Cross-Cultural Perspectives on Couples with Mixed HIV Status: Beyond Positive/Negative Asha Persson, Shana D. Hughes, 2016-10-24 This edited volume presents a detailed portrait of couples living with mixed HIV status where one partner is HIV positive and the other negative. Readers will come to understand the various and complex ways in which these mixed status or serodiscordant couples build a life together within the shadow of HIV related stigma. Spanning the globe, coverage explores serodiscordance as a negotiated practice and process inseparable from the social context in which it is situated. The book shows how couples draw on diverse and sometimes contradictory cultural discourses of medicine, romance, and normality to make sense of and manage their mixed HIV status and any perceived risks not uncommonly in ways that depart from prevailing HIV prevention messages. Throughout compelling personal stories accompany the empirical research sharing the firsthand experiences of men and women in serodiscordant relationships. Bringing together research from diverse disciplines and geographical regions, this book contributes important insights for future HIV health promotion as well as offers new knowledge to scholarship on the cultural intersections of illness and intimacy. It will appeal to a broad audience working across the fields of HIV health, gender, sexuality, development, and human rights. It proposes a new reading of this distinction for the twenty-first century, building on the work of Constant Green and Berlin who led the historical development of these ideas. The author defends the idea that freedom is a dynamic interaction between two inseparable yet sometimes fundamentally opposed positive and negative concepts: the yin and yang of freedom. Positive freedom is achieved when one succeeds in doing what is right, while negative freedom is achieved when one is able to advance one's wellbeing. In an environment of culture wars, resurging populism, and challenge to progressive liberal values, recognising the duality of freedom can help us better understand the political dilemmas we face and point the way forward. The book analyses the duality of freedom in more philosophical depth than previous studies and places it within the context of both historical and contemporary political thinking. It will be of interest to students and scholars of liberalism and political theory. Positive and Negative Symptoms in Psychosis Philip D. Harvey, Elaine Walker, 2013-08-21 First published in 1987. Tsuang, 2012-12-06 The positive versus negative distinction of schizophrenic disorders has promoted ongoing research Phenomenology psychopathology biology genetics pharmacological and nonpharmacological treatment psychosocial and longitudinal research all have found a new focus of interest This volume attempts to provide an unbiased picture of the status of American and European knowledge regarding the positive negative distinction Researchers from North America and Europe describe the relation of modern concepts of positive and negative symptomatology to the original models of Reynolds and Jackson Integrating phenomenological genetic and biological factors the authors depict current methods of assessing positive and negative symptomatology differentiating between primary and secondary symptomatology and using pharmacological and nonpharmacological treatment The stability of positive and negative symptoms over time and evidence for the occurrence of separate positive and negative episodes over a long term course of schizophrenia are extensively discussed in terms of their implications on the positive negative construct The relevance of the positive negative dichotomy to child and adolescent schizophrenia is also debated The main aim of this book is not to advocate a single concept and present only arguments supporting it but to discuss important controversies Problems concerning a concept cannot be solved by ignoring them However unanswered questions may be resolved through discussion debate and constructive compromise **Neutrosophic Interpretation of Tao Te Ching (道经 — 道经), English-Chinese Bilingual**

Florentin Smarandache & Fu Yuhua, The purpose of this book is to extend the foundation and application range of Tao TeChing The reasons for this are as follows Firstly we are willing to point out that Tao TeChing already has some limitation because many questions we are interested in cannot be answered within Tao Te Ching For example Tao Te Ching basically discussed the matters in China however considering all possible situations it should matter in foreign countries as well i.e. the global village This was impossible in Lao Tzu's time Secondly if the original Tao Te Ching is regarded as Positive Tao Te Ching its opposite is Negative Tao TeChing while the intermediate or compound state is Neutral Tao Te Ching Thus our book presents the way to extend the original Tao Te Ching in various neutrosophic interpretations In a same way it is possible to neutrosophically interpret any theory T in any field positive T negative T and Neutrosophic T TTT T

New Advances on Zika Virus Research Luis Martinez-Sobrido,Fernando Almazan Toral,2019-04-02 Zika virus ZIKV is a mosquito borne member of the Flaviviridae family that historically has been associated with mild febrile illness However the recent outbreaks in Brazil in 2015 and its rapid spread throughout South and Central America and the Caribbean together with its association with severe neurological disorders including fetal microcephaly and Guillain Barr syndrome in adults have changed the historic perspective of ZIKV

Currently ZIKV is considered an important public health concern that has the potential to affect millions of people worldwide. The significance of ZIKV in human health and the lack of approved vaccines and/or antiviral drugs to combat ZIKV infection have triggered a global effort to develop effective countermeasures to prevent and/or treat ZIKV infection. In this Special Issue of *Viruses* we have assembled a collection of 32 research and review articles that cover the more recent advances on ZIKV molecular biology, replication and transmission, virus-host interactions, pathogenesis, epidemiology, vaccine development, antivirals and viral diagnosis.
