Race Evolution And Mankind:

Race Evolution & Mankind Lehrman, 1966-01-21 Race and Human Evolution Milford H. Wolpoff, Rachel Caspari, 1997 Race and Human Evolution shows how the debate over the Eve theory reflects a long history of theories about human origins and race that has been fraught with social and political implications **The Concept of Race in Natural and Social Science** E. Nathaniel Gates, 2014-05-01 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject Races of Mankind Marianne Kinkel, 2011 In 1930 Chicago's Field Museum of Natural History commissioned sculptor Malvina Hoffman to produce three dimensional models of racial types for an anthropology display called the Races of Mankind In this exceptional study Marianne Kinkel measures the colossal impact of the ninety one bronze and stone sculptures on perceptions of race in twentieth century visual culture tracing their exhibition from their 1933 debut and nearly four decades at the Field Museum to numerous reuses repackagings reproductions and publications that reached across the world Front flap of book jacket The Races of Mankind Harriet L. Joseph Pomeroy Widney, 1907 Idea of Race in Science Nancy Stepan, 1982-06-18 **The Diagrammatics of 'Race'** Marianne Sommer, 2024-07-30 This is the first book that engages with the history of diagrams in physical evolutionary and genetic anthropology Since their establishment as scientific tools for classification in the eighteenth century diagrams have been used to determine but also to deny kinship between human groups In nineteenth century craniometry they were omnipresent in attempts to standardize measurements on skulls for hierarchical categorization In particular the human family tree was central for evolutionary understandings of human diversity being used on both sides of debates about whether humans constitute different species well into the twentieth century With recent advances in ancient DNA analyses the tree diagram has become more contested than ever does human relatedness take the shape of a network Are human individual genomes mosaics made up of different ancestries Sommer examines the epistemic and political role of these visual representations in the history of race as an anthropological category How do such diagrams relate to imperial and post colonial practices and ideologies but also to liberal and humanist concerns The Diagrammatics of Race concentrates on Western projects from the late 1700s into the present to diagrammatically define humanity subdividing and ordering it including the concomitant endeavors to acquire representative samples bones blood or DNA from all over the world Contributing to the diagrammatic turn in the humanities and social sciences it reveals connections between diagrams in anthropology and other visual traditions including in religion linguistics biology genealogy breeding and eugenics Race and the Crisis of Humanism Kay Anderson, 2012-12-06 The idea that humankind constituted a unity albeit at different stages of development was in the 19th century challenged with a new way of thinking The savagery of certain races was no longer regarded as a stage in their progress towards civilisation but as their permanent state What caused this shift In Kay Anderson s provocative new account she argues that British colonial encounters in Australia from the late 1700s with the apparently unimproved condition of the Australian Aborigine viewed against an understanding of humanity of the time that is as characterised by separation from nature precipitated a crisis in existing ideas of what it meant to be human This lucid intelligent and persuasive argument will be necessary reading for all scholars and upper level students interested in the history and theories of race critical human geography anthropology and Australian and environmental studies **A Companion to Paleoanthropology** David R. Begun, 2012-12-20 A Companion to Paleoanthropology presents a compendium of readings from leading scholars in the field that define our current knowledge of the major discoveries and developments in human origins and human evolution tracing the fossil record from primate and hominid origins to the dispersal of modern humans across the globe Represents an accessible state of the art summary of the entire field of paleoanthropology with an overview of hominid taxonomy Features articles on the key discoveries in ape and human evolution in cranial postcranial and brain evolution growth and development Surveys the breadth of the paleontological record from primate origins to modern humans Highlights the unique methods and techniques of paleoanthropology including dating and ecological methods and

use of living primate data to reconstruct behavior in fossil apes and humans *Between Occultism and Nazism* Peter Staudenmaier, 2014-04-03 The relationship between Nazism and occultism has been an object of fascination and speculation for decades Peter Staudenmaier's *Between Occultism and Nazism* provides a detailed historical examination centered on the anthroposophist movement founded by Rudolf Steiner Its surprising findings reveal a remarkable level of Nazi support for Waldorf schools biodynamic farming and other anthroposophist initiatives even as Nazi officials attempted to suppress occult tendencies The book also includes an analysis of anthroposophist involvement in the racial policies of Fascist Italy Based on extensive archival research this study offers rich material on controversial questions about the nature of esoteric spirituality and alternative cultural ideals and their political resonance *Three Essays on the Antiquity and Races of Man* Alfred Louis Kroeber, 1920 *The Epoch of the Mammoth and the Apparition of Man Upon the Earth* James Cocke Southall, 1878 **The Origins of the Holocaust** Michael Robert Marrus, 2011-08-02 This edition is the first of its kind to offer a basic collection of facsimile English language historical articles on all aspects of the extermination of the European Jews A total of 300 articles from 84 journals and collections allows the reader to gain an overview of this field The edition both provides access to the immense rich array of scholarly articles published after 1960 on the history of the Holocaust and encourages critical assessment of conflicting interpretations of these horrifying events The series traces Nazi persecution of Jews before the implementation of the Final Solution demonstrates how the Germans coordinated anti Jewish activities in conquered territories and sheds light on the victims in concentration camps ending with the liberation of the concentration camp victims and articles on the trials of war criminals The publications covered originate from the years 1950 to 1987 Included are authors such as Jakob Katz Saul Friedlander Eberhard Jäckel Bruno Bettelheim and Herbert A Strauss **Another white Man's Burden** Tommy J. Curry, 2018-12-01 Demonstrates the extent to which Josiah Royce's ideas about race were motivated explicitly in terms of imperial conquest Another white Man's Burden performs a case study of Josiah Royce's philosophy of racial difference In an effort to lay bare the ethnological racial heritage of American philosophy Tommy J Curry challenges the common notion that the cultural racism of the twentieth century was more progressive and less racist than the biological determinism of the 1800s Like many white thinkers of his time Royce believed in the superiority of the white races Unlike today however whiteness did not represent only one racial designation but many Contrary to the view of the British born Germanophile philosopher Houston S Chamberlain for example who insisted upon the superiority of the Teutonic races Royce believed it was the Anglo Saxon lineage that possessed the key to Western civilization It was the birthright of white America he believed to join the imperial ventures of Britain to take up the white man's burden To this end he advocated the domestic colonization of Blacks in the American South suggested that America's xenophobia was natural and necessary to protecting the culture of white America and demanded the assimilation and elimination of cultural difference for the stability of America's communities Another white Man's Burden reminds philosophers that racism has been part of the building blocks

of American thought for centuries and that this must be recognized and addressed in order for its proclamations of democracy community and social problems to have real meaning Curry has paid attention to the odd and icky bits of Royce tracking down the offhand cultural references the unfamiliar names and historical contexts A solid analysis of early twentieth century conceptions of race and colonialism reveals an unseemly picture before our contemporary eyes Curry is right we shouldn't ignore or soft pedal this Lee A McBride III the College of Wooster **Transactions** Canadian Institute (1849-1914), 1910
