*Migration and Race in Europe* Martin Bulmer, John Solomos, 2020-05-21 Migration and Race in Europe covers various facets of the interplay between migration and race in Europe Over the past two decades there has been a growing public policy and political debate about questions linked to migration and refugee movements across the borders of Europe This has been evident in countries such as the UK France the Netherlands and Germany that have had long established experience with questions about immigration

and race But what has also become clear is that these debates have also become an established part of political and civil society discourses across both Southern and Eastern European societies and beyond The contributions to this volume draw on the latest research in order to provide an insight into the changing dynamics of migration and race in a number of European societies This book was originally published as a special issue of Ethnic and Racial Studies      **Intercultural Europe** Jagdish Gundara, Sydney Jacobs, 2019-06-11 This title was first published in 2000 The essays in this text examine interculturalism in Europe focusing on social diversity and social policy within the European Union Issues addressed include racism and social policy migrant communities in Europe ethnic diversity intercultural education and housing and segregation

Haines, Karen Rosenblum, 1999-10-30 Few issues have provoked as much controversy over the last decade as illegal immigration While some argue for the need to seal America's borders and withdraw all forms of social and governmental support for illegal migrants and their children others argue for humanitarian treatment including legalization for people who fill widely acknowledged needs in American industry and agriculture and have left home country situations of economic hardship or political persecution The study of illegal immigration necessarily confronts a broad range of migrants from the familiar border crossers to those who enter illegally and overstay their visas to the many unrecognized refugees who enter the country to seek protection under U S asylum law The subject also demands attention to American society's responses to these newcomers responses that often focus on limited elements of a complex issue A comprehensive up to date review of this volatile subject this book provides an accessible balanced introduction to the subject Covering the full range of illegal immigrants from Mexican border crossers to Central American refugees illegal Europeans and smuggled Chinese the book considers the kind of work the migrants do and the public response to them The work is divided into four parts Concepts Policies and Numbers The Migrants and Their Work The Responses and Illegal Immigration in Perspective      *The Impact of Radical Right-Wing Parties in West European Democracies* M. Williams, 2006-09-02 This book contends that far right parties play pivotal roles in setting the tone of political debates shaping the political party system and structuring government policy Increasingly as national governments attempt to cope with new realities of greater global migration strained welfare states and threats of foreign terror opportunities have opened for parties of the far right to position themselves strategically

West European Immigration and Immigrant Policy in the New Century Anthony M. Messina, 2002-06-30 Few if any phenomena affecting Western Europe as a whole since 1945 have been more far reaching in their immediate effects or more potentially destabilizing to politics and society over the long term than the accumulative experience of immigration Messina and his contributors analyze why the major immigrant receiving states of Western Europe historically permitted and often abetted relatively high levels of postwar migration and they assess how contemporary governments attempt to govern immigration flows and manage the domestic social and political fallout which it inevitably yields The central purpose of the volume is to address these questions within the context of the decision making logics that have demonstratively governed postwar migration to Western Europe in each of its three distinct but interrelated waves or phases labor migration family migration and humanitarian or forced migration Messina demonstrates that postwar migration to Western Europe in all of its phases has been governed by a set of mutually reinforcing and mostly compatible logics Of these the economic the humanitarian and the political the political has predominated over time and is likely to continue doing so into the indefinite future A major cross disciplinary analysis that will appeal to political scientists sociologists and general researchers and scholars of ethnicity race relations and comparative public policy     The Cambridge Survey of World Migration Robin Cohen, 1995-11-02 This extensive survey of migration in the modern world begins in the sixteenth century with the establishment of European colonies overseas and covers the history of migration to the late twentieth century when global communications and transport systems stimulated immense and complex flows of labour migrants and skilled professionals In ninety five contributions leading scholars from twenty seven different countries consider a wide variety of issues including migration patterns the flights of refugees and illegal migration Each entry is a substantive essay supported by up to date bibliographies tables plates maps and figures As the most wide ranging coverage of migration in a single volume The Cambridge Survey of World Migration will be an indispensable reference tool for scholars and students in the field

areas including education labour immigration media and urban planning While anti racist struggles during the twentieth century were largely pitched against overt forms of racism e g pogroms genocide segregation apartheid and ethnic cleansing it has become increasingly apparent that there are other less visible forms of racism These subtler incarnations are of special interest to the contributors The intent of *Race Racialization and Antiracism in Canada and Beyond* is to probe systemic forms of racism as well as to suggest strategies for addressing them The collection is organized by themes pertinent to political and social expressions of racism in Canada and the wider world such as the state and its mediation of race education and the perpetuation of racist marginalization and the role of the media The contributors argue that in order to effectively combat racism various methodological approaches are required approaches that are reflective of the diversity of the world we seek to understand

process in the past Featuring detailed case studies of the UK France and Italy as three mature multi party democracies where the extreme right was on the rise during the past decade this work will be of great interest to students and scholars of populism extremism European politics and comparative and party politics
