Realism And Sociology Anti Foundationalism Ontology And Social Research:

Realism and Sociology Justin Cruickshank, 2003 Methodological debates in the social sciences have increasingly focused on issues relating to epistemology This title contributes to the debate charting a middle ground between postmodernism and positivism

Realism and Sociology Justin Cruickshank, 2007-01-24 In recent years methodological debates in the social sciences have increasingly focused on issues relating to epistemology Realism and Sociology makes an original contribution to the debate charting a middle ground between postmodernism and positivism Critics often hold that realism tries to assume some definitive account of reality Against this it is argued throughout the book that realism can combine a strong definition of social reality with an anti foundational approach to knowledge The position of realist anti foundationalism that is argued for is developed and defended via the use of immanent critiques These deal primarily with post Wittgensteinian positions that seek to define knowledge and social reality in terms of rule following practices within different forms of life and language games Specifically the argument engages with Rorty's neo pragmatism and the structuration theory of Giddens The philosophy of Popper is also drawn upon in a critically appreciative way While the positions of Rorty and Giddens seek to deflate the claims of grand theory albeit in different ways they both end up with definitive claims about knowledge and reality that preclude social research By avoiding the general deflationary approach that relies on reference to practices realism is able to combine a strong social ontology with an anti foundational epistemology and thus act as an underlabourer for empirical research

Philosophy of Social Science Ted Benton, Ian Craib, 2023-02-09 Philosophers and social scientists share a common goal to explore fundamental truths about ourselves and the nature of the world in which we live But in what ways do these two distinct disciplines inform each other and arrive at these truths This third revised edition of this highly regarded text directly responds to such issues as it introduces students to the philosophy of social science This classic text has been brought up to date with a new introduction and commentaries reflecting on the original chapters in the context of more recent developments Two brand new chapters discuss critical social science and one of the most pressing issues concerning social scientists today how we interrogate human society's complex relationship with nature and its impact on biodiversity and climate change The book Clearly introduces the theoretical underpinnings of social science assuming no prior knowledge Addresses critical issues relating to the nature of social science Interrogates the relationship between social science and natural science Encompasses traditional and contemporary perspectives Introduces and critiques a wide range of approaches from empiricism and positivism to post structuralism and rationalism Written in an engaging and student friendly style the book introduces key ideas and concepts while raising questions and opening debates A cornerstone text in the Traditions in Social Theory series this book remains essential reading for all students of social theory and social science research

Making Realism Work Bob Carter, Caroline New, 2005-10-09 In this innovative book theorists and researchers from various social science disciplines explore the

potential of realist social theory for empirical research The examples are drawn from a wide range of fields health and medicine crime housing sociolinguistics development theory and deal with issues such as causality probability and reflexivity in social science Varied and lively contributions relate central methodological issues to detailed accounts of research projects which adopt a realist framework Making Realism Work provides an accessible discussion of a significant current in contemporary social science and will be of interest to social theorists and social researchers alike

(Mis)recognition, Social Inequality and Social Justice Terry Lovell, 2007-09-12 This collection of essays considers some of the conceptual and philosophical contentions that Nancy Fraser's work has provoked presenting some compelling examples of its analytical power in a range of contexts

Critical Realism Justin Cruickshank, 2003 An introduction to the difference that critical realism can make to contemporary social sciences covering cultural studies feminism globalization heterodox economics education policy the self and the underclass debate

A Social Theory of the Nation-State Daniel Chernilo, 2008-03-25 A Social Theory of the Nation State construes a novel and original social theory of the nation state It rejects nationalistic ways of thinking that take the nation state for granted as much as globalist orthodoxy that speaks of its current and definitive decline

Critical Realism and Composition Theory Donald Judd, 2005-07-05 This volume examines expressivist cognitivist and social constructivist theories within composition theory and critiques the epistemological focus of modern composition theory and its neglect of the ontological foundations

