varied as placemaking democratic theory and rural organizing Theory Practice and Community Development is vital for scholars and practitioners coming to grips with the rapidly changing definition of community

Transforming Citizenship Raymond A. Rocco, 2014-07-01 In Transforming Citizenship Raymond Rocco studies the exclusionary inclusion of Latinos based on racialization and how the processes behind this have shaped their marginalized citizenship status offering a framework for explaining this dynamic Contesting this status has been at the core of Latino

politics for more than 150 years Pursuing the goal of full equal and just inclusion in societal membership has long been a major part of the struggle to realize democratic normative principles This illuminating research demonstrates the inherent limitations of the citizenship regime in the United States for incorporating Latinos as full societal members and offers an alternative conception associative citizenship that provides a way to account for and challenge the pattern of exclusionary belonging that has defined the positions of the Latinos in U S society Through a critical engagement with key theorists such as Rawls Habermas Kymlicka Walzer Taylor and Young Rocco advances an original analysis of the politics of Latino societal membership and citizenship arguing that the specific processes of racialization that have played a determinative role in creating and maintaining the pattern of social and political exclusions of Latinos have not been addressed by the dominant theories of diversity and citizenship developed in the prevalent literature in political theory

How We Struggle Sian Lazar,2023-01-20 A comparative ethnographic approach to the question of labour struggles and workers political agency A masterful book a resource that makes anthropology matter Andrea Muehlebach Professor of Anthropology University of Bremen When it comes to labor movements unionized industrial workers on the factory floor have only ever been part of the picture Across so many different workplaces sectors of the economy and geographical contexts the question of how working people struggle in the day to day has no single answer Here Sian Lazar offers a unique anthropological perspective on labor agency that takes in examples from across the globe from heavy industry and agriculture to the service and informal sectors She asks how do people strive to improve their lives and working conditions How are they constrained and enabled in that struggle by the nature of the work they do and by their own positionality in local histories cultures and networks *How We Struggle* explores worker action across the spectrum from organized trade unionism to individualized strategies of accommodation resistance and escape The book marries a discussion of global political economy and Marxist feminist theories of labor with ethnographic approaches that begin from a perspective of human experience kinship and radical heterogeneity

Enduring Violence Cecilia Menjivar,2011-04-01 Drawing on revealing in depth interviews Cecilia Menj var investigates the role that violence plays in the lives of Ladina women in eastern Guatemala a little visited and little studied region While much has been written on the subject of political violence in Guatemala Menj var turns to a different form of suffering the violence embedded in institutions and in everyday life so familiar and routine that it is often not recognized as such Rather than painting Guatemala or even Latin America as having a cultural propensity for normalizing and accepting violence Menj var aims to develop an approach to examining structures of violence profound inequality exploitation and poverty and gender ideologies that position women in vulnerable situations grounded in women s experiences In this way her study provides a glimpse into the root causes of the increasing wave of femicide in Guatemala as well as in other Latin American countries and offers observations relevant for understanding violence against women around the world today

Forces of Labor Beverly J. Silver,2003-04-21 This 2003 book analyzes the dynamics of labor movements introducing a

researching modern Turkey and the growth of Islamist politics throughout the Middle East and North Africa

Governance in the Gullies Saumitra Jha, Vijayendra Rao, Michael J. V. Woolcock, 2005 The authors use detailed ethnographic evidence to design and interpret a broad representative survey of 800 households in Delhi's slums examining the processes by which residents gain access to formal government and develop their own informal modes of leadership While ethnically homogeneous slums transplant rural institutions to the city newer and ethnically diverse slums depend on informal leaders who gain their authority through

political connections education and network entrepreneurship Education and political affiliation are more important than seniority in determining a leader's influence Informal leaders are accessible to all slum dwellers but formal government figures are most accessed by the wealthy and the well connected
