in Australia The Life and Death Debate Norman L. Geisler, J. Moreland, 1990-11-09 This work is an introductory treatment of issues and options in social and bioethics which center on the end of life. Moreland and Geisler have attempted to simplify and summarize various end of life topics without being simplistic or caricaturing different viewpoints even though the authors' own viewpoints are made perfectly clear. A comprehensive bibliography, glossary, and subject and author index make this a valuable textbook as well as a resource for further study. The major purpose of this book is to make the reader think more clearly and deeply about the important issues discussed between its covers. Beginning the work is an essay that introduces the dilemma of ethical decisions. The following chapters separately discuss the situations of abortion, infanticide, euthanasia, suicide, capital punishment, and war. The discussion concludes with a chapter of practical and theoretical guidance for making ethical decisions. A glossary, subject index, author index, and selected bibliography for each chapter make this a valuable text. This important work will not only appeal to experienced philosophers but also to students of moral philosophy, theology, and ethics.

The Leviathan's Choice James Michael Martinez, William D. Richardson, William Donald Richardson, D. Brandon Hornsby, 2002 One of the broadest and most balanced accounts of the capital punishment debate. *The Leviathan's Choice* explores the death penalty from four distinct perspectives: philosophical, theological, social science, and legal, and includes scholarly essays on both sides of the debate. An ideal reader for students and policy makers, this book is essential for everyone following the arguments surrounding the death penalty.

The Columbian Speaker, 1874 **Local and National Poets of America** Thomas William Herringshaw, 1890 **The Proliferation Of Rights** Carl Wellman, 2018-02-07 The Proliferation of Rights explores how the assertion of rights has expanded dramatically since World War II. Carl Wellman illuminates for the reader the historical developments in each of the major categories of rights, including human rights, civil rights, women's rights, patient rights, and animal rights. He concludes by assessing where this proliferation has been legitimate and helpful, cases where it has been illusory and unproductive, and alternatives to the appeal to rights.

Valuing Life John Kleinig, 2014-07-14 Abortion, euthanasia, capital punishment, war, genetic engineering, and fetal experimentation, environmental, and animal rights: these topics inspire some of today's most heated public controversies. And it is fashionable to pursue these debates in terms of the negative query: Under what conditions may life be disregarded or terminated? John Kleinig asks a different, more positive question: What may be said in behalf of life? Looking at the full range of appeals to life's value, he considers a variety of issues: Is livingness as such to be affirmed and respected? Is there an ascending order of plant, animal, and human life? Does human life possess a distinctive claim, or must we discriminate between humans that do and humans that do not have claims on us? Kleinig shows that assertions about valuing life camouflage a complex normative vocabulary about worth, reverence, sanctity, dignity, respect, and rights. And life too is subject to an assortment of understandings. Sensitive to the frameworks informing diverse appeals to life's value, this comprehensive work will interest readers concerned with the environment, animal rights, or bioethics. Values and Vaccine Refusal Mark Navin, 2015-09-16 Parents in the US and other societies are increasingly refusing to vaccinate their children even though popular anti vaccine myths e g vaccines cause autism have been debunked This book explains the epistemic and moral failures that lead some parents to refuse to vaccinate their children First some parents have good reasons not to defer to the expertise of physicians and to rely instead upon their own judgments about how to care for their children Unfortunately epistemic self reliance systematically distorts beliefs in areas of inquiry in which expertise is required like vaccine immunology Second vaccine refusers and mainstream medical authorities are often committed to different values surrounding health and safety For example while vaccine advocates stress that vaccines have low rates of serious complications vaccine refusers often resist vaccination because it is unnatural and because they view vaccine preventable diseases as a natural part of childhood Finally parents who refuse vaccines rightly resist the utilitarian moral arguments for the greater good that vaccine advocates sometimes make Unfortunately vaccine refusers also sometimes embrace a pernicious hyper individualism that sanctions free riding on herd immunity and that cultivates indifference to the interpersonal and social harms that unvaccinated persons may cause

Good Care, Painful Choice Richard J. Devine, CM, 2004-09-01 Good Care Painful Choices surveys the ethical decisions that must be made by ordinary people who deal with medicine today ranging from beginning life issues such as test tube babies and surrogate motherhood to end of life issues such as advance directives patient refusal of treatment and physician assisted suicide This third edition gives special attention to partial birth abortion and to recent discoveries in genetics involving stem cells cloning and eugenics The strength of the book comes from its foundation in basic moral principles that stress personhood moral decision making and conscience Decidedly Christian the book gives special emphasis to the Roman Catholic tradition It will be welcomed by Catholics by Christians of all denominations and by anyone interested in a careful overview of contemporary medical ethics
