Race, State, and Armed Forces in Independence-Era Brazil Hendrik Kraay, 2004-08-01 Focusing on the military institutions army militia and National Guard of Bahia Brazil this book analyzes the region s transition from Portuguese colony to province of the Brazilian Empire It examines the social racial and cultural dimensions of post independence state building in one of the principal slave plantation regions of the Americas Contrary to those who stress the autonomy of the Brazilian state this book documents the close connections between the locally organized armed forces and society in the late colonial period Racially segregated and mirroring the class hierarchies of the larger society these military institutions were profoundly transformed by the war for independence in the early 1820s In its aftermath the new Brazilian state gradually built a national army breaking the local orientation of the Bahian regulars by the 1840s The National Guard locally oriented and democratic in its 1831 organization was turned into a state controlled corporation in the 1840s These developments deeply affected the lives of the men and women involved in the armed forces and a main aim of this book is to examine their participation in the complex and convoluted process of state building The liberalism used to justify independence and the creation of an imperial state resonated among ordinary soldiers and officers as it provided an ideology and language with which to challenge important features of late colonial military organization such as racial segregation and corporal punishment Racial discrimination formally eliminated in the 1830s shaped racial politics in the military while the construction of a national army undermined the previously close connections of officers and soldiers to the mainstream of Bahian society

**Integration of the Armed Forces, 1940-1965**  
 Morris J. MacGregor,2020-06-18 In the quarter century that followed American entry into World War II the nation s armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment Nor was this change confined to military installations By the time it was over the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be In the name of equality of treatment and opportunity the Department of Defense began to challenge racial injustices deeply rooted in American society For all its sweeping implications equality in the armed forces obviously had its pragmatic aspects In one sense it was a practical answer to pressing political problems that had plagued several national administrations In another it was the services expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency So easy did it become to demonstrate the connection between inefficiency and discrimination that even when other reasons existed military efficiency was the one most often evoked by defense officials to justify a change in racial policy \_x000D\_ Morris J MacGregor Jr received the A B and M A degrees in history from the Catholic University of America He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant Before joining the staff of the U S Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff

*Race, State, and Armed Forces in Independence-Era Brazil* Hendrik Kraay,2022 Focusing on the military institutions army militia and National Guard of Bahia Brazil this book analyzes the region s transition from Portuguese colony to province of the Brazilian Empire It

examines the social racial and cultural dimensions of post independence state building in one of the principal slave plantation regions of the Americas Contrary to those who stress the autonomy of the Brazilian state this book documents the close connections between the locally organized armed forces and society in the late colonial period Racially segregated and mirroring the class hierarchies of the larger society these military institutions were profoundly transformed by the war for independence in the early 1820s In its aftermath the new Brazilian state gradually built a national army breaking the local orientation of the Bahian regulars by the 1840s The National Guard locally oriented and democratic in its 1831 organization was turned into a state controlled corporation in the 1840s These developments deeply affected the lives of the men and women involved in the armed forces and a main aim of this book is to examine their participation in the complex and convoluted process of state building The liberalism used to justify independence and the creation of an imperial state resonated among ordinary soldiers and officers as it provided an ideology and language with which to challenge important features of late colonial military organization such as racial segregation and corporal punishment Racial discrimination formally eliminated in the 1830s shaped racial politics in the military while the construction of a national army undermined the previously close connections of officers and soldiers to the mainstream of Bahian society

**Nationalism in the New World** Don Harrison Doyle, Marco Antonio Villela Pamplona, 2006 Nationalism in the New World brings together work by scholars from the United States Canada Latin America and Europe to discuss the common problem of how the nations of the Americas grappled with the basic questions of nationalism Who are we How do we imagine ourselves as a nation Debates over the origins and meanings of nationalism have emerged at the forefront of the humanities and social sciences over the past two decades However these discussions have been mostly about nations in Europe the Middle East Asia or Africa In addition their focus is usually on the violence spawned by ethnic and religious strains of nationalism which have been largely absent in the Americas The contributors to this volume Americanize the conversation on nationalism They ask how the countries of the Americas fit into the larger world of nations and in what ways they present distinctive forms of nationhood Such questions are particularly important because as the editors write the American nations that came into being in the wake of revolutions that shook the Atlantic world beginning in 1776 provided models of what the modern world might become American nations were among the first nation states to emerge on the world stage As former colonies with multiethnic populations American nations could not logically rest their claim to nationhood on ancient bonds of blood and history Out of a world of empires and colonies the independent states of the Americas forged new nations based on a varied mix of modern civic ideals instead of primordial myths on ethnic and religious diversity instead of common descent and on future hopes rather than ancient roots
