Quintana Roo Archaeology Justine M. Shaw, Jennifer P. Mathews, 2005-11 Mexico's southern state of Quintana Roo is often perceived by archaeologists as a blank spot on the map of the Maya world a region generally assumed to hold little of interest thanks to its relative isolation from the rest of Mexico But salvage archaeology required by recent development along the Maya Riviera along with a suite of other ongoing and recent research projects have shown that the region was critical in connecting coastal and inland zones and it is now viewed as an important area in its own right from Preclassic through post contact times The first volume devoted to the archaeology of Quintana Roo this book reveals a long tradition of exploration and discovery in the region and an increasingly rich recent history of study Covering a time span from the Formative period through the early twentieth century it offers a sampling of recent and ongoing research by Mexican North American and European archaeologists Each of the chapters helps to integrate sites within and beyond the borders of the modern state inviting readers to consider Quintana Roo as part of an interacting Maya world whose boundaries were entirely different from today's In taking in the range of the region the authors consider studies in the northern part of the state resulting from modern development around Cancun the mid state sites of Muyil and Yucop both of which witnessed continual occupations from the Middle Preclassic through the Postclassic and new data from such southern sites as Cerros Lagartera and Chichmuul The contributions consider such subjects as ceramic controversies settlement shifts site planning strategies epigraphic and iconographic materials the impact of recent coastal development and the interplay between ancient historic and modern use of the region Many of the chapters confirm the region as a cultural corridor between Cob and the southern lowland centers and address demographic shifts of the Terminal Classic through Postclassic periods while others help elucidate some of Peter Harrison's Uaymil Survey work of the 1970s Quintana Roo Archaeology unfolds a rich archaeological record spanning 2 500 years depicting the depth and breadth of modern archaeological studies within the state It is an important touchstone for Maya and Mesoamerican archaeologists demonstrating the shifting web of connections between Quintanarooense sites and their neighbors and confirming the need to integrate this region into a broader understanding of the ancient Maya

Mexican North American and European archaeologists Each of the chapters helps to integrate sites within and beyond the borders of the modern state inviting readers to consider Quintana Roo as part of an interacting Maya world whose boundaries were entirely different from today's In taking in the range of the region the authors consider studies in the northern part of the state resulting from modern development around Cancun the mid state sites of Muyil and Yucokop both of which witnessed continual occupations from the Middle Preclassic through the Postclassic and new data from such southern sites as Cerros Lagartera and Chichmuul The contributions consider such subjects as ceramic controversies settlement shifts site planning strategies epigraphic and iconographic materials the impact of recent coastal development and the interplay between ancient historic and modern use of the region Many of the chapters confirm the region as a cultural corridor between Cob and the southern lowland centers and address demographic shifts of the Terminal Classic through Postclassic periods while others help elucidate some of Peter Harrison's Uaymil Survey work of the 1970s Quintana Roo Archaeology unfolds a rich archaeological record spanning 2 500 years depicting the depth and breadth of modern archaeological studies within the state It is an important touchstone for Maya and Mesoamerican archaeologists demonstrating the shifting web of connections between Quintanarooense sites and their neighbors and confirming the need to integrate this region into a broader understanding of the ancient Maya

Andrews, Anthony P. Andrews, 1975 The Maya of the Cochuah Region Justine M. Shaw, 2015-12 This book the first major collection of data from the Cochuah region investigations presents and analyzes findings on more than eighty sites and puts them in the context of the findings of other investigations from outside the area The Ancient Maya of Mexico Geoffrey E.

Braswell, 2014-10-14 The archaeological sites of Mexico's Yucatan peninsula are among the most visited ancient cities of the Americas Archaeologists have recently made great advances in our understanding of the social and political milieu of the northern Maya lowlands However such advances have been under represented in both scholarly and popular literature until now The Ancient Maya of Mexico presents the results of new and important archaeological epigraphic and art historical research in the Mexican states of Yucatan Campeche and Quintana Roo Ranging across the Middle Preclassic to the Modern periods the volume explores how new archaeological data has transformed our understanding of Maya history The Ancient Maya of Mexico will be invaluable to students and scholars of archaeology and anthropology and all those interested in the society rituals and economic organisation of the Maya region *The Archaeology of Muyil, Quintana Roo, Mexico* Walter

