Racial And Ethnic Competition:

Racial and Ethnic Competition Michael Banton, 1983-06-30 **Racial and Ethnic Competition** Michael P. Banton, 1992 The Dynamics of Ethnic Competition and Conflict Susan Olzak, 1994-07-01 This study of ethnic violence in the United States from 1877 to 1914 reveals that not all ethnic groups were equally likely to be victims of violence the author seeks the reasons for this historical record This analysis of the causes of urban racial and ethnic strife in large American cities at the turn of the century should comprise important empirical and theoretical reference material for social scientists and historians alike **Rational Choice Revisited: a Critique of Michael Banton's Racial and Ethnic Competition**, 1985 **Ethnic and Racial Consciousness** Michael Banton, 2014-09-25 Ethnic and Racial Consciousness is a completely revised version of the highly acclaimed first edition published in 1988 At that time no one expected the former Yugoslavia would break up with the brutal slaughter of neighbour by neighbour Few would have predicted the horrific massacres in Rwanda and Burundi which have led to accusations of genocide The ending of the cold war has been followed by struggles in the former Soviet Union in which one group has struggled for dominance and the other for independence Ethnic conflict is now one of the main threats to peace in the contemporary world This new edition offers an up to date introduction to the many issues surrounding our definition and understanding of ethnic and racial difference racism and discrimination in general Ethnic Origins Jeremy Hein, 2006-04-13 Immigration studies have increasingly focused on how immigrant adaptation to their new homelands is influenced by the social structures in the sending society particularly its economy Less scholarly research has focused on the ways that the cultural make up of immigrant homelands influences their adaptation to life in a new country In Ethnic Origins Jeremy Hein investigates the role of religion family and other cultural factors on immigrant incorporation into American society by comparing the experiences of two little known immigrant groups living in four different American cities not commonly regarded as immigrant gateways Ethnic Origins provides an in depth look at Hmong and Khmer refugees people who left Asia as a result of failed U S foreign policy in their countries These groups share low socio economic status but are vastly different in their norms values and histories Hein compares their experience in two small towns Rochester Minnesota and Eau Claire Wisconsin and in two big cities Chicago and Milwaukee and examines how each group adjusted to these different settings The two groups encountered both community hospitality and narrow minded hatred in the small towns contrasting sharply with the cold anonymity of the urban pecking order in the larger cities Hein finds that for each group their ethnic background was more important in shaping adaptation patterns than the place in which they settled Hein shows how in both the cities and towns the Hmong s sharply drawn ethnic boundaries and minority status in their native land left them with less affinity for U S citizenship or Asian American panethnicity than the Khmer whose ethnic boundary is more porous Their differing ethnic backgrounds also influenced their reactions to prejudice and discrimination The Hmong with a strong group identity perceived greater social inequality and supported collective political

action to redress wrongs more than the individualistic Khmer who tended to view personal hardship as a solitary misfortune rather than part of a larger scale injustice Examining two unique immigrant groups in communities where immigrants have not traditionally settled Ethnic Origins vividly illustrates the factors that shape immigrants response to American society and suggests a need to refine prevailing theories of immigration Hein s book is at once a novel look at a little known segment of America s melting pot and a significant contribution to research on Asian immigration to the United States A Volume in the American Sociological Association s Rose Series in Sociology

Ethnicity and Inequality Robert M. Jiobu,1990-01-01 This book is a study of the relationship between ethnicity and socioeconomic status it is the first to empirically study both the white and nonwhite underclass Jiobu uses United States census data on twenty ethnic groups including specific white groups and specific nonwhite groups Using the 1980 national census which contains information on ancestry for the first time Jiobu demonstrates that it is possible to define ethnic groups in new ways such as drawing a distinction between race and ethnicity Ethnicity and Inequality tests numerous theories and examines several important questions for ethnic relations What is the demographic structure underlying the various groups How can ethnicity sex and inequality be explained Who gains from ethnic inequality The author concludes by outlining a way to draw the diversity of findings under a single theoretical umbrella

A Second Chicago School? Gary Alan Fine,1995-09 From 1945 to about 1960 the University of Chicago was home to a group of faculty and graduate students whose work has come to define what many call a second Chicago School of sociology Like its predecessor earlier in the century the postwar department was again the center for qualitative social research on everything from mapping the nuances of human behavior in small groups to seeking solutions to problems of race crime and poverty Howard Becker Joseph Gusfield Herbert Blumer David Riesman Erving Goffman and others created a large enduring body of work In this book leading sociologists critically confront this legacy The eight original chapters survey the issues that defined the department s agenda the focus on deviance race and ethnic relations urban life and collective behavior the renewal of participant observation as a method and the refinement of symbolic interaction as a guiding theory and the professional and institutional factors that shaped this generation including the leadership of Louis Wirth and Everett C Hughes the role of women and the competition for national influence Chicago sociology faced from survey research at Columbia and grand theory at Harvard The contributors also discuss the internal conflicts that call into question the very idea of a unified school

