Race Class And Political Consciousness:

Race, Class, and Political Consciousness Stanislaw Saks, 1972 *Race, Class, and Political Consciousness* John C. Leggett, 1972 *Race, Class, and Political Consciousness* John C. Leggett, 1972 *The Oxford Handbook of Global South Youth Studies* Sharlene Swartz, Adam Cooper, Clarence Batan, Laura Kropff Causa, 2021

The Oxford Handbook of Global South Youth Studies offers a contribution from Southern scholars to remake Youth Studies from its current state that universalises Northern perspectives into a truly Global Youth Studies. It foregrounds Southern youth's life worlds and realigns theory with contemporary youth practices into a more just and egalitarian epistepaxis.

Race, Class, and Power Leo Kuper, 2017-07-05

Examining in detail the apparently inexorable polarization of society in such countries as Rwanda, Algeria, and South Africa, the author questions whether current theories correctly explain the past or offer adequate guides for the future. In their place, he puts forward an alternative neo-Durkheimian view of the possibility of non-violent revolutionary change based on the development of such social and cultural continuities as already exist within each plural society. But he warns that this is an age of passionate commitment to violence in which vicarious killers abound in search of a Vietnam of their own. The aim of this groundbreaking and challenging book is to create theoretical perspectives in which to view the racial conflict of plural societies. Written in the turbulent early 1970s, the book demonstrates the inadequacy of then prevailing views such as Marxist interpretations of racial conflict as class struggle and the Fanon a priori rejection of non-violent techniques of change which Kuper holds responsible for the acceptance of what he calls the platitudes of violence. The book concludes with more personal sections focusing on the author's struggles with the then prevailing South African society, critiques of that and censorship of his attempts to make these public. In the light of subsequent changes in South Africa many decades later, this book serves not only as an important work of political sociology but as a personal testament to the fight against racism in South Africa. Leo Kuper was professor of sociology and director of the African Studies Center at the University of California Los Angeles. A South African by birth, he was one of the first writers on genocide as well as other aspects of African studies and urban sociology. His major book *Genocide* (Penguin 1981) remains in print. The Leo Kuper Foundation is a non-governmental organization dedicated to the eradication of genocide through research, advice, and education. It was created in Washington DC in 1994 following the death of Leo Kuper with the aim of improving measures to prevent genocide. The main area of work for the past five years has been in support of the creation of an International Criminal Court. Troy Duster is director at the Institute for the History of the Production of Knowledge, New York University.

Labor and Capital in the Age of Globalization Berch Berberoglu, 2002

Ten contributions from scholars and activists discuss the political economy of the labor process in the age of global capitalism, examining how the global economy affects ordinary people in the workplace. Topics include, for example, the struggle for control at the point of production, the division of labor along racial lines in U.S. agriculture, and women and resistance in the transnational labor force. Editor: Berberoglu.

From Black Power to Hip Hop Patricia Hill Collins, 2006-01-19 A provocative analysis of the new contours of black nationalism and feminism in America We Are Not What We Seem Roderick D. Bush, 2000

Black Political Thought in the Making of South African Democracy C.R.D. Halisi, 1999 a comprehensive analytical survey of the multidimensional evolution of black political thought in South Africa s politicization process Choice Many citizens experience a sense of reluctance to share a single national identity with all of those who are defined by law to be their compatriots This problem can be explained and surmounted but it cannot be evaded by those who aspire to build a stable democracy in South Africa Richard L Sklar from the Foreword What will it mean to be a citizen in the new South Africa This penetrating study analyzes the issues of dual citizenship black consciousness populism racial proletarianization and their interaction with various political ideologies Halisi s analysis has practical implications for the development of political identity in the new South Africa