Robert Thurmond Witschey, 1992 The Archaeology of Maritime Landscapes Ben Ford, 2011-05-21 Maritime cultural landscapes are collections of submerged archaeological sites or combinations of terrestrial and submerged sites that reflect the relationship between humans and the water These landscapes can range in size from a single beach to an entire coastline and can include areas of terrestrial sites now inundated as well as underwater sites that are now desiccated However what

binds all of these sites together is the premise that each aspect of the landscape cultural political environmental technological and physical is interrelated and can not be understood without reference to the others In this maritime cultural landscape approach individual sites are treated as features within the larger landscape and the interpretation of single sites add to a larger analysis of a region or culture This approach provides physical and theoretical links between terrestrial and underwater archaeology as well as prehistoric and historic archaeology consequently providing a framework for integrating such diverse topics as trade resource procurement habitation industrial production and warfare into a holistic study of the past Landscape studies foster broader perspectives and approaches extending the study of maritime cultures beyond the shoreline Despite this potential the archaeological study of maritime landscapes is a relatively untried approach with many questions regarding the methods and perspectives needed to effectively analyze these landscapes The chapters in this volume which include contributions from the United States the United Kingdom Norway and Australia address many of the theoretical and methodological questions surrounding maritime cultural landscapes The authors comprise established scholars as well as archaeologists at the beginning of their careers providing a healthy balance of experience and innovation The chapters also demonstrate parity between method and theory where the varying interpretations of culture and space are given equal weight with the challenges of investigating both wet and dry sites across large areas

Heritage Or Heresy Cameron Jean Walker, 2009-01-08 How can we effectively interpret and present one culture to another without stereotypes or over simplifications What is the best way to present an authoritative version of a national heritage without also endangering ancient sites or being insensitive to the local customs beliefs and religious practices of the indigenous peoples This volume addresses the ongoing thrust in archaeology to take the next step after preserving the past interpreting that past for the future That future audience includes both local citizens and tourists who may have little background in archaeology anthropology or the history of the culture featured Walker presents the key components of the anthropological study of tourism as a global phenomenon with particular emphasis on the more prominent arguments for how and why tourism is a universal and meaningful human activity The highly controversial topic of authenticity is examined with special attention given to how authentic has been defined and how it relates to the ways in which archaeological sites artifacts and cultural traditions are presented or not presented to the visiting public The ephemeral promise of authenticity drives the heritage tourism industry which is a key consideration for the long term economy of the Maya Riviera and elsewhere Through analysis of seven archaeological sites on the Yucatan peninsula that are open to heritage touring Walker reveals the planned growth of the Maya Riviera since the early 1970s and examines the impact of international tourism on both ancient structures and the contemporary Maya people and culture

Archaeology and Tourism Dallen J. Timothy, Lina G. Tahan, 2020-06-10 This book provides a global and thematic examination of the

relationships between archaeology and tourism and a critical analysis of thinking in the area of archaeology based tourism. It focuses on the differences and similarities between archaeology based tourism and heritage tourism and highlights the interdependence and dissonance between tourism and archaeology and archaeological traditions. It is a key academic resource for students, researchers and practitioners in tourism, archaeology, cultural heritage management and anthropology.

ARCHITECTURE, ARCHAEOLOGY AND CONTEMPORARY CITY PLANNING - Proceedings of the workshop Giorgio Verdiani, Per Cornell, 2015. The Archaeology of Yucatán: New Directions and Data Travis W. Stanton, 2014-10-10. This volume was conceived to provide a forum for Mexican and foreign scholars to publish new data and interpretations on the archaeology of the northern Maya lowlands, specifically the State of Yucatán.

Archaeology and Economic Development Paul Burtenshaw, 2017-12-02. Nowhere in archaeology is the gap between theory and practice more evident than in its ambivalent engagement with economic development. This groundbreaking volume assembles practicing archaeologists, economists and NGO officials in an extensive exploration of the theoretical, practical and ethical issues raised by archaeologists' use of cultural heritage to support economic development. The first chapters consider the problem of articulating the value of tangible and intangible heritage when economic measures alone are inadequate. Subsequent chapters present regional perspectives on archaeology and development and present a host of case studies from around the globe that describe archaeologists' development projects, including some that are successful and others that are less so. These studies both suggest best practices in the implementation of development projects and illuminate the obstacles to success created by political conflict and competing human needs. Ethical issues and practical considerations converge in chapters that explore the role that members of local communities should play in the design, management and governance of archaeological and heritage resources. In this volume, archaeologists and heritage professionals will encounter a thought-provoking international discourse concerning the path forward for archaeology as the field engages with economic development.

