Race & Equity in Higher Education American Council on Education, 1982 College in Black and White Walter R. Allen, Edgar G. Epps, Nesha Z. Haniff, 1991-07-03 This book reports findings from the National Study of Black College Students a comprehensive study of Black college students characteristics experiences and achievements as related to student background institutional context and interpersonal relationships Over 4 000 undergraduates and graduate professional students on sixteen campuses eight historically Black and eight predominantly White participated in this mail survey Using these and other data this book systematically examines the current state of Black students in U S higher education Until now our understanding has been limited by inadequate data misguided theories and failure to properly interpret the Black American reality This volume challenges our assumptions and contributes to the growing body of knowledge about Black student experiences and outcomes in higher education *The Challenge to Racial Stratification* Matthew Holden, Jr., 1994-01-01 The National Political Science Review is the official publication of the National Conference of Black Political Scientists This series now entering its fourth volume includes significant scholarly research reflecting the diverse interests of scholars from various backgrounds who use different models approaches and methodologies The central focus is on politics and policies that advantage or disadvantage groups because of race ethnicity gender and other major variables In his introduction to this volume Matthew Holden describes the rationale for the creation of American racial stratification and boldly shows how American intellectuals have helped reinforce that stratification Several chapters discuss conflicts in contemporary views of the United States ranging from a belief in its being a free society to the historical reality of the nation s background as a slave society Other chapters address the international problem of racial stratification concentrating on Nigeria and South Africa A Policy Analysis of Access to Higher Education in the Original Adams States for Black Undergraduate Students Teresa Dianne Drummond, 1994 **Collective Bargaining in Higher Education and the Professions** , 1985 ICEG2006-Proceedings of the 6th International Conference on e-Government , *Resources in Education* , 2001-04 **Bibliographic Guide to Conference Publications** New York Public Library. Research Libraries, 1984 Vols for 1975 include publications cataloged by the Research Libraries of the New York Public Library with additional entries from the Library of Congress MARC tapes **Undermining Racial Justice** Matthew Johnson, 2020-04-15 Over the last sixty years administrators on college campuses nationwide have responded to black campus activists by making racial inclusion and inequality compatible This bold argument is at the center of Matthew Johnson s powerful and controversial book Focusing on the University of Michigan often a key talking point in national debates about racial justice thanks to the contentious Gratz v Bollinger 2003 Supreme Court case Johnson argues that UM leaders incorporated black student dissent selectively into the institution s policies practices and values This strategy was used to prevent activism from disrupting the institutional priorities that campus leaders deemed more important than racial justice Despite knowing that

racial disparities would likely continue Johnson demonstrates that these administrators improbably saw themselves as champions of racial equity What Johnson contends in *Undermining Racial Justice* is not that good intentions resulted in unforeseen negative consequences but that the people who created and maintained racial inequities at premier institutions of higher education across the United States firmly believed they had good intentions in spite of all the evidence to the contrary The case of the University of Michigan fits into a broader pattern at elite colleges and universities and is a cautionary tale for all in higher education As Matthew Johnson illustrates inclusion has always been a secondary priority and as a result the policies of the late 1970s and 1980s ushered in a new and enduring era of racial retrenchment on campuses nationwide

Higher Education ,2023-11-02 COVID wrought havoc on the world s economic systems Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems Some institutions were prepared for the required transition to online learning Most were not Whether prepared or not educators rose to the challenge The innovativeness of educators met the challenges as digital learning replaced the face to face environment In fact some of the distance models proved so engaging that many students no longer desire a return to the face to face model As with all transitions some things were lost while others were gained This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century The book is organized into four sections on Perils and Promises The State of Online Education Goals and Challenges of Online Learning and Innovations in the Age of COVID It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process These discussions shed light on the impact of the pandemic and the future of higher education post COVID Higher education has been forever changed and higher education as it once was may never return While many questions arise the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic

This edited collection brings together essays that explore personal debts to government. Intensive collection efforts by governments in need of revenue often cause hardship whether it is the poor in the United States going to jail because of unpaid fines, low income English people being evicted because they paid their council taxes but could then not pay their rent, or poor former students having tax refunds or social benefits taken by the government when they have defaulted on their student loans. Student loans, fines and fees arising from the justice system, benefit overpayments and unpaid taxes have all ballooned in the past decade but no other volume comprehensively addresses the various ways in which governments have become privileged creditors using their power to collect debts owed to them by their citizens. With each essay emphasizing a particular kind of debt to government, the book focuses on what happens when citizens cannot pay the debts they owe to their governments. Contributors offer pragmatic options to facilitate a movement to soften the stance of governments toward those who owe them money. The insights in this collection will be of relevance to students and academics in criminology, sociology, public policy and economics as well as policymakers and government officials interested in effecting change in this area.
