The Post-Cold War International System Ewan Harrison, 2004-07-31 The end of the Cold War has opened up a real world laboratory in which to test and refine general theories of international relations Using the frameworks provided by structural realism institutionalism and liberalism The Post Cold War International System examines how major powers responded to the collapse of the Soviet Union and developed their foreign policies over the period of post Cold War transition The book argues that the democratic peace has begun to generate powerful socialisation effects due to the emergence of a critical mass of liberal democratic states since the end of the Cold War The trend this has produced is similar to a pattern that classical realists have interpreted as bandwagoning within a unipolar power structure Case studies of Germany China and Japan identified as key states with the potential to challenge US dominance provide evidence to support the assessment of international change The author concludes by exploring the implications of September 11th for the analysis developed This important volume argues that the end of the Cold War was a major historical turning point in the development of world politics with fundamental implications for the basic way in which the dynamics of the international system are conceptualised

Reflexivity and International Relations Jack L Amoureux, Brent J. Steele, 2015-09-25 Reflexivity has become a common term in IR scholarship with a variety of uses and meanings Yet for such an important concept and referent understandings of reflexivity have been more assumed rather than developed by those who use it from realists and constructivists to feminists and post structuralists This volume seeks to provide the first overview of reflexivity in international relations theory offering students and scholars a text that provides a comprehensive and systematic overview of the current reflexivity literature develops important insights into how reflexivity can play a broader role in IR theory pushes reflexivity in new productive directions and offers more nuanced and concrete specifications of reflexivity moves reflexivity beyond the scholar and the

scholarly field to political practice Formulates practices of reflexivity Drawing together the work of many of the key scholars in the field into one volume this work will be essential reading for all students of international relations theory War in International Society Lacy Pejcinovic, 2013-04-12 Is war an institution of international society and how is it constituted as such across the evolution of international society This book is an inquiry into the purpose of war as a social institution as originally put forward by Hedley Bull It offers a comprehensive examination of what is entailed in thinking of war as a social institution and as a mechanism for order Since the terrorist attacks of 9 11 the subject of war has become increasingly relevant with questions about who can wage war against whom the way war is fought and the reasons that lead us to war exposing fundamental inadequacies in our theorisation of war War has long been considered in the discipline of International Relations in the context of the problem of order However the inclusion of war as an institution is problematic for many How can we understand an idea and practice so often associated with coercion destruction and disorder as contributing to order and coexistence This study contends that an understanding of the core elements that establish the character of war as an institution of modern international society will give us important insights into the purpose if any of war in contemporary international relations This ground breaking book will be of strong interest to students and scholars of international relations international relations theory the English school security studies and warfare **The Politics of Becoming European**

Maria Mälksoo, 2009-10-26 This book weaves together perspectives drawn from critical international relations anthropology and social theory in order to understand the Polish and Baltic post Cold War politics of becoming European Approaching the study of Europe s eastern enlargement through a post colonial critique author Maria M lksoo makes a convincing case for a rethinking of European identity Drawing on the theorist Edward Said she contends that studies of the European Union are marked by a prevailing Orientalism rarely asking who has traditionally been able to define European identity and whether this identity should be presented as an historical process rather than a static category The central argument of this book is that the historical experience of being framed as simultaneously in Europe and yet not quite in Europe informs the current self understandings and security imaginaries of Poland and the Baltic States Exploring this existential condition of liminal Europeaness among foreign and security policy making elites the book considers its effects on key security policy issues including relations with Western Europe Russia and the United States Supported by solid empirical analyses this book provides an innovative and interdisciplinary approach to the post Cold War predicament of Poland and the Baltic States It will be of interest to students and scholars of International Relations European Studies Social and Political Theory and Anthropology *The Conduct of Inquiry in International Relations* Patrick Thaddeus Jackson, 2016-03-31 The Conduct of Inquiry in International Relations first edition was winner of the ISA Northeast s Yale H Ferguson Award and the ISA Theory Section s Best Book of the Year award The Conduct of Inquiry in International Relations provides an introduction to the philosophy of science issues and their implications for the study of global politics The author draws attention to the problems

caused by the misleading notion of a single unified scientific method and proposes a framework that clarifies the variety of ways that IR scholars establish the authority and validity of their empirical claims Jackson connects philosophical considerations with concrete issues of research design within neopositivist critical realist analyticist and reflexive approaches to the study of world politics Envisioning a pluralist science for a global IR field this volume organizes the significant differences between methodological stances so as to promote internal consistency public discussion and worldly insight as the hallmarks of any scientific study of world politics In this second edition Jackson has centralised the philosophical history of the science question into a single chapter providing a clearer picture of the connections between contemporary concerns about the status of knowledge and classic philosophical debates about the relationship between human beings and the world they inhabit The central chapters feature more detailed and pedagogically useful illustrations of the methodological positions discussed making the book even better suited to clarify the philosophical distinctions with respect to which a scientific researcher must locate herself The second edition will continue to be essential reading for all students and scholars of International Relations Political Science and Philosophy of Science Emancipatory International Relations Roger D. Spegele, 2014-05-23 International relations theory is witnessing a veritable explosion of works within the areas of modernism and postmodernism yet there has been no attempt to compare these theories and their sources according to a common criterion or logical form This author argues that while these pioneering imaginative and exciting theoretical works are disparate they also share a common thread that seeks to express emancipatory goals for international relations This book provides an in depth critical study of this genre of theorizing that he names Emancipatory International Relations Spegele develops a framework to help the reader understand both the differences and commonalities in modernist and postmodernist emancipatory thinking in International Relations He critically analyzes modernist theories discourses narratives and postmodernist theory and practice feminist emancipatory discourses and postmodernist international discourse and concludes by examining the coherence viability and plausibility of emancipatory discourses in international relations whether modernist or postmodernist This challenging and innovative volume will be of interest to students and researchers of international relations Bourdieu in International Relations Rebecca Adler-Nissen, 2013 This book rethinks the key concepts of International Relations by drawing on the work of Pierre Bourdieu The last few years have seen a genuine wave of publications promoting sociology in international relations Scholars have suggested that Bourdieu s vocabulary can be applied to study security diplomacy migration and global environmental politics Yet we still lack a systematic and accessible analysis of what Bourdieu inspired IR might look like This book provides the answer It offers an introduction to Bourdieu s thinking to a wider IR audience challenges key assumptions which currently structure IR scholarship and provides an original theoretical restatement of some of the core concepts in the field The book brings together a select group of leading IR scholars who draw on both theoretical and empirical insights from Bourdieu Each chapter covers one central concept in IR

