Rabies Control In Asia fourth International Symposium On Rabies Control In Asia

**International Symposium on Rabies (1,
1965, Talloires)**

Rabies Control In Asia **fourth International Symposium On Rabies Control In Asia:**

Dogs, Zoonoses and Public Health Calum N. L. Macpherson, 2012-01-01 Zoonotic diseases constitute a public health problem throughout the world Addressing a little studied area of veterinary and medical science this book covers the viruses bacteria and protozoan and helminth parasites that are transmitted between man and dogs discussing population management control disease agents and human dog relationships Fully updated throughout this new edition also includes two new chapters on benefits of the human dog relationship and non infectious disease issues with dogs It is a valuable resource for researchers and students of veterinary and human medicine mi

Infections of the Central Nervous System W. Michael Scheld, Richard J. Whitley, Christina M. Marra, 2004 The gold standard clinical reference on central nervous system infections is now in its thoroughly revised updated Third Edition More than 70 leading experts provide comprehensive current information on all infections both neural specific and systemic that involve the central nervous system This edition includes new information on botulinum toxin as a biological weapon and a therapeutic agent neurologic effects of viruses causing hemorrhagic fevers and infections that have recently become more prevalent or been found in new geographic locations The updated coverage of therapeutics includes AIDS HIV medications and other antiviral drugs new antifungal medications and vaccinations against Lyme disease and bacterial meningitis *Livres hebdo*, 2001

Proceedings of the Symposium on Rabies Control in Asia Symposium sur la prophylaxie de la rage en Asie, 1994

Rabies Control in Asia Betty Dodet, François-Xavier Meslin, 2001 *Fourth International Symposium on Rabies Control in Asia* World Health Organization, 2001 **One Health for Dog-Mediated Rabies Elimination in Asia** Vanessa Slack, Deborah Nadal, Sandul Yasobant, Florence Cliquet, Waqas Ahmad, Nihal Pushpakumara, Sumon Ghosh, 2023-07 Although an effective human rabies vaccine has existed since 1885 rabies continues to kill an estimated 59 000 people every year Sixty percent of these human deaths occur in Asia The number of animals especially dogs who die of rabies is uncalculated To work towards the global target of eliminating dog mediated human rabies deaths the rabies community is applying the One Health approach by jointly focusing on humans and dogs Written by a multidisciplinary group of scholars and rabies control program specialists this book is a collection of experiences and observations on the challenges and successes along the path to rabies control and prevention in Asia The book grounds chapters in solid scientific theory but retains a direct practice focused and inspirational approach provides numerous examples of lessons learned and experience based knowledge gained across countries at different levels of rabies elimination brings together and highlights the practices of a strong international rabies network that operates according to the One Health concept Covering perspectives from almost a dozen Asian countries and a wide range of sectors and disciplines such as healthcare facilities veterinary services laboratories public health institutes wildlife research centers and academia this book is an invaluable resource for rabies practitioners and scholars but also those working in the wider fields of disease control and cross sectoral One Health **Report of the 3rd**

International Symposium on Rabies in Asia, 1996 The objectives of the Symposium were to strengthen national rabies surveillance and control activities in Asian countries through improving diagnosis post exposure treatment of human beings dog immunization and to inform participants on recent and future developments in the rabies field P 1 **WHO Expert Consultation on Rabies** World Health Organization, 2018-08-31 The WHO Expert Consultation on Rabies met in Bangkok Thailand on 26 28 April 2017 Page 1 **Rabies Control in Asia** International Symposium on Rabies Control in Asia (3, 1996, Wuhan, China), 1997 *Report of the Symposium on Rabies Control in Asian Countries*, 1993 **Report of the Workshop on Rabies Control in Asian Countries** Assemblée mondiale de la santé, Kovalenko all-union institute of experimental veterinary medicine (URSS), Fondation Mérieux, 1990 Rabies in Man and Animals Sudhi Ranjan Garg, 2013-10-23 Rabies is the deadliest zoonotic disease that threatens humans and animals on all continents except Antarctica Asia and Africa are worst affected as more than 95 per cent of rabies associated human deaths occur in these regions India alone bears about 36 per cent of the global human rabies burden Dogs are the main transmitters of rabies that potentially threaten over 3 billion people in Asia and Africa Many developed nations have been able to successfully control dog rabies but continue to face the risk from wildlife including bats Bat rabies is responsible for most human rabies deaths in the United States of America and Canada but has emerged as a public health threat in Australia Latin America and Western Europe as well Despite being vaccine preventable rabies continues to haunt the mankind Poor resources is a major constraint but the factors like low priority attributed to rabies misconceptions in the community about the disease and unsystematic approach for its prevention and control are also responsible for the grim situation Targets have been set for elimination of human and dog rabies in all Latin American countries by 2015 and of human rabies transmitted by dogs in South East Asia by 2020 However the myths prevailing among the people together with inadequate knowledge of the health professionals veterinarians and the civic body staff about the rabies prevention and control strategies might make the task very difficult This book comprising eight chapters elaborates the causation of rabies in man and animals its global epidemiology risk analysis and effective strategies for the management of exposures Proven methods of rabies prevention and control have been discussed in length along with the challenges and ways to overcome the constraints through intersectoral coordination The inclusion of 200 frequently asked questions is a unique feature of the book which may help not only the common people and pet lovers in clearing their doubts about rabies in man and animals also be equally instrumental in updating the knowledge and skills of the public health personnel veterinarians and other professionals Apt illustrations and simple language make the contents of the book easily comprehensible and a reading pleasure **Fourth Annual International Meeting On: Advances Towards Rabies Control in the Americas** International Meeting on Advances towards Rabies Control in the Americas, 1993 **Symposium on Rabies Control Through Vaccination of Wildlife Species** New York State Task Force on Wildlife Rabies Vaccination, 1994 **Towards the Elimination of Rabies in Eurasia** Betty

