Roger Corman is an ambiguous artistic figure. On the one hand he is notorious for shooting and producing his films quickly cheaply and with blatant disregard for safety measures which together with his ability to issue a dozen new films every year and his impressive filmography have earned him the titles of shlockmeister and the King of the B's among film journalists. On the other hand he became the youngest American director to be given a film retrospective at the prestigious Cinéma de France in Paris. One of his directorial efforts, *House of Usher*, was selected for preservation in the National Film Registry by the Library of Congress and the Academy of Motion Picture Arts and Sciences awarded him with an Academy Honorary Award for his rich engendering of films and filmmakers. This book investigates this duality and explores whether Corman is indeed a shlockmeister or an artist whose works are worthy of the highest cinema awards. The scope of analysis is limited to his directorial efforts only, still encompassing 50 features excluding the 400 films he produced. The methodology adopted here is based on the auteur theory in its structuralist version by Geoffrey Nowell-Smith and Peter Wollen and focuses on three areas of interest: work ethic, personal elements in the films, personal control over and commitment to the production process, outside direction, themes, topics and concerns common for many of the films regardless of the genre and style, recurring stylistic motifs and elements in the camerawork, editing and framing.

Revolution in Europe, 1989 Patrick Burke, 1995. Discusses recent events in Eastern Europe focusing on the decisive year that saw the fall of Communist governments in several countries.

Richard M. Nixon Michael Schuman, 1998. Richard M. Nixon resigned early in his second term rather than face Congressional impeachment over the Watergate scandal. Controversy followed Richard Nixon. He achieved victory in his first congressional campaign by falsely accusing his opponent of being a communist and as a Freshman congressman he gained fame by pursuing suspected communists in government. He was Eisenhower's Vice President and won the Presidency in the midst of the turmoil over the war in Vietnam. Although he established relations with Communist China during his administration, a major accomplishment, he continues to be known for the Watergate break-in that destroyed his Presidency.

Best Books for Children Catherine Barr, 2006. Contains more than 25,000 titles of books recommended for children in grades K-6.

American Menswear from the Civil War to the Twenty-First Century, Second Edition Daniel Delis Hill, 2024-01-20. In a glance at American menswear over the past 150 years, change has been sometimes glacial in its evolution, sometimes regressive and nostalgic and other times abrupt and revolutionary. In this study of American menswear from the Civil War to the twenty-first century, that evolution is chronicled and documented with more than 700 illustrations. In addition to the main categories of suits, sportswear and outerwear, each era also includes a detailed examination of sleepwear, underwear, swimwear, hats, neckwear, footwear and accessories. Further, Daniel Delis Hill examines not only American men's dress and the structures of the menswear industry but also the historical and socioeconomic drivers that affected men's style, particularly the shifting conventions and iconoclasms of American ideas and ideals of masculinity.

Lyndon B. Johnson Michael Schuman, 1998. As a result of the assassination of John F. Kennedy, Lyndon B. Johnson was thrown into the presidency.

during one of the toughest times our country has ever undergone He guided the country through the Vietnam War race riots and student protestors Despite all these pressures he went on to be well respected for his stance on domestic policy

Repression and Realism in Post-War American Literature E. Mercer, 2011-05-09 This study of fiction produced in America in the decade following 1945 examines literature by writers such as Kerouac and Bellow It examines how though such fiction seemed to resolutely avoid the events and implications of World War II it was still suffused with dread and suggestions of war in imagery and language *Something about the Author* Kevin S. Hile, 1995 Series covers individuals ranging from established award winners to authors and illustrators who are just beginning their careers Entries cover personal life career writings and works in progress adaptations additional sources and photographs **Junior Worldmark Encyclopedia of the Nations** Timothy L. Gall, Susan B. Gall, 1999 **A Brief History of Human Culture in the 20th Century** Qi Xin, 2019-08-27 This book examines the cultural concepts that guided the development of the age of mankind the changes that took place in historical philosophical scientific religious literary and artistic thought in the 20th century It discusses a broad range of major topics including the spread of commercial capitalism socialist revolutions the two world wars anti colonialist national liberation movements scientific progress the clashes and fusion of Eastern and Western cultures globalization women s rights movements mass media and entertainment the age of information and the digital society The combination of cultural phenomena and theoretical descriptions ensures a unity of culture history and logic Lastly the book explores the enormous changes in lifestyles and the virtualized future revealing cultural characteristics and discussing 21st century trends in the context of information technology globalization and the digital era **The Historiography of Contemporary Science and Technology** Thomas Söderquist, 2013-01-11 More than ninety percent of all scientific history has been made during the last half century So far however only a fraction of historical scholarship has dealt with this period Merely a decade ago most scientific historians considered recent science the scientific culture created lived and remembered by contemporary scientists an area of study best left to the historical actors themselves **Transforming the Screen, 1950-1959** Peter Lev, 2003 Covering a tumultuous period of the 1950s this work explores the divorce of movie studios from their theater chains the panic of the blacklist era the explosive emergence of science fiction as the dominant genre and the rise of television and Hollywood s response with widescreen spectacles **The Spectre of Defeat in Post-War British and US Literature** David Owen, Cristina Pividori, 2021-01-22 It is a commonplace belief that history is written by the victorious However less recognised but equally common is the idea that the defeated also write history even if their particular account is rather different This collection looks at these matters from a novel and distinct perspective It essentially presents the idea that victors often perceive themselves as defeated by examining the ways in which the idea of defeat comes to dominate the victors own sense of superiority and achievement thereby undermining the certainties that victory is conventionally thought to create The contributions here discuss fiction mostly UK and US published since the First World War Through the

frameworks of experience memory and post memory they examine this subliminal defeat basically as seen in conflict itself in the societies that it affects and in the individual lives of those who it destroys The result is an innovative literary account of the victorious yet somehow defeated Cold War Kitchen Ruth Oldenziel, Karin Zachmann, 2011-01-21 The kitchen as political symbol and material reality in the cold war years Richard Nixon and Nikita Khrushchev's famous kitchen debate in 1958 involved more than the virtues of American appliances Both Nixon and Khrushchev recognized the political symbolism of the modern kitchen the kind of technological innovation represented in this everyday context spoke to the political system that produced it The kitchen connects the big politics of politicians and statesmen to the small politics of users and interest groups Cold War Kitchen looks at the kitchen as material object and symbol considering the politics and the practices of one of the most famous technological icons of the twentieth century Defining the kitchen as a complex technological artifact as important as computers cars and nuclear missiles the book examines the ways in which a range of social actors in Europe shaped the kitchen as both ideological construct and material practice These actors from manufacturers and modernist architects to housing reformers and feminists constructed and domesticated the technological innovations of the postwar kitchen The home became a mediation junction in which women users and others felt free to advise producers from the consumer's point of view In essays illustrated by striking period photographs the contributors to Cold War Kitchen consider such topics as Soviet consumers ambivalent responses to the American dream kitchen argued over by Nixon and Khrushchev the Frankfurter Küche a European modernist kitchen of the interwar period and its export to Turkey when its designer fled the Nazis and the British state subsidized kitchen design so innovative that it was mistaken for a luxury American product The concluding essays challenge the received wisdom of past interpretations of the kitchen debate
