## **Race To The Bottom:**

*Race to the Bottom* Azfar Shafi,Ilyas Nagdee,2022-06-20 Antiracist movements are more mainstream than ever before Liberal democracies boast of their policies designed to stamp out racism in all walks of life Why then is racism still ever present in our society This is not an accident but by design Capitalism is structured by racism and has relentlessly attacked powerful movements *Race to the Bottom* traces our current crisis back decades to the fragmentation of Britain s Black Power movements and their absorption into NGOs and the Labour Party The authors call for recovering radical histories of antiracist struggle championing modern activism and infusing them with the urgency of our times replacing anxieties over unconscious bias and rival claims for representation with the struggle for a new socialist multi racial organising from below

**Race to the Bottom** LaFleur Stephens-Dougan,2020-07-31 African American voters are a key demographic to the modern Democratic base and conventional wisdom has it that there is political cost to racialized dog whistles especially for Democratic candidates However politicians from both parties and from all racial backgrounds continually appeal to negative racial attitudes for political gain Challenging what we think we know about race and politics LaFleur Stephens Dougan argues that candidates across the racial and political spectrum engage in racial distancing or using negative racial appeals to communicate to racially moderate and conservative whites the overwhelming majority of whites that they will not disrupt the racial status quo *Race to the Bottom* closely examines empirical data on racialized partisan stereotypes to show that engaging in racial distancing through political platforms that do not address the needs of nonwhite communities and charged rhetoric that targets African Americans immigrants and others can be politically advantageous Racialized communication persists as a well worn campaign strategy because it has real electoral value for both white and black politicians seeking to broaden their coalitions Stephens Dougan reveals that claims of racial progress have been overstated as our politicians are incentivized to employ racial prejudices at the expense of the most marginalized in our society

Harrison,2011-11-01 The spectre of a race to the bottom is increasingly prominent in debates about globalization and also within federal systems where the mobility of both capital and individuals prompts fears of interjurisdictional competition with respect to taxes and environmental and welfare standards While there has been no shortage of either political rhetoric or academic theorizing on this subject empirical studies have been in shorter supply This volume seeks to fill that gap by asking Are Canadian provinces engaged in a race to the bottom and if so what are the consequences The contributors apply insights from economics and political science to several policy fields What emerges is a theoretical and empirical picture of interprovincial competition that shows it to be more complex than the popular image of a race to the bottom and that also contradicts predictions of an inexorable downward spiral This timely practical volume will be of interest to public policy practitioners as well as to students and scholars of economics and political science **Race to the Top and Race to the Bottom: Tax Competition in Rural China** Xiaobo Zhang,2008 **A Race to the Bottom of Crazy** Richard

*Racing to the Bottom?* David Wheeler,2001 Critics of free trade have raised the specter of a race to the bottom in which environmental standards collapse because polluters threaten to relocate to pollution havens in the developing world The flaw in the race to the bottom model is that its basic assumptions misrepresent the political economy of pollution control in developing countries **Regulating and Managing Food Safety in the EU** Harry Bremmers,Kai Purnhagen,2018-08-01

This book analyses EU food law from a regulatory economic and managerial perspective It presents an economic assessment of strategies of food safety regulation and discusses the different regulatory regimes in EU food law It examines the challenges of food safety in the internal market as well as the regulatory tools that are available The book s generic theorising and measurement of regulatory effects is supplemented by detailed analysis of key topics in food markets such as health claims enforcement strategies and induced risk management at the level of the organizations producing food The regulatory effects discussed in the book range from classical regulatory analysis covering e g effects of ex ante versus ex post regulation and content related versus information related regulation to new regulatory options such as behavioral regulation The book takes as its premise the idea that economic considerations are basic to the design and functioning of the European food supply arena and that economic effects consolidate or induce modification of the present legal structures and principles The assessments analyses and examination of the various issues presented in the book serve to answer the question of how economic theory and practice can explain and enhance the shaping and modification of the regulatory framework that fosters safe and sustainable food supply chains **Green Leviathan** Inger Weibust,2016-04-22 The US Switzerland and Canada are

wealthy democracies that should be conducive to effective decentralized or cooperative environmental policy making However a closer examination of their environmental policy over many decades finds no evidence that these approaches have worked So does it matter which level of government makes policy Can cooperation between sub national governments protect the environment Building on comparative case studies on air and water pollution and making use of extensive historical material Inger Weibust questions how governance structure affects environmental policy performance in the US
