Politics in Ireland Maura Adshead, Jonathan Tonge, 2009-04-21 *Politics in Ireland* is the first major text to provide an accessible and systematic analysis of the politics of Ireland North as well as South With the development of a new Northern Irish political system and increasing links across the island the authors argue that the time is ripe to study together the two polities which share so much of a common history but which have had very different evolutions through the 20th century Drawing upon an exceptionally wide range of sources and their own original research the authors deploy a thematic approach to the study of political institutions political behaviour and public policy in both the Republic and Northern Ireland in order to produce a detailed but highly readable assessment of governance and politics in both political systems This approach enables them both to outline the differences and similarities between the polities and to explain how they relate to the wider world in particular to the UK and to Europe

Sikhs in Europe Kristina Myrvold, 2016-04-01 Sikhs in Europe are neglected in the study of religions and migrant groups previous studies have focused on the history culture and religious practices of Sikhs in North

America and the UK but few have focused on Sikhs in continental Europe This book fills this gap presenting new data and analyses of Sikhs in eleven European countries examining the broader European presence of Sikhs in new and old host countries Focusing on patterns of migration transmission of traditions identity construction and cultural representations from the perspective of local Sikh communities this book explores important patterns of settlement institution building and cultural transmission among European Sikhs *Globalization and Transnational Migrations* Oluyato Adesina,2009-03-26

The past three decades have proved extremely challenging for Africa and its peoples both at home and in the Diaspora Coincidentally these were also the decades that globalization reached maturity and that the world became more interconnected and interdependent The paradox of globalization for Africa has included increase in marginalization poverty inequality migration and instability This book highlights global asymmetries by interfacing the notion of one world or flat world with the challenges thrown up by transnational migration brain drain citizenship identity multiculturalism religion and ethnicity It presents researches and discourses on globalization across disciplines and across regions and fosters ongoing inquiry into important assumptions beliefs and perspectives about the implications of globalization for Africa and Africans It covers major areas of concern movement of refugees xenophobia transition from economic migration to citizenship challenges of integration and conflict of identity The authors investigate the experiences of Africans in various economic sectors and geographical locations and the trends in hegemony inequality cultural changes and the dynamics of social movements and struggles Through illuminating narratives and copious explanations this book assists readers to make sense of globalization and the position of Africa and Africans in it **National Identity** Richard R. Verdugo,Andrew

Milne,2016-06-01 National identity has been the subject of much controversy and debate Some have even suggested dropping the concept entirely One group Essentialists argue that national identity is fixed cultural based on birth and ancestry Another viewpoint is posited by Postmodernists who argue that national identity is malleable invented or imagined As alternatives some have suggested that national identity is a hybrid of both Essentialist and Postmodernist views And still others bypass this argument and suggest that national identity should be based on civic factors such as shared values and norms about citizenship While controversy and debate are healthy exercises in any science at some point order must be established if science is to proceed The present volume is based on the idea that national identity is an ideal type concept it does not completely capture reality but is used for analytic purposes In addition rather than focusing on these theoretical debates we pursue research with the idea that results from research will contribute to the field of national identity Three areas of national identity are discussed theoretical national and individual Two chapters focus on the major theories about national identity provide critiques and make suggestions about the topic In section two six chapters provide case studies of national identity on Scotland Ireland Russia Bosnia Herzegovina Germany and France In section three two case studies focus on immigrants and the challenges they face in forming their identities especially identifying with their host countries Belgium

and the United Kingdom Several important conclusions may be gleaned from the contributions of the present volume To begin with while national identity is a slippery concept if the field wishes to move beyond debate about fundamentals it would be well advised to view the concept as an ideal type as suggested by the great German scholar Max Weber Secondly the case studies included in the present volume indicate that national identity is not only based on ethnicity and culture but on such external factors as governance regimes and their changes economic crises wars and other forms of aggressive activity and social demographic changes in a population These factors affect a population at the national level For immigrants at the individual level developing national identity is greatly affected by four interrelated factors 1 the degree to which they are accepted by members of the host society 2 immigrants language skills and physical appearances 3 how well they are able to balance their host national identity their ethnic identity and acceptance of their native country 4 and their generational status Generally at the national and individual levels context and circumstances matter in developing national identity

McBride, Shane O'Neill, 2013-10-18 This volume brings together a range of theoretical responses to issues in Irish politics. Its organising ideas—recognition, equality, and democracy—set the terms of political debate within both jurisdictions. For some, there are significant tensions between the grammar of recognition, concerned with esteem, respect, and the symbolic aspects of social life, and the logic of equality, which is primarily concerned with the distribution of material resources and formal opportunities. While for others, tensions are produced rather by certain interpretations of these ideas, while alternative readings may, by contrast, serve as the basis for a systematic account of social and political inequality. The essays in this collection will explore these interconnections with reference to the politics of Northern Ireland and the Republic. The Republic has gone through a period in which its constitution was the focus for a liberal politics aimed at securing personal autonomy, while Northern Ireland's political landscape has been shaped by the problem of securing political autonomy and democratic legitimacy. While the papers address key questions facing each particular polity, the issues themselves have resonances for politics on each side of the border.

Educational Policies and Practices of English-Speaking Refugee Resettlement Countries, 2019-05-27 Since 2014, the international community has felt overwhelmed by refugees and asylum seekers searching for opportunities in which to rebuild their lives. Indeed, large numbers can result in turmoil and concern in resettlement countries and with national citizens. A climate of fear can result, especially if perpetuated by politicians and media that suggest negative effects resulting from immigration. Caught in the crossfire of social and political disagreements about migration are children, most of whom are not included in decisions to leave their homelands. This edited book examines their academic challenges from the perspective of the six English-speaking refugee resettlement countries. Our hope is not only to compare challenges but also to describe successes by which teachers and policymakers can consider new approaches to help refugee and asylum-seeking children. Educational Policies and Practices of English-Speaking Refugee Resettlement Countries offers perspectives from established and new scholars examining educational situations for refugees and asylum seekers. The top three resettlement countries are the United States, Canada, and Australia. For its size, New Zealand is also proportionately a country of high resettlement. New to resettlement are the United Kingdom and the Republic of Ireland. Thus, this collection includes wisdom from countries that began resettlement during World War Two, as well as newcomers to the process. In 2018, UNHCR numbers of displaced people reached a record high of 68.5 million. Policymakers, teachers, social service providers, and the general public need to understand ways to help resettled refugees become productive members in their new countries of residence.
