Race Space And Youth Labor Markets:

Race, Space and Youth Labor Markets Michael A. Stoll, 2019-01-04 The purpose of this book is to examine whether physical distance from jobs or racial discrimination in youth labor markets explains a greater part of minority youth's employment problems First published in 1999 Routledge is an imprint of Taylor Francis an informal company **Working to Learn** Noel S. Anderson, Lisette Nieves, 2020-01-02 This book disrupts the false dichotomy of college versus career by showing how young people and the programs created to serve them integrate the worlds of college and career readiness as students work to learn against the odds and strive toward lives that matter to them Work based learning at each stage of the K college experience is crucial to the development of young people Through analysis of national policies on college readiness and work based learning as well as through illustrative case studies of young people in work based learning programs the authors highlight the programs voices and experiences of young people from middle school through college Through interviews participating students share their views aspirations and preparation for both college and career *Employers and Welfare Recipients* Harry J. Holzer, Michael A. Stoll, 2001 *Our Schools Suck*, 2009-05 An examination of schools in New York City and Los Angeles that remain racially segregated argues that these schools are failing their students presenting the perspectives of the students themselves through three case studies *Just Growth* Chris Benner, Manuel Pastor, 2013-03-01 Breaking new ground in its innovative blend of quantitative and qualitative methods the book essentially argues that another sort of growth is indeed possible While offering specific insights for regional leaders and analysts of metropolitan areas the authors also draw a broader and quite timely set of conclusions about how to scale up these efforts to address a U S economy still seeking to recover from economic crisis and ameliorate distributional divisions **Jobs and Economic Development in Minority Communities** Paul M. Ong, Anastasia Loukaitou-Sideris, 2006 A new agenda for revitalizing minority neighborhoods **The Black Youth Employment Crisis** Richard B. Freeman, Harry J. Holzer, 2008-04-15 In recent years the earnings of young blacks have risen substantially relative to those of young whites but their rates of joblessness have also risen to crisis levels The papers in this volume drawing on the results of a groundbreaking survey conducted by the National Bureau of Economic Research analyze the history causes and features of this crisis The findings they report and conclusions they reach revise accepted explanations of black youth unemployment The contributors identify primary determinants on both the demand and supply sides of the market and provide new information on important aspects of the problem such as drug use crime economic incentives and attitudes among the unemployed Their studies reveal that contrary to popular assumptions no single factor is the predominant cause of black youth employment problems They show among other significant factors that where female employment is high black youth employment is low that even in areas where there are many jobs black youths get relatively few of them that the perceived risks and rewards of crime affect decisions to work or to engage in illegal activity and that churchgoing and aspirations affect the success of black youths in

finding employment Altogether these papers illuminate a broad range of economic and social factors which must be understood by policymakers before the black youth employment crisis can be successfully addressed *Integrated Land Use and Environmental Models* Subhrajit Guhathakurta, 2013-06-29 This volume is the result of an invited symposium titled Integrated Land Use and Environmental Models A Survey of Current Applications and Research that was held in October 2000 at Arizona State University The idea for the symposium arose from a belief held by many academics that we are at the watershed of a new generation of models that are more dynamic more pragmatic more interdisciplinary and more amenable to collaborative decision making Several academics and professionals engaged in urban research had long realized that domain specific knowledge was inadequate for understanding and managing urban growth While interdisciplinary approaches have become critical in most social research one general area of knowledge that stands out as having the most wide ranging impact on current urban modeling efforts is the field comprised of environmental sciences and ecology The symposium offered a forum for academics and professionals engaged in urban and ecological modeling to exchange ideas and experiences specifically in areas that overlapped urban and environmental issues The contributions to this volume highlight the progress made in the various efforts to build integrated urban and environmental models More importantly each chapter shows how ideas have diffused across disciplinary boundaries to create better policy relevant models In addition this book outlines some promising areas of research that could make important contributions to the field of urban and environmental modeling Integrated thinking about urban and environmental issues has been fundamental to the concept of sustainability

