*Educational*

*Equity and Accountability* Linda Skrla, James Joseph Scheurich, 2004-02-02 Despite the intense political attention that has been focused on accountability on standardized testing and on the equity effects of both accountability and testing the great majority of recent debate in education policy circles has failed to attend to either the dynamism or complexity of these issues and has instead been carried out in a dualistic good versus evil fashion In contrast the scholarship collected in this important new volume is designed to move beyond the prevailing dualism and to push the discourse about accountability testing and educational equity in public schools usefully forward and to provide a much needed resource for researchers policy makers and practitioners

*Second International Handbook of Mathematics Education* Alan Bishop, M.A. (Ken) Clements, Christine Keitel-Kreidt, Jeremy Kilpatrick, Frederick Koon-Shing Leung, 2012-02-02 ALAN 1 BISHOP The first International Handbook on Mathematics Education was published by Kluwer Academic Publishers in 1996 However most of the writing for that handbook was done in 1995 and generally reflected the main research and development foci prior to 1994 There were four sections 36 chapters and some 150 people contributed to the final volume either as author reviewer editor or critical friend The task was a monumental one attempting to cover the major research and practice developments in the international field of mathematics education as it appeared to the contributors in 1995 Inevitably there were certain omissions some developments were only starting to emerge and some literatures were only sketchy and speculative However that Handbook has had to be reprinted three times so it clearly fulfilled a need and I personally hope that it lived up to what I wrote in its Introduction The Handbook thus attempts not merely to present a description of the international state of the field but also to offer synthetic and reflective overviews on the different directions being taken by the field on the gaps existing in our present knowledge on the current problems being faced and on the future possibilities for development Bishop et al 1996 Since that time there has been even more activity in our field and now seems a good time to take stock again to reflect on what has happened since 1995 and to create a second Handbook with the same overall goals

*Black Women, Academe, and the Tenure Process in the United States and the Caribbean* Talia Esnard, Deirdre Cobb-Roberts, 2018-08-06 This book explores the meanings experiences and challenges faced by Black women faculty that are either on the tenure track or have earned tenure The authors advance the notion of comparative intersectionality to tease through the contextual peculiarities and commonalities that define their identities as Black women and their experiences with tenure and promotion across the two geographical spaces By so doing it works through a comparative treatment of existing social inequalities educational disparities and injustices in the promotion and retention of Black women academics Such interpretative examinations offer important insights into how Black women's subjugated knowledge and experiences continue to be suppressed within mainstream structures of power and how they are negotiated across contexts

development falling under psychology and learning under education Recent advances in theory research and practice however have made it clear that an important reciprocal relationship exists between them advances in development frequently lead to learning and conversely learning quite often fuels development The synchronicity between development and learning is responsible for positive changes in many capacities including insight intelligence reflective and meta cognition personality expression interpersonal competence and self efficacy This synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning The Handbook of Adult Development and Learning is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline the latest research at the intersection of these fields It examines six major aspects of their intersection foundations key areas of integration the self system higher reaches of development and learning essential contexts and specific applications An introductory chapter explains why it is so important to recognize and fuel the growth of this new discipline Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research This handbook is a must read for all who promote optimal aging It will be an invaluable reference for scholars in development and education as well as rich resource for policy makers and practitioners such as corporate executives and human resource personnel