Generations of Exclusion Edward E. Telles, Vilma Ortiz, 2008-03-21 Foreword by Joan W Moore

When boxes of original files from a 1965 survey of Mexican Americans were discovered behind a dusty bookshelf at UCLA sociologists Edward Telles and Vilma Ortiz recognized a unique opportunity to examine how the Mexican American experience has evolved over the past four decades Telles and Ortiz located and re interviewed most of the original respondents and many of their children Then they combined the findings of both studies to construct a thirty five year analysis of Mexican American integration into American society Generations of Exclusion is the result of this extraordinary project Generations of Exclusion measures Mexican American integration across a wide number of dimensions education English and Spanish language use socioeconomic status intermarriage residential segregation ethnic identity and political participation The study contains some encouraging findings but many more that are troubling Linguistically Mexican Americans assimilate into mainstream America quite well by the second generation nearly all Mexican Americans achieve English proficiency In many domains however the Mexican American story doesn't fit with traditional models of assimilation The majority of fourth generation Mexican Americans continue to live in Hispanic neighborhoods marry other Hispanics and think of themselves as Mexican And while Mexican Americans make financial strides from the first to the second generation economic progress halts at the second generation and poverty rates remain high for later generations Similarly educational attainment peaks among second generation children of immigrants but declines for the third and fourth generations Telles and Ortiz identify institutional barriers as a major source of Mexican American disadvantage Chronic under funding in school systems predominately serving Mexican Americans severely restrains progress Persistent discrimination punitive immigration policies and reliance on cheap Mexican labor in the southwestern states all make integration more difficult The authors call for providing Mexican American children with the educational opportunities that European immigrants in previous generations enjoyed The Mexican American trajectory is distinct but so is the extent to which this group has been excluded from the American mainstream Most immigration literature today focuses either on the immediate impact of immigration or what is happening to the children of newcomers to this country Generations of Exclusion shows what has happened to Mexican Americans over four decades In opening this window onto the past and linking it to recent outcomes Telles and Ortiz provide a troubling glimpse of what other new immigrant groups may experience in the future

Coming to Terms with Superdiversity Peter Scholten, Maurice Crul, Paul van de Laar, 2018-11-26 This open access book discusses Rotterdam as clear example of a superdiverse city that is only reluctantly coming to terms with this new reality Rotterdam as

is true for many post industrial cities has seen a considerable backlash against migration and diversity the populist party Leefbaar Rotterdam of the late Pim Fortuyn is already for many years the largest party in the city At the same time Rotterdam has become a majority minority city where the people of Dutch descent have become a numerical minority themselves The book explores how Rotterdam is coming to terms with superdiversity by an analysis of its migration history of the city the composition of the migrant population and the Dutch working class population local politics and by a comparison with Amsterdam and other cities As such it contributes to a better understanding not just of how and why super diverse cities emerge but also how and why the reaction to a super diverse reality can be so different By focusing on different aspects of superdiversity coming from different angles and various disciplinary backgrounds this book will be of interest to students and scholars in migration policy sciences urban studies and urban sociology as well as policymakers and the broader public

Fighting in the Streets Max Arthur Herman,2005 *Fighting in the Streets* provides a comparative analysis of some of the most severe episodes of urban unrest that took place in twentieth century America including the 1919 Chicago Riot the 1943 Detroit Riot the 1967 Newark and Detroit Riots the 1980 Miami Riot and the 1992 Los Angeles Riot Examining the patterns of death and destruction of property that occurred during these events as well as historical evidence regarding struggles for housing jobs and political power among members of different racial ethnic groups this book makes the case for a general explanatory model of urban unrest as a product of rapid demographic change Focusing at the neighborhood level where demographic changes have their greatest impact *Fighting in the Streets* posits that riot related violence is most likely to take place in neighborhoods characterized by high levels of black white segregation poverty unemployment and rapid population turnover Such a profile of the riot prone neighborhood may enable policy makers to avert future violence through targeted economic and political intervention such as building community institutions that integrate newcomers and natives This book is particularly suited