Dodet, European Union, 2008 This volume presents the proceedings of the second conference on rabies organized by the World Organisation for Animal Health in collaboration with the World Health Organization and the European Union in May 2007 Up to date information on rabies epidemiology in humans and animals throughout Europe The Middle East and Asia and the most recent data on rabies virus and its structure as well as the basic mechanisms of rabies infection are included here Experts in the field present their experience and opinions on the prevention and control of rabies in dogs wildlife including bats and the most recent developments in rabies prevention and management in humans Further presentations address advances in technology diagnosis and vaccine development To conclude resolutions and recommendations are given in English French and Russian for the elimination of rabies not only in Europe and Asia but also the rest of the world This book is highly valuable to regulatory veterinary services public health services medical and veterinary practitioners scientists and researchers interested in combating this neglected disease which kills more than 50 000 persons annually mainly children Rabies elimination is at hand through a One Health strategic collaboration between veterinary and human health authorities political will and community involvement and application of the knowledge gained from this volume **WHO Expert**

Consultation on Rabies World Health Organization, 2013 Although there is debate about the estimated health burden of rabies the estimates of direct mortality and the DALYs due to rabies are among the highest of the neglected tropical diseases Poor surveillance underreporting in many developing countries frequent misdiagnosis of rabies and an absence of coordination among all the sectors involved are likely to lead to underestimation of the scale of the disease It is clear however that rabies disproportionately affects poor rural communities and particularly children Most of the expenditure for post exposure prophylaxis is borne by those who can least afford it As a result of growing dog and human populations the burden of human deaths from rabies and the economic costs will continue to escalate in the absence of concerted efforts and investment for control Since the first WHO Expert Consultation on Rabies in 2004 WHO and its network of collaborating centres on rabies specialized national institutions members of the WHO Expert Advisory Panel on Rabies and partners such as the Gates Foundation the Global Alliance for Rabies Control and the Partnership for Rabies Prevention have been advocating the feasibility of rabies elimination regionally and globally and promoting research into sustainable cost effective strategies Those joint efforts have begun to break the cycle of rabies neglect and rabies is becoming recognized as a priority for investment This Consultation concluded that human dog transmitted rabies is readily amenable to control regional elimination in the medium term and even global elimination in the long term A resolution on major neglected tropical diseases including rabies prepared for submission to the World Health Assembly in May 2013 aims at securing Member States commitment to the control elimination or eradication of these diseases Endorsement of the resolution would open the door for exciting advances in rabies prevention and control Publisher's description **Strategic Framework for Elimination of Human Rabies Transmitted by Dogs in the South-East Asia Region** Searo, 2014-12-05 Dog bites are

the primary source of human infection in rabies endemic countries and account for 96% of rabies cases in the South East Asia Region Elimination of human rabies is dependent on elimination of dog rabies Some countries have a comprehensive rabies control program but it is a neglected area in others New innovative tools and techniques have been developed in recent years to improve dog vaccination coverage dog population management and accessibility of modern rabies vaccines Considering the importance of consolidating achievements in rabies control in Member countries the WHO Regional Office for South East Asia has developed a regional strategy for elimination of human rabies transmitted by dogs in the Region The strategy aims to eliminate human rabies through progressive control of dog rabies and human rabies prophylaxis in rabies endemic countries and to maintain the rabies free status in rabies free areas of the South East Asia Region by 2020
