## Race For Rome:

The Race for Rome Dan Kurzman, 1977      *Race* Marc Aronson, 2007 Discusses the presence of racial prejudice throughout history and how it dictates the way we relate to others      **Race** Denise Eileen McCoskey, 2021-03-25 How do different cultures think about race In the modern era racial distinctiveness has been assessed primarily in terms of a person's physical appearance But it was not always so As Denise McCoskey shows the ancient Greeks and Romans did not use skin colour as the basis for categorising ethnic disparity The colour of one's skin lies at the foundation of racial variability today because it was used during the heyday of European exploration and colonialism to construct a hierarchy of civilizations and then justify slavery and other forms of economic exploitation Assumptions about race thus have to take into account factors other than mere physiognomy This is particularly true in relation to the classical world In fifth century Athens racial theory during the Persian Wars produced the categories Greek and Barbarian and set them in brutal opposition to one another a process that could be as intense and destructive as black and white in our own age Ideas about race in antiquity were therefore completely distinct but as closely bound to political and historical contexts as those that came later This provocative book boldly explores the complex matrices of race and the differing interpretations of ancient and modern across epic tragedy and the novel Ranging from Theocritus to Toni Morrison and from Tacitus and Pliny to Bernal's seminal study *Black Athena* this is a powerful and original new assessment      *Classics and Race* Sarah Derbew, Daniel Orrells, Phiroze Vasunia, 2025-04-24 *Classics and Race* A historical reader provides scholars and students with an exploratory intellectual history of the complex relationships between Classics and racist anti racist thought systems It collects together a series of readings of historical primary sources from the late medieval period until the mid twentieth century bringing to light how the classical tradition and post ancient constructions of race have informed each other Each reading is accompanied by an essay written by a leading specialist who offers a discussion of the primary source The volume is arranged chronologically from the late medieval period to the Renaissance crucial for understanding classical humanism and on to the eighteenth century with texts foundational to the modern emergence of classical studies as a discipline and its relationship to the transatlantic slave trade The essays show how the classical tradition has continuously been structured by debates about race racism and anti racism Including voices from Africa Asia the Caribbean Europe and North and South America the essays demonstrate why the primary text is important for understanding this intellectual and cultural history and the global reach of the classical tradition      The Race for Paradise Paul M. Cobb, 2014-07-24 In 1099 when the first crusaders arrived triumphant and bloody before the walls of Jerusalem they carved out a Christian European presence in the Islamic world that remained for centuries bolstered by subsequent waves of new crusades and pilgrimages But how did medieval Muslims understand these events What does an Islamic history of the Crusades look like The answers may surprise you In *The Race for Paradise* we see medieval Muslims managing this new and long lived Crusader threat not simply as victims or as victors but as everything in

between on all shores of the Muslim Mediterranean from Spain to Syria This is not just a straightforward tale of warriors and kings clashing in the Holy Land of military confrontations and enigmatic heroes such as the great sultan Saladin What emerges is a more complicated story of border crossers and turncoats of embassies and merchants of scholars and spies all of them seeking to manage this new threat from the barbarian fringes of their ordered world When seen from the perspective of medieval Muslims the Crusades emerge as something altogether different from the high flying rhetoric of the European chronicles as a diplomatic chess game to be mastered a commercial opportunity to be seized a cultural encounter shaping Muslim experiences of Europeans until the close of the Middle Ages and as so often happened a political challenge to be exploited by ambitious rulers making canny use of the language of jihad

Carl L. Sweat Jr. D.Min M.Div MS BS,2008-12-08 The secret things belong to the Lord our God but the things revealed belong to us and to our children forever that we may follow all the words of this law Deuteronomy 29 29 NIV As we ponder the question Do race color and religion matter we find that the initial response of many is No If in fact the reader accepts that everything the Creator has made was good then one can acknowledge without reservation that race color and religion have a beneficial existence If the reader can recognize that there is a plan and purpose for all things then without exception one must admit that race color and religion have a purpose on this earth and are ideal instruments of God Race color and religion are deeply intertwined within the life of mankind as well as with the Creator They exist as gifts dispersed among humanity for the purpose of diversified beautification They were destined by the Creator to be used in the fulfillment of His plan for the population of the earth and His plan of salvation Race color and religion serve as indicators of chronological time and are useful in the study of eschatology They serve as indicators of the three phases of human development the Physical Phase the Spiritual Phase and the Intellectual Phase They are also preordained factors of life for various reasons Some of these reasons have been revealed to humanity the others may not be known until the return of Christ If you are a person who believes that these three factors do not matter you must read this book If you are a person who believes the Christian Bible can be studied without consideration for race color and religion your understanding of the Holy Scriptures is both incomprehensive and inconclusive Through this book your eyes will be opened to a new awareness of the glorious and magnificent works the Creator has done and is doing This book provides a better understanding of the proclamations declared throughout biblical history Also you will be presented with an anthological survey designed to enhance the study of the Christian Bible with a focused consciousness of the topic Let this book serve as a sobering experience and a lesson that race color and religion truly matter      **Our Race** ,1894      **Sex and Race, Volume 3** J. A. Rogers,2014-09-15 In the Sex and Race series first published in the 1940s historian Joel Augustus Rogers questioned the concept of race the origins of racial differentiation and the root of the color problem Rogers surmised that a large percentage of ethnic differences are the result of sociological factors and in these volumes he gathered what he called the bran of history the uncollected unexamined history of black people in the hope that these neglected parts of history would become part of the mainstream body of Western history Drawing on a vast amount of research Rogers was attempting to point out the absurdity of racial divisions Indeed his belief in one race humanity precluded the idea of several different ethnic races The series marshals the data he

had collected as evidence to prove his underlying humanistic thesis that people were one large family without racial boundaries Self trained and self published Rogers and his work were immensely popular and influential during his day even cited by Malcolm X The books are presented here in their original editions      **Gender, Race, and Class in Media** Gail Dines, Jean McMahon Humez, 2011 51 contemporary articles are new to this edition with 14 classic pieces retained from prior editions      **World Traveler** ,1929      A Cultural History of Race in Antiquity Denise Eileen McCoskey, 2023-06-01 The era generally referred to as antiquity lasted for thousands of years and was characterized by a diverse range of peoples and cultural systems This volume explores some of the specific ways race was defined and mobilized by different groups including the Greeks Romans Egyptians Persians and Ethiopians as they came into contact with one another during this period Key to this inquiry is the examination of institutions such as religion and politics and forms of knowledge such as science that circumscribed the formation of ancient racial identities and helped determine their meanings and consequences Drawing on a range of ancient evidence literature historical writing documentary evidence and ancient art and archaeology this volume highlights both the complexity of ancient racial ideas and the often violent and asymmetrical power structures embedded in ancient racial representations and practices like war and the enslavement of other persons The study of race in antiquity has long been clouded by modern assumptions so this volume also seeks to outline a better method for apprehending race on its own terms in the ancient world including its relationship to other forms of identity such as ethnicity and gender while also seeking to identify and debunk some of the racist methods and biases that have been promulgated by classical historians themselves over the last few centuries      **The conversion of the Teutonic race, or, The first apostles of Europe.
