Powell, 2007-04-16 Professor Powell ties the origin and nature of archaic Greek literature to the special technology of Greek alphabetic writing In building his model he presents chapters on specialized topics text orality myth literacy tradition and memorization and then shows how such special topics relate to larger issues of cultural transmission from East to West Several chapters are devoted to the theory and history of writing its definition and general nature as well as such individual developments as semasiography and logosyllabography

Chinese writing and the West Semitic family of syllabaries He shows how the Greek alphabet put an end to the multiliteralism of Eastern traditions of writing and how the recording of Homer and other early epic poetry cannot be separated from the alphabetic revolution Finally he explains how the creation of Greek alphabetic texts demoticized Greek myth and encouraged many free creations of new myths based on Eastern images

Knox,1989-05-04 The emphasis of this volume is on Greek literature produced in the period between the foundation of Alexandria late in the fourth century B C and the end of the high empire in the third century A D Here we see a shift away from the city states of the Greek mainland to the new centres of culture and power first Alexandria under the Ptolemies and then imperial Rome Greek literature being traditionally cosmopolitan adapted to these changes with remarkable success and through the efficiency of the Hellenistic educational system Greek literary culture became the essential mark of an educated person in the Graeco Roman world *Encyclopedia of Ancient Greece* Nigel Wilson,2013-10-31 Examining every aspect of the culture from antiquity to the founding of Constantinople in the early Byzantine era this thoroughly cross referenced and fully indexed work is written by an international group of scholars This Encyclopedia is derived from the more broadly focused Encyclopedia of Greece and the Hellenic Tradition the highly praised two volume work Newly edited by Nigel Wilson this single volume reference provides a comprehensive and authoritative guide to the political cultural and social life of the people and to the places ideas periods and events that defined ancient Greece *Literacy and Paideia in Ancient Greece*

Kevin Robb,1994 Kevin Robb chronicles ancient Greece s literate revolution recounting how the Phoenecian alphabet silently entered Greece and in the improved Greek version conquered its major cultural institutions He examines the progress of literacy from its origins in the eighth century to the fourth century B C E when the major institutions of Athenian democracy most notably law and higher education became totally dependent on alphabetic literacy By introducing new evidence as well as re evaluating the older evidence Robb shows that early Greek literacy can be understood only in terms of the rich oral culture that immediately preceded it one that was dominated by the oral performance of epic verse or Homer Only gradually did literate practices supersede oral habits and the oral way of life forging alliances which now seem both bizarre and fascinating but which were eminently successful contributing to the miracle of Greece Literacy and Paideia in Ancient Greece provides a fascinating look at the first society to become culturally dependent on the alphabet In it Robb elucidates how in the space of four hundred years total orality gave way to an advancing literacy In the process of his investigation he brings

new light to early Greek ethics the rise of written law the emergence of philosophy and the final dominance of the Athenian philosophical schools in higher education **A Manual of Greek Literature** Charles Anthon, 1853 *Inventing God's Law* David P. Wright, 2009-09-03 Most scholars believe that the numerous similarities between the Covenant Code Exodus 20 23 23 19 and Mesopotamian law collections especially the Laws of Hammurabi which date to around 1750 BCE are due to oral tradition that extended from the second to the first millennium This book offers a fundamentally new understanding of the Covenant Code arguing that it depends directly and primarily upon the Laws of Hammurabi and that the use of this source text occurred during the Neo Assyrian period sometime between 740 640 BCE when Mesopotamia exerted strong and continuous political and cultural influence over the kingdoms of Israel and Judah and a time when the Laws of Hammurabi were actively copied in Mesopotamia as a literary canonical text The study offers significant new evidence demonstrating that a model of literary dependence is the only viable explanation for the work It further examines the compositional logic used in transforming the source text to produce the Covenant Code thus providing a commentary to the biblical composition from the new theoretical perspective This analysis shows that the Covenant Code is primarily a creative academic work rather than a repository of laws practiced by Israelites or Judeans over the course of their history The Covenant Code too is an ideological work which transformed a paradigmatic and prestigious legal text of Israel s and Judah s imperial overlords into a statement symbolically countering foreign hegemony The study goes further to study the relationship of the Covenant Code to the narrative of the book of Exodus and explores how this may relate to the development of the Pentateuch as a whole
