

# Visualizing America's Population By Race

The United States is a unique mosaic of cultural diversity—almost 40% of its people belong to racial or ethnic minorities.

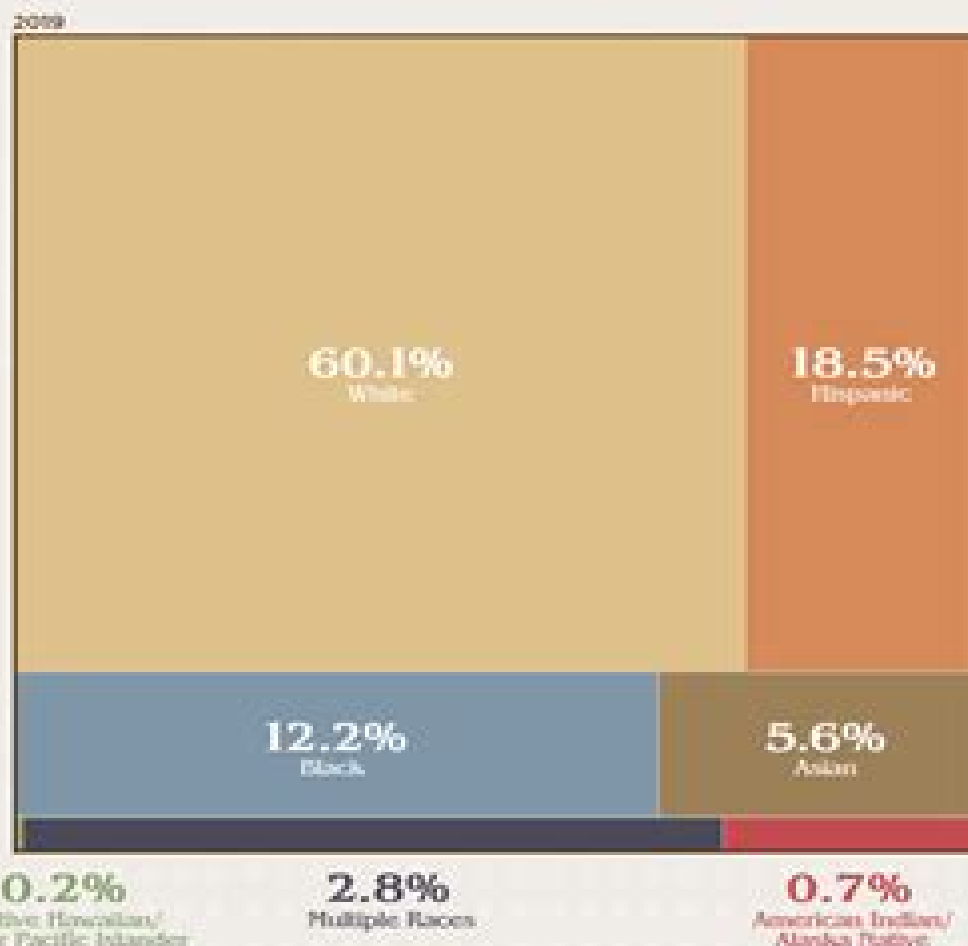

Here, we visualize the breakdown of the U.S. population in 2019, and how this will change over time.

Over time, the share of white populations is expected to decline to less than half (44%) of all Americans after 2045.

The proportion of those with multiple racial backgrounds will more than double by 2060.

Note: U.S. totals exclude Puerto Rico

Sociology and the Race Problem James B. McKee,1993 Tracing developments in the sociology of race relations from the 1920s to the 1960s McKee maintains that sociologists assumed the United States would move unimpeded toward modernization and assimilation aided by industrialization and urbanization The fatal flaw in their perspective was the notion that blacks were culturally inferior backward and pre modern a people who had lost their own culture and couldn t grasp that of their new society Designed to detail a failure the author says is widely acknowledged but little examined this book will be of interest to both specialists and general readers Masterful McKee transports the reader back to the intellectual world in which the early sociologists worked and does not simply treat them as evil racists His approach is informed by the sociology of knowledge Lewis M Killian author of The Impossible Revolution Phase 2 Black Power and the American Dream