Methodology Knowledge Power Strategy Security Culture Gender Norms Sovereignty and Integration The chapters demonstrate how these concepts can be reinterpreted and used in new ways when exposed to Bourdieusian logic Challenging key pillars of IR scholarship Bourdieu in International Relations will be of interest to critical theorists and scholars of IR theory

Evaluating Progress in International Relations Annette Freyberg-Inan, Ewan Harrison, Patrick James, 2016-10-04 This edited volume offers a systematic evaluation of how knowledge is produced by scholarly research into International Relations The contributors explore three key questions To what extent is scientific progress and accumulation of knowledge possible What are the different accounts of how this process takes place And what are the dominant critiques of these understandings It is the first publication to survey the full range of perspectives available for evaluating scientific progress as well as dominant critiques of scientism In its second part the volume applies this range of perspectives to the research program on the democratic peace It shows what we gain by accommodating and enabling dialogue among the full range of epistemological approaches The contributors elaborate and defend the epistemological position of sociable pluralism as one that seeks to build bridges between soft positivism critical theory and critical realism The underlying idea is that if the differences between the various approaches used by different communities of researchers can be understood more clearly this will facilitate meaningful cross cutting communication dialogue and debate and thereby enable us to address real world problems more effectively This timely and original work will be of great interest to advanced level students and scholars dealing with philosophy of science and methodological questions in International Relations

Africa and the Expansion of International Society John Anthony Pella, Jr, 2014-08-21 This book explores the West Central African role in and experience during the expansion of international society Building upon theoretical contributions from the English School of international relations historical sociology and sociology it departs from

Euro centric assumptions by analysing how West Central Africa and West Central Africans were integral to the ways in which Europe and Africa came together from the fifteenth century through to the twentieth Initially diverse scholarship concerned with the expansion of international society is examined revealing how the process has often been understood as one dictated by Europeans From there a new approach is developed one which is better able to examine the expansion as an interactive process between individuals and which puts the African experience at the heart of study The empirical research that follows this draws upon primary sources to introduce a number of historically significant and ground breaking cases into international relations including the international relations of West Central Africa before the European arrival the emergence and growth of the trans Atlantic slave trade the attempts to civilize Africa and the scramble to colonize Africa This book argues that the expansion of international society was driven by individual interaction and was shaped by both Africans and Europeans This book will be of interest to students and scholars of international relations international relations theory history African politics the English school and constructivism Author John Anthony Pella introduces his book African and the Expansion of International Society Surrendering the Savannah [http www routledge com politics articles featured_author_john_anthony_pella](http://www.routledge.com/politics/articles/featured_author_john_anthony_pella)

Insecurity Jef Huysmans,2006-09-27 The act of violence of 9 11 changed the global security agenda catapulting terrorism to the top of the agenda Weapons of mass destruction grabbed public interest and controlling the free movement of people became a national security priority In this volume Jef Huysmans critically engages with theoretical developments in international relations and security studies to develop a conceptual framework for studying security He argues that security policies and responses do not appear out of the blue but are part of a continuous and gradual process pre structured by previous developments He examines this process of securitization and explores how an issue on the basis of the distribution and administration of fear becomes a security policy Huysmans then applies this theory to provide a detailed analysis of migration asylum and refuge in the European Union This theoretically sophisticated yet accessible volume makes an important contribution to the study of security migration and European politics World of Our Making Nicholas

Negotiation and Foreign Policy Decision Making Melania-Gabriela Ciot,2014-06-02 Foreign policy decisions are influenced by many factors The real world is complex and many variables have to be considered when making a decision A psychological approach to decision making facilitates the understanding and explaining of the complexity of foreign and global policies precisely because of the prolonged transitional stage of the contemporary international system The course of world politics is shaped by the decisions of leaders Uncertainty involved in decision making in foreign policy can relate to the

motivations beliefs intentions or calculations of the opponents If it is not possible to understand how decisions are made then maybe it is at least feasible to understand these decisions and perhaps more importantly predict various results with regards to international politics This book provides a new perspective on the study of international relations by analyzing the subjective elements idiosyncrasies that occur in decision making at the individual level The use of psychological methods of analysing the foreign policy decision making process proposes a necessary investigation path into international relations
