Racism And Colonialism:

The New Age of Empire Kehinde Andrews, 2021-03-02 A damning exploration of the many ways in which the effects and logic of anti black colonialism continue to inform our modern world Colonialism and imperialism are often thought to be distant memories whether they're glorified in Britain's collective nostalgia or taught as a sin of the past in history classes This idea is bolstered by the emergence of India China Argentina and other non western nations as leading world powers Multiculturalism immigration and globalization have led traditionalists to fear that the west is in decline and that white people are rapidly being left behind progressives and reactionaries alike espouse the belief that we live in a post racial society But imperialism as Kehinde Andrews argues is alive and well It's just taken a new form one in which the U S and not Europe is at the center of Western dominion and imperial power looks more like racial capitalism than the expansion of colonial holdings The International Monetary Fund World Bank World Trade Organization and even the United Nations are only some of these modern mechanisms of Western imperialism Yet these imperialist logics and tactics are not limited to just the west or to white people as in the neocolonial relationship between China and Africa Diving deep into the concepts of racial capitalism and racial patriarchy Andrews adds nuance and context to these often over simplified narratives challenging the right and the left in equal measure Andrews takes the reader from genocide to slavery to colonialism deftly explaining the histories of these phenomena how their justifications are linked and how they continue to shape our world to this day The New Age of Empire is a damning indictment of white centered ideologies from Marxism to neoliberalism and a reminder that our histories are never really over

Racism and Colonialism R.J. Ross, 2012-12-06 1 REFLECTIONS ON A THEME by ROBERT ROSS This book the fourth in the series Comparative Studies in Overseas History and like its predecessors the product of a symposium held by the Leiden Centre for the History of European Expansion is organised around a single theme the relationship between the ideological structures of domination and oppression that have come to be called racism and the political and economic ones which grew out of Europe's conquering and ruling much of the rest of the world By racism we mean those systems of thought in which group characteristics of human beings of a non somatic nature are considered to be fixed by principles of descent and in which in general physical attributes other than those of sex are the main sign by which characteristics are attributed In addition almost by definition the systems of thought entailed in this require that there is a hierarchy of the various races and that those people in the lower ranks of that hierarchy are seriously disadvantaged at least if the proponents of racist thought are able to impose their will on the society in which they live The exclusion of the discrimination of women from the concept of racism should not be thought as entailing that racist and sexist ideas do not have much in common since both derive from essentially biological determinism and indeed 2 racist societies have historically almost invariably been strongly sexist

profoundly test the resilience of families The resulting transformations carry social political legal and economic implications for mothering family dynamics and community engagement This collaborative volume brings together diverse perspectives intended to deconstruct perceptions realities risks and impacts of gun violence as seen by researchers educators community advocates public health health care experts criminologists social workers field based practitioners and victims survivors of gun violence The distinct and broad range of contributions in this volume critically unpacks representations stress and trauma resilience advocacy activism policymaking family functioning social justice and equity governmentality and the criminal justice system public health health care and community programs interventions Ultimately the work is a unique contribution to the literature in which there is a lack of wide academic consideration of gun violence and a demonstrably unsatisfactory political response stretching back decades

racism at the intersection of law and colonialism Noting the grim racial realities still confronting communities of color and how they have not been alleviated by constitutional guarantees of equal protection this book suggests that settler colonial theory provides a more coherent understanding of what causes and what can help remediate racial disparities Natsu Taylor Saito attributes the origins and persistence of racialized inequities in the United States to the prerogatives asserted by its predominantly Angloamerican colonizers to appropriate Indigenous lands and resources to profit from the labor of voluntary and involuntary migrants and to ensure that all people of color remain in their place By providing a functional analysis that links disparate forms of oppression this book makes the case for the oft cited proposition that racial justice is indivisible focusing particularly on the importance of acknowledging and contesting the continued colonization of Indigenous peoples and lands *Settler Colonialism Race and the Law* concludes that rather than relying on promises of formal equality we will more effectively dismantle structural racism in America by envisioning what the right of all peoples to self determination means in a settler colonial state

The Memory of Colonialism in Britain and France Itay Lotem, 2021-03-12 This book explores national attitudes to remembering colonialism in Britain and France By comparing these two former colonial powers the author tells two distinct stories about coming to terms with the legacies of colonialism the role of silence and the breaking thereof Examining memory through the stories of people who incited public conversation on colonialism activists politicians journalists and professional historians this book argues that these actors mobilised the colonial past to make sense of national identity race and belonging in the present In focusing on memory as an ongoing politicised public debate the book examines the afterlife of colonial history as an element of political and social discourse that depends on actors goals and priorities A thought provoking and powerful read that explores the divisive legacies of colonialism through oral history this book will appeal to those researching imperialism collective memory and cultural identity