The American Working Class Irving Louis Horowitz, John Carl Leggett, Martin Oppenheimer, 1979-01-01 The study of continuities and discontinuities in American working class life represents a central concern in the literature on stratification and equality This book based on a 1975 Ford Foundation conference and updated to take into account the most recent developments offers a sobering appraisal of the American working class revealing the continuing gap between organized and unorganized workers despite the huge increase in the work force the emergence of subclass structures between factory workers at one end and workers engaged in marginal occupations at the other and the durability of pluralistic multiclass politics within this large and amorphous working class The volume is unique for several reasons it focuses directly on the role of women in the labor force ethnic and racial divisions within the working class and the place of organized labor in international affairs The American Working Class Today offers a penetrating and wide ranging examination by leading social and political researchers of a range of problems from how data are collected and manipulated to what the future holds for American workers Contents and Contributors THE THEORY OF AN AMERICAN WORKING CLASS John H M Laslett S M Miller Martha Bush Irving Louis Horowitz CLEAVAGES AND

Crotty, 1991 In this volume the study of legislatures has traditionally been a central preoccupation of political scientists Legislatures provide good laboratories for testing theories and methodologies of significance in the discipline and more broadly for contributing to an understanding of how representative government works Oppositional Consciousness Jane J. Mansbridge, Aldon Morris, 2001-10-30 How can human beings be induced to sacrifice their lives even one minute of their lives for the sake of their group This question central to understanding the dynamics of social movements is at the heart of this collection of original essays The book is the first to conceptualize and illustrate the complex patterns of negotiation struggle borrowing and crafting that characterize what the editors term oppositional consciousness an empowering mental state that prepares members of an oppressed group to undermine reform or overthrow a dominant system Each essay employs a recent historical case to demonstrate how oppositional consciousness actually worked in the experience of a subordinate group Based on participant observation and interviews chapters focus on the successful social movements of groups such as African Americans people with disabilities sexually harassed women Chicano workers and AIDS activists Ultimately Oppositional Consciousness sheds new light on the intricate mechanisms that drive the important social movements of our time Contributors Naomi Braine Sharon Groch Fredrick C Harris Jane Mansbridge Anna Maria Marshall Aldon Morris Marc Simon Rodriguez Brett C Stockdill Lori G Waite

Political Learning in Adulthood Roberta S. Sigel, 1989 In the wake of World War II the issues of political stability in general and the survival of stable democracies in particular captured the attention of American political scientists An inevitable offshoot of this interest was the study of political behavior how it is acquired and how and why it persists In its early stages work on political socialization focused exclusively on childhood and adolescence as if the learning process ends when adulthood begins Only recently has adult socialization emerged as a legitimate field of study within political science In Political Learning in Adulthood social scientists for the first time examine the changes in political outlook and behavior that take place during the adult years providing an invaluable overview of the problems theories and methodological approaches that characterize the field of political socialization They consider which political values remain constant and which are subject to change and they explore the ways in which both ordinary and extraordinary life events affect adults political worldviews Among specific topics considered are the effects of age and aging the relation between participation in the work force and the development and expression of political views continuity and change in the wake of revolutionary social and political movements and the effects of such traumatic and life threatening situations as war and terrorist activity

University Keywords Andy Hines, 2025-09-09 How American universities operate as social and economic engines that shape society beyond their traditional educational roles University Keywords gathers contextualizes and develops original

understandings of 27 key terms that define the study and operation of the American university today Editor Andy Hines and the book's contributors invite readers to rethink the university beyond its public image as a space of learning and understand how it also operates as a real estate powerhouse a hedge fund a debt machine and even a crisis producing entity embedded in the broader American economy Through essays written by over thirty contributors from a variety of disciplines this book examines the university's intersecting functions from its financial entanglements to its often contradictory roles in society Contributors illustrate how universities simultaneously link and separate communities faculty students nurses janitors and the surrounding public through administrative processes that promote a sense of isolation and division even within shared spaces By defining and expanding the terms that drive public and scholarly conversations about postsecondary education University Keywords situates what appear to be auxiliary aspects of colleges and universities as directly impacting and at times displacing the central academic mission of these institutions In its role as a crucible for societal hierarchies and economic interests the university both drives and reflects major shifts in social structure labor practices and economic power The book's exploration of key terms like debt police and union offers readers a new framework for understanding the university's transformation into an instrument of capital accumulation as well as its ongoing relevance in the fight for a world where education labor and social justice converge