Critical Realism, Post-positivism and the Possibility of Knowledge Ruth Groff, 2004-07-31 Groff defends realism about causality through close discussions of Kant Hilary Putnam Brian Ellis and Charles Taylor among others In so doing she affirms critical realism but with several important qualifications In particular she rejects the theory of truth advanced by Roy Bhaskar She also attempts to both clarify and correct earlier critical realist attempts to apply realism about causality to the social sciences By connecting issues in metaphysics and philosophy of science to the problem of relativism Groff bridges the gap between the philosophical literature and broader debates surrounding socio political theory and poststructuralist thought This unique approach will make the book of interest to philosophers and socio political theorists alike

Crisis System Petter Naess, Leigh Price, 2016-06-17 This book throws light onto the nature and causes of three different but strongly interconnected crises in contemporary societies worldwide an economic crisis an ecological crisis and a normative moral and political crisis These crises are reflected in the profoundly inequitable distribution of wealth resources and life opportunities around the world If we follow the causal roots of these crises we are led back to an inherent dynamic in the capitalist economic system itself discursively expressed as neoclassical mainstream economics For instance by conflating human needs with market demand mainstream economics disregards the needs of those who do not have sufficient purchasing power as well as any needs that cannot be quantified or monetised in some way Mainstream economics also ignores the notion of natural limits Furthermore it seems that everything that is quantifiable is potentially for sale and this results in the substitution of nature indigenous cultural traditions and various life

forms with commodities and human capital The latter is defined as the skills instrumental for continual economic growth Besides critiquing the academic discipline of economics this book also points to a number of dysfunctional and crisis prone structures and practices of substantive economic life It will be of interest to students and scholars working in philosophy economics and environmental studies

Qualitative Methods in Migration Studies Theodoros Iosifides, 2011 Moving away from the quantitative and empiricist positivist approaches that have often characterised migration research *Qualitative Methods in Migration Studies* explores in a concise but comprehensive way the key issues involved in researching migratory phenomena in a qualitative manner It addresses themes including the basic characteristics of contemporary migration qualitative research into social processes related to migration and the relationship between theory research design and practice and will be of interest to students and researchers in migration across the social sciences

The Paradox of Generosity Christian Smith, Hilary Davidson, 2014-08-01 Determining why when and to whom people feel compelled to be generous affords invaluable insight into positive and problematic ways of life Organ donation volunteering and the funding of charities can all be illuminated by sociological and psychological perspectives on how American adults conceive of and demonstrate generosity Focusing not only on financial giving but on the many diverse forms generosity can take Christian Smith and Hilary Davidson show the deep impact usually good sometimes destructive that giving has on individuals *The Paradox of Generosity* is the first study to make use of the cutting edge empirical data collected in Smith's groundbreaking multidisciplinary five year Science of Generosity Initiative It draws on an extensive survey of 2 000 Americans more than sixty in depth interviews with individuals across twelve states and analysis of over 1 000 photographs and other visual materials This wealth of evidence reveals a consistent link between demonstrating generosity and leading a better life more generous people are happier suffer fewer illnesses and injuries live with a greater sense of purpose and experience less depression Smith and Davidson also show however that to achieve a better life a person must practice generosity regularly random acts of kindness are not enough Offering a wide range of vividly illustrative case studies this volume will be a crucial resource for anyone seeking to understand the true impact and meaning of generosity

Philosophy of Language and the Challenge to Scientific Realism Christopher Norris, 2004-06-02 In this book Christopher Norris develops the case for scientific realism by tackling various adversary arguments from a range of anti realist positions Through a close critical reading he shows how they fail to make adequate sense on any rational consistent and scientifically informed survey of the evidence Along the way he incorporates a number of detailed case studies from the history and philosophy of science Norris devotes much of his discussion to some of the most prominent and widely influential source texts of anti realism Also included are the sophisticated versions of verificationism developed albeit in very different ways by thinkers such as Michael Dummett and Bas van Fraassen Central to Norris's argument is a prolonged engagement with the once highly influential but nowadays neglected work of Norwood Russell Hanson This book will be welcomed especially by readers who possess some

knowledge of the background debate and who wish to deepen and extend their understanding of these issues beyond an introductory level **Institutions and Ideology** Peter Walgenbach,2009-09-01 Contributes to the literature on the sociology of organizations and management especially to sociological institutionalism This title covers the empirical areas that range from technology and software development the brewing industry custodial facilities to the organization of birthing