Maya Archaeology and Ethnohistory Norman Hammond, Gordon R. Willey, 2014-04-15. Embracing a wide range of research, this book offers various views on the intellectual history of Maya archaeology and ethnohistory and the processes operating in the rise and fall of Maya civilization. The fourteen studies were selected from those presented at the Second Cambridge Symposium on Recent Research in Mesoamerican Archaeology and are presented in three major sections. The first of these deals with the application of theory, both anthropological and historical, to the great civilization of the Classic Maya which flourished in the Yucatán, Guatemala and Belize during the first millennium A.D. The structural remains of the Classic Period have impressed travelers and archaeologists for over a century, and aspects of the development and decline of this strange and brilliant tropical forest culture are examined here in the light of archaeological research. The second section presents the results of field research

ranging from the Highlands of Mexico east to Honduras and north into the Lowland heart of Maya civilization and iconographic study of excavated material The third section covers the ethnohistoric approach to archaeology the conjunction of material and documentary evidence Early European documents are used to illuminate historic Maya culture This section includes transcriptions of previously unpublished archival material Although not formally linked beyond their common field of inquiry the essays here offer a conspectus of late twentieth century Maya research and a series of case histories of the work of some of the leading scholars in the field

Bioarchaeology of Pre-Columbian Mesoamerica Cathy Willermet, Andrea Cucina, 2018-09-03 This volume offers a novel interdisciplinary view of the migration mobility ethnicity and social identities of pre Columbian Mesoamerican peoples In studies that combine bioarchaeology ethnohistory isotope data and dental morphology contributors demonstrate the challenges and rewards of such integrative work when applied to large regional questions of population history The essays in this volume are the results of fieldwork in Honduras Belize and a variety of sites in Mexico One chapter uses dental health data and burial rituals to investigate the social status of sacrificial victims during the Late Classic period Another analyzes skeletal remains from multiple research perspectives to explore the immigrant makeup of the multiethnic city of Copan Contributors also use strontium and oxygen isotope data from tooth enamel and dental morphological traits to test hypotheses about migration and they incorporate ethnohistorical sources in an examination of ancient Maya understandings of belonging and otherness Revealing how complementary fields of study can together create a better understanding of the complex forces that impact population movements this volume provides an inspiring picture of the exciting collaborative work currently under way among researchers in the region A volume in the series *Bioarchaeological Interpretations of the Human Past Local Regional and Global Perspectives* edited by Clark Spencer Larsen

Archaeology Matters Jeremy A Sabloff, 2016-06-16 Archaeology is perceived to study the people of long ago and far away How could archaeology matter in the modern world Well known archaeologist Jeremy Sabloff points to ways in which archaeology might be important to the understanding and amelioration of contemporary problems Though archaeologists

have commonly been associated with efforts to uncover cultural identity to restore the past of underrepresented peoples and to preserve historical sites their knowledge and skills can be used in many other ways Archaeologists help Peruvian farmers increase crop yields aid city planners in reducing landfills and guide local communities in tourism development and water management This brief volume aimed at students and other prospective archaeologists challenges the field to go beyond merely understanding the past and actively engage in making a difference in the today s world Chicle Jennifer P.

Mathews,2009-06-15 Although Juicy Fruit gum was introduced to North Americans in 1893 Native Americans in Mesoamerica were chewing gum thousands of years earlier And although in the last decade biographies have been devoted to salt spices chocolate coffee and other staples of modern life until now there has never been a full history of chewing gum Chicle is a history in four acts all of them focused on the sticky white substance that seeps from the sapodilla tree when its bark is cut First Jennifer Mathews recounts the story of chicle and its earliest known adherents the Maya and Aztecs Second with the assistance of botanist Gillian Schultz Mathews examines the sapodilla tree itself an extraordinarily hardy plant that is native only to Mesoamerica and the Caribbean Third Mathews presents the fascinating story of the chicle and chewing gum industry over the last hundred plus years a tale like so many twentieth century tales of greed growth and collapse In closing Mathews considers the plight of the chicleros the extractors who often work by themselves tapping trees deep in the forests and how they have emerged as icons of local pop culture portrayed as fearless hard drinking brawlers people to be respected as well as feared Before Dentyne and Chiclets before bubble gum comic strips and the Doublemint twins there was gum oozing from jungle trees like melting candle wax under the slash of a machete Chicle tells us everything that happened next It is a spellbinding story **Lifeways in the Northern Maya Lowlands** Jennifer P. Mathews,Bethany A.

Morrison,2006 The flat dry reaches of the northern Yucat n Peninsula have been largely ignored by archaeologists drawn to the more illustrious sites of the south This book is the first volume to focus entirely on the northern Maya lowlands presenting a broad cross section of current research projects in the region by both established and up and coming scholars To address the heretofore unrecognized importance of the northern lowlands in Maya prehistory the contributors cover key topics relevant to Maya studies the environmental and historical significance of the region the archaeology of both large and small sites the development of agriculture resource management ancient politics and long distance interaction among sites As a volume in the series Native Peoples of the Americas it adds a human dimension to archaeological findings by incorporating modern ethnographic data By exploring various social and political levels of Maya society through a broad expanse of time Lifeways in the Northern Maya Lowlands not only reconstructs a little known past it also suggests the broad implications of archaeology for related studies of tourism household economies and ethno archaeology It is a benchmark work that pointedly demonstrates the need for researchers in both north and south to ignore modern geographic boundaries in their search for new ideas to further their understanding of the ancient Maya