Women's Political Voice Janet A. Flammang, 1997 *'Other Kinds of Dreams'* Julia Sudbury, 2005-08-08 *Other Kinds of Dreams* provides an invaluable insight into the political activity of black and Asian women in the UK both inside and outside the black and Asian communities The book breaks new ground by destroying the misconception that black and Asian women lack political involvement integrating gender into the study of black and Asian political participation in Britain exploring the potential for alliances between black women and the new progressive black man's movement examining black women activists perception and experiences of white feminism *Other Kinds of Dreams* also questions the homogeneity of the term black and asks whether increasing social stratification within black communities undermines this unity

Feminism, Foucault, and Embodied Subjectivity Margaret A. McLaren, 2002-10-10 Addressing central questions in the debate about Foucault's usefulness for politics including his rejection of universal norms his conception of power and power knowledge his seemingly contradictory position on subjectivity and his resistance to using identity as a political category McLaren argues that Foucault employs a conception of embodied subjectivity that is well suited for feminism She applies Foucault's notion of practices of the self to contemporary feminist practices such as consciousness raising and autobiography and concludes that the connection between self transformation and social transformation that Foucault theorizes as the connection between subjectivity and institutional and social norms is crucial for contemporary feminist theory and politics

Race, Class, and Culture Robert C. Smith, Richard Seltzer, 1992-07-01 Race is arguably the most profound and enduring cleavage in American society and politics This book examines the sources and dynamics of the race cleavage in American society through a detailed analysis of intergroup and

intragroup differences at the level of mass opinion The ethclass theory which examines the intersection of ethnicity and class is used to analyze interracial differences in mass attitudes This analysis yields three clusters of opinion that distinguish African Americans from whites religiosity interpersonal alienation and political liberalism The authors then examine the intragroup sources of these opinion differences among blacks in terms of class gender age region and religion While the authors demonstrate an embryonic trend of more black middle class opinion agreement with whites the book confirms the ethclass character of the black experience whereby race and race consciousness are still more significant than class in shaping black attitudes Given the growing class bifurcation in black America and the continuing debate about its significance in shaping black attitudes and behavior this book offers a refreshing new analysis of the homogeneity as well as heterogeneity of black mass public opinion

Amiri Baraka Jerry Watts, 2001-08-01 Amiri Baraka formerly known as LeRoi Jones became known as one of the most militant anti white black nationalists of the 1960s Black Power movement An advocate of Black Cultural Nationalism Baraka supported the rejection of all things white and western He helped found and direct the influential Black Arts movement which sought to move black writers away from western aesthetic sensibilities and toward a more complete embrace of the black world Except perhaps for James Baldwin no single figure has had more of an impact on black intellectual and artistic life during the last forty years In this groundbreaking and comprehensive study the first to interweave Baraka s art and political activities Jerry Watts takes us from his early immersion in the New York scene through the most dynamic period in the life and work of this controversial figure Watts situates Baraka within the various worlds through which he travelled including Beat Bohemia Marxist Leninism and Black Nationalism In the process he convincingly demonstrates how the 25 years between Baraka s emergence in 1960 and his continued influence in the mid 1980s can also be read as a general commentary on the condition of black intellectuals during the same time Continually using Baraka as the focal point for a broader analysis Watts illustrates the link between Baraka s life and the lives of other black writers trying to realize their artistic ambitions and contrasts him with other key political intellectuals of the time In a chapter sure to prove controversial Watts links Baraka s famous misogyny to an attempt to bury his own homosexual past A work of extraordinary breadth Amira Baraka is a powerful portrait of one man s lifework and the pivotal time it represents in African American history Informed by a wealth of original research it fills a crucial gap in the lively literature on black thought and history and will continue to be a touchstone work for some time to come