Rethinking Marxism Jolyon Agar,2014-02-03 First published in 2006 Routledge is an imprint of Taylor Francis an informa company *Working with Qualitative Data* William Gibson,Andrew Brown,2009-05-18 Working with Qualitative Data provides a practical and accessible introduction to how to develop and apply strategies for the analysis of qualitative data by exploring the ways in which analysis is related to all aspects of research By situating analysis in the context of the whole research process this book helps the reader to introduce an analytical component to every stage of doing research from designing a project reviewing the literature through the various stages of gathering data to the process of writing up Through practical examples the book maps out strategies for developing analytic frameworks in relation to all aspects of research and demonstrates the ways in which such frameworks can be used in relation to various sorts of data In contrast to existing qualitative data analysis texts this book offers a unified approach to the process of analysis within qualitative research It will be of great use to students and researchers across the full range of social health and education sciences

Interpretation and Social Knowledge Isaac Ariail Reed,2024-05-31 For the past fifty years anxiety over naturalism has driven debates in social theory One side sees social science as another kind of natural science while the other rejects the possibility of objective and explanatory knowledge Interpretation and Social Knowledge suggests a different route offering a way forward for an antinaturalist sociology that overcomes the opposition between interpretation and explanation and uses theory to build concrete historically specific causal explanations of social phenomena Emergentist Marxism Sean Creaven,2013-04-15 In tackling emergentist Marxism in depth this well written volume demonstrates that critical realism and materialist dialectics are indispensable to theorizing the functioning of complex social and physical systems Author Sean Creaven investigates Marx s dialectics of being and consciousness forces and relations of production base and superstructure class structure and class conflict and demonstrates how they allow the social analyst to conceptualize geo history as embodying a tendential evolutionary directionality rather than as simply random or indeterminate in terms of its outcomes For those interested in social and political theory Marxism and communism and contemporary social theory this outstanding volume is an in important read and a valuable resource **Reality and Self-Realization** MinGyu Seo,2014-03-21 Since the

publication of Roy Bhaskar s A Realist Theory of Science in 1975 critical realism has been evolved as one of the new developments in the areas of philosophy of natural and social science which offers an alternatively fresh view to the existing theories including positivism and post modernism Bhaskar s intellectual movement which is now fully international and multi disciplinary and continues to influence the philosophies of natural and social science has transformed into Dialectical Critical

Realism hereafter DCR and the philosophy of meta Reality MinGyu will conclude that his anti anthropic Non duality continues through all the steps of Bhaskar s thought maintaining the consistency of his scientific metaphysical and spiritual journey The anti anthropic motif is fully realized in the philosophy of Non duality the constellational identification of dualism duality and non duality in his meta Reality Defending Bhaskar against Collier Agar and Morgan MinGyu tries to show how its anti anthropic and non dualistic foundation is sustained through the whole of Bhaskar s journey involving a transformation of its subject matters from reality to the dialectic of reality to the real truth underlying the former stages This book provides an indispensable resource for all students of philosophy and the human sciences **Reframing the Social** Poe Yu-ze Wan,2011

Poe Yu ze Wan argues for a critical realist and systemist social ontology designed to shed light on current debates in social theory concerning the relationship of social ontology to practical social research and the nature of the social It explores the works of the systems theorist Mario Bunge in comparison with the approach of Niklas Luhmann and critical social systems theorists to challenge the commonly held view that the systems based approach is holistic in nature and necessarily downplays the role of human agency