African Americans in the U.S. Economy Cecilia A. Conrad, John Whitehead, Patrick L. Mason, James Stewart, 2005-02-09 Over the last several decades academic discourse on racial inequality has focused primarily on political and social issues with significantly less attention on the complex interplay between race and economics African Americans in the U S Economy represents a contribution to recent scholarship that seeks to lessen this imbalance This book builds upon and significantly extends the principles terminology and methods of standard economics and black political economy Influenced by path breaking studies presented in several scholarly economic journals this volume is designed to provide a political economic analysis of the past and present economic status of African Americans The chapters in this volume represent the work of some of the nation's most distinguished scholars on the various topics presented The individual chapters cover several well defined areas including black employment and unemployment labor market discrimination black entrepreneurship racial economic inequality urban revitalization and black economic development The book is written in a style free of the technical jargon that characterizes most economics textbooks While the book is methodologically sophisticated it is accessible to a wide range of students and the general public and will appeal to academicians and practitioners alike *Social Theory* Roberta Garner, Black Hawk Hancock, 2014-04-29 The organization of this popular social theory reader which pairs classical articles with contemporary theoretical and empirical studies highlights the historical flow of social theory and demonstrates

how disagreements and confrontations shape theory over time Written in clear down to earth language the introductions to each selection link theorists to one another illustrating how theoretical traditions are not rigidly separate but are always in conversation addressing and challenging each other The third edition incorporates significant changes more readings reflecting a wide diversity of theorists a completely revamped chapter on gender new chapters on race and culture and unique material on the transitional giants who have helped to transform classical theory into contemporary theory As well new contextual and biographical materials surround each reading and each chapter includes a study guide with key terms and innovative discussion questions and classroom exercises The result is a fresh take on social theory that foregrounds a plurality of perspectives and reflects contemporary trends in the field while still managing to be a teachable and affordable text

Poverty Knowledge Alice O'Connor,2001 Alice O Connor here chronicles the transformation in the study of poverty from a reform minded inquiry into the political economy of industrial capitalism to the detached highly technical 1990s analysis of the demographic and behavioural characteristics of the poor Poverty Knowledge is a comprehensive historical account of the thinking behind these very different views of the poverty problem It is a century spanning inquiry into the politics institutions ideologies and social science that shaped poverty research and policy

Kalleberg,2012-12-06 A distinguished roster of contributors considers the state of the art of the field at the turn of the 21st century and charts an ambitious agenda for the future Following what the editors describe as an evolutionist approach to the study of labor markets the chapters address issues of continuity and discontinuity in a wide range of topics including markets and institutional structures employment relations and work structures patterns of stratification in the United States and public policies opportunity structures and economic outcomes **Generating Jobs** Richard B. Freeman,Peter Gottschalk,1998-02-26 The American economy is in danger of leaving its low skilled workers behind In the last two decades the wages and employment levels of the least educated and experienced workers have fallen disastrously Where willing workers once found ready employment at reasonable wages our computerized service oriented economy demands workers who can read and write master technology deal with customers and much else Improved

education and training will alleviate this problem in the long run but educating the new workforce will take a substantial national investment over many years In the meantime we face increasingly acute questions about how to include low skill workers in today s economy Generating Jobs takes a hard look at these questions and asks whether anything can be done to improve the lot of low skilled workers by intervening in the labor market on their behalf These micro demand side policies seek to improve wages and employment levels either by lowering the costs of hiring low skilled workers through employer subsidies or by raising wage levels benefit levels or hours of employment or by providing employment via government jobs Although these policies are not currently popular in the U S they have long been used in many countries Generating Jobs provides a clear eyed assessment of this history and asks if any of these policies might be applicable to the current problems of low skilled workers in the United States The results are surprising Several recently touted panaceas turn out to be costly and ineffective in the American labor market Enterprise zones for instance are an expensive way of moving jobs into areas of high unemployment costing as much as 60 000 per job Similarly job sharing which has had uneven success in Europe turns out to be ill suited to conditions in the U S where wages are relatively low and workers need to work long hours to maintain income On the other hand a number of older less flashy policies turn out to have real if modest benefits Wage subsidies have increased employment among qualifying workers and public employment policies can increase the number of workers from targeted groups working during the program While acknowledging that many solutions are counterproductive this definitive review of active labor market policies shows that many programs can offer real help More than any rhetoric Generating Jobs is the best guide to future action and a serious response to those who claim that nothing can be done
