Race Reality:

Race, Reality, and Realpolitik Jeffrey Sommers, 2015-11-11 The year 2015 marked the centennial of the 1915 United States occupation of Haiti and Haiti's resistance to that signal event in its history. This study surveys the issues of economics, race, and realpolitik embedded in the political economy of U.S. interactions with Haiti that resulted in occupation. It then interrogates what constitutes the state as it pertains to foreign policy along with an inspection of who benefits from empire. This approach eschews tired dichotomies of whether or not the United States as a whole materially benefited from empire to instead simply look at who individually gained and what were the capacities of these beneficiaries to craft policy. Next, it delivers insights derived from a forensic analysis of Woodrow Wilson's perception of race and his decision to intervene in Haiti. Attitudes enabling United States military leaders to implement a policy of occupation are provided through a study of Admiral William Caperton's role in the intervention. The focus then telescopes out to inspect the role played by the press, especially as booster for commercial opportunities. In short, the project answers the questions of why, who, and how American empire was undertaken through the case study of Haiti and its occupation in 1915. *Reality TV* Susan Murray, Laurie Ouellette, 2009 A collection of essays which provide a comprehensive picture of how and why the genre of reality television emerged, what it means, how it differs from earlier television programming, and how it engages societies, industries, and individuals. **Reality TV** Jon Kraszewski, 2017-02-24 From early first wave programs such as *Candid Camera*, *An American Family*, and *The Real World* to the shows on our television screens and portable devices today, reality television consistently takes us to cities such as New York, Los Angeles, and Boston to imagine the place of urbanity in American culture and society. Jon Kraszewski offers the first extended account of this phenomenon as he makes the politics of urban space the center of his history and theory of reality television. Kraszewski situates reality television in a larger economic transformation that started in the 1980s when America went from an industrial economy when cities were home to all classes to its post-industrial economy as cities became key points in a web of global financing, expelling all economic classes except the elite and the poor. Reality television in the industrial era reworked social relationships based on class, race, and gender for liberatory purposes which resulted in an egalitarian ethos in the genre. However, reality television of the post-industrial era attempts to convince viewers that cities still serve their interests even though most viewers find city life today economically untenable. Each chapter uses a key theoretical concept from spatial theory such as power geometries, diasporic nostalgia, orientalism, the imagination of social expulsions, and the relationship between the country and the city to illuminate the way reality television engages this larger transformation of urban space in America. *Reality TV* June Deery, 2015-02-11 Reality TV has changed television and changed reality even if we are not among the millions who watch. Written for a broad audience, this accessible overview addresses questions such as: How real is reality TV? How do its programs represent gender, sex, class, and race? How does reality TV relate to politics, to consumer society, to surveillance? What kind of ethics are on display? Drawing on current

media research and the author's own analysis this study encompasses the history and evolution of reality television its production of reflexive selves and ordinary celebrity its advertising and commercialization and its spearheading of new relations between television and social media To dismiss this programming as trivial is easy Deery demonstrates that reality television merits serious attention and her incisive analysis will interest students in media studies cultural studies politics sociology and anyone who is simply curious about this global phenomenon **Reality TV** Misha Kavka, 2012-02-15 This book is a study of the Reality TV format which in less than a decade has transformed network programming schedules branded satellite and digital stations become a favourite target for anti television campaigners and turned viewers into savvy r
