Race To Power:

Race, Power, and Political Emergence in Memphis Sharon D. Wright, 2021-12-12 *Race Power and Political Emergence in Memphis* examines black political behavior and empowerment strategies in the city of Memphis. Each chapter of the text focuses on three themes: mobilization, emergence, and incorporation. By analyzing the effects of race on black political development in Memphis, scholars will be able to examine broader questions about its effects in other cities. How do political machines use substantial black electorates to their advantage? What forms of protest do black communities conduct to rebel against machine rule? What primary mobilization tactics have black citizens used during the different periods of their political development? Why do blacks mobilize more quickly in some cities? In cities with large and predominantly black populations, what elements prevent black candidates from winning citywide races? What constraints do newly elected black mayors face? What benefits do black citizens gain from their representation? After a predominantly black governing coalition is elected, what obstacles remain? Can black citizens translate proportional representation into strong political incorporation? How much power can African Americans realistically expect to gain in cities? This book is the most comprehensive case study of the city's political scene written to date. The text primarily shows that white racism is not the only obstacle to black political development. Black citizens can have population majorities but lose elections for other reasons. Their ability to win elections and gain full incorporation depends heavily on whether they minimize internal conflict and establish coalitions with middle class citizens and the business establishment.

Retreat from Injustice Nick O'Neill, Simon Rice, Roger Douglas, 2004 This new edition of *Retreat from Injustice* has the strengths and style of its predecessor. The account of human rights in Australia is firmly grounded in historical and international contexts. The availability and limitations of rights and freedoms are clearly detailed and illustrated with cases, and a particular spotlight is placed on key current human rights issues including terrorism, indigenous issues, and asylum seekers.

Race, Power, and the Obama Legacy Pierre Orelus, 2015-09-25 This book critically examines Obama's presidency and legacy, especially in regard to race inequality, education, and political power. Orelus depicts an interest convergence factor that led many White liberals and the corporate media to help Obama get elected in 2008 and 2012. He assesses Obama's political accomplishments, including parts of his domestic policies that support gay rights and equal pay for women. Special attention is given to Obama's educational policies like *Race to the Top* and the effects of such policies on both the learning and academic outcome of students, particularly linguistically and culturally diverse students. In a race and power framework, Orelus relates domestic policies to the effects of Obama's foreign policies on the lives of people in poorer countries, especially where innocent children and women have been killed by war and drone strikes authorized by Obama's administration. The author invites readers to question and transcend the historical symbolism of Obama's political victory in an effort to carefully examine and critique his actions as reflected through both his domestic and foreign policies.

Challenging History Leah Worthington, Rachel Clare Donaldson, John W. White, 2021-07-22 A collection of essays that

examine how the history of slavery and race in the United States has been interpreted and inserted at public historic sites For decades racism and social inequity have stayed at the center of the national conversation in the United States sustaining the debate around public historic places and monuments and what they represent These conversations are a reminder of the crucial role that public history professionals play in engaging public audiences on subjects of race and slavery This difficult history has often remained un or underexplored in our public discourse hidden from view by the tourism industry or even by public history professionals themselves as they created historic sites museums and public squares based on white centric interpretations of history and heritage *Challenging History* through a collection of essays by a diverse group of scholars and practitioners examines how difficult histories specifically those of slavery and race in the United States are being interpreted and inserted at public history sites and in public history work Several essays explore the successes and challenges of recent projects while others discuss gaps that public historians can fill at sites where Black history took place but is absent in the interpretation Through case studies the contributors reveal the entrenched false narratives that public history workers are countering in established public history spaces and the work they are conducting to reorient our collective understanding of the past History practitioners help the public better understand the world Their choices help to shape ideas about heritage and historical remembrances and can reform even transform worldviews through more inclusive and ethically narrated histories *Challenging History* invites public historians to consider the ethical implications of the narratives they choose to share and makes the case that an inclusive honest and complete portrayal of the past has the potential to reshape collective memory and ideas about the meaning of American history and citizenship

The Tariff, Civil Service, Income Tax, Imperialism, the Race Problem, and Other Speeches William Henry Fleming, 1908 *The Subject of Race in American Science Fiction* Sharon DeGraw, 2006-12-19

While the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF In his Mars series Edgar Rice Burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism Writing in the 1930s George S Schuyler revised Burroughs' normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead While both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored Beginning in the 1960s Samuel R Delany more fully joined SF and African American literature Delany expands on Schuyler's racial constructionist approach to identity including gender and sexuality in addition to race Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature Connecting the popular fiction of Burroughs the controversial career of Schuyler and the postmodern texts of Delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today
