The Realism-Antirealism Debate in the Age of Alternative Logics Shahid Rahman, Giuseppe Primiero, Mathieu Marion, 2011-09-22 The relation between logic and knowledge has been at the heart of a lively debate since the 1960s On the one hand the epistemic approaches based their formal arguments in the mathematics of Brouwer and intuitionistic logic Following Michael Dummett they started to call themselves antirealists Others persisted with the formal background of the Frege Tarski tradition where Cantorian set theory is linked via model theory to classical logic Jaakko Hintikka tried to unify both traditions by means of what is now known as explicit epistemic logic Under this view epistemic contents are introduced into the object language as operators yielding propositions from propositions rather than as metalogical constraints on the notion of inference The Realism Antirealism debate has thus had three players classical logicians intuitionists and explicit epistemic logicians The editors of the present volume believe that in the age of Alternative Logics where manifold developments in logic happen at a breathtaking pace this debate should be revisited Contributors to this volume happily took on this challenge and responded with new approaches to the debate from both the explicit and the implicit epistemic point of view

Realism and Anti-Realism Stuart Brock, Edwin Mares, 2014-12-18 There are a bewildering variety of ways the terms realism and anti realism have been used in philosophy and furthermore the different uses of these terms are only loosely connected with one another Rather than give a piecemeal map of this very diverse landscape the authors focus on what they see as the core concept realism about a particular domain is the view that there are facts or entities distinctive of that domain and their existence and nature is in some important sense objective and mind independent The authors carefully set out and explain the different realist and anti realist positions and arguments that occur in five key domains science ethics mathematics modality and fictional objects For each area the authors examine the various styles of argument in support of and against realism and anti realism show how these different positions and arguments arise in very different domains evaluate their success within these fields and draw general conclusions about these assorted strategies Error theory fictionalism non cognitivism relativism and response dependence are taken as the most important positions in opposition to the realist and these are explored in depth Suitable for advanced level undergraduates the book offers readers a clear introduction to a subject central to much contemporary work in metaphysics epistemology and philosophy of language

A Realist Approach for Qualitative Research Joseph A. Maxwell, 2012 This ground breaking book makes the case for adopting a realist philosophical perspective for qualitative research Joseph Maxwell argues for critically applying a realist ontology to a number of important theoretical and methodological issues This can provide a stronger justification for what qualitative researchers do he contends and significantly contribute to current theories and practices The book outlines critical realism and considers its implications for how we conceptualize meaning and culture causation and diversity The author applies critical realist ideas and approaches to the design and methods of qualitative research and presents two in depth case studies

of projects he conducted describing how realist and other perspectives informed the research the methods and the conclusions *Qualitative Inquiry and the Politics of Evidence* Norman K Denzin, Michael D Giardina, 2016-09-16 What is evidence in qualitative inquiry and how is it evaluated What is true or false in research is strongly influenced by socially defined criteria and by the politics of academia In providing an alternative to conservative science qualitative researchers are often victimized by these politics The use of qualitative evidence within the policy arena is also subject to social and political factors Within qualitative inquiry itself evidence is defined differently in different discourses law medicine history cultural or performance studies The interdisciplinary international group of contributors to this volume address these questions in an attempt to create evidential criteria for qualitative work Sponsored by the International Center for Qualitative Inquiry

Mind Ascribed Bruno Mölder, 2010 This book provides a thoroughly worked out and systematic presentation of an interpretivist position in the philosophy of mind of the view that having mental properties is a matter of interpretation Bruno Mölder elaborates and defends a particular version of interpretivism the ascription theory which explicates the possession of mental states with contents in terms of their canonical ascribability and shows how it can withstand various philosophical challenges Apart from a defence of the ascription theory from the objections commonly directed against interpretivism the book provides a critical analysis of major alternative accounts of mental state possession as well as the interpretivist ideas originating from Donald Davidson and Daniel Dennett The viability of the approach is demonstrated by showing how one can treat mental causation as well as the faculties closely connected with consciousness perception and the awareness of one's own mental states in the interpretivist framework Series A

Social Imaginary and the Metaphysical Discourse Christoforos Bouzanis, 2023-05-05 This book departs from approaches to truth in social science and ideas in philosophy that connect truth to the ability of language to fulfil certain real world conditions of objectivity Pointing to an extra linguistic level in our cognition at which scientific creativity occurs it highlights the manner in which epistemic communities share work on and modify not only the world imaginaries that they endorse but also those world views that they reject or which partially overlap with their own Through the concept of the social imaginary the author explores the theoretical interrelations among various metaphysical world imageries by which we organise our scientific understanding of the world and our expectations of experience thus shedding light on the manner in which social ontology can inform our practices of sharing belief A study at the intersection of metaphysics and social theory *The Fundamental Predicament of Contemporary Philosophy and the Social Sciences* will appeal to scholars of sociology and philosophy with interests in questions of ontology and epistemology

Essays in Logic and Ontology Jacek Malinowski, Andrzej Pietruszczak, 2006 The aim of this book is to present essays centered upon the subjects of Formal Ontology and Logical Philosophy The idea of investigating philosophical problems by means of logical methods was intensively promoted in Torun by the Department of Logic of Nicolaus Copernicus University during last decade Another aim of this book is to present to the philosophical and logical audience the activities of the

Torunian Department of Logic during this decade The papers in this volume contain the results concerning Logic and Logical Philosophy obtained within the confines of the projects initiated by the Department of Logic and other research projects in which the Torunian Department of Logic took part *Donald Davidson* Kirk Ludwig,2003-07-28 Table of contents

Realism and Truth Michael Devitt,1997-01-12 In a provocative thesis philosophy professor Michael Devitt argues for a thoroughgoing realism about the common sense and scientific physical world and for a corresponding notion of truthcontrary to the opinions of anti realists such as Putnam Dummett van Fraassen and others This second edition includes a new Afterword by the author *The Oxford Handbook of Epistemology* Paul K. Moser,2005-10-27 The Oxford Handbook of Epistemology contains 19 previously unpublished chapters by today s leading figures in the field These chapters function not only as a survey of key areas but as original scholarship on a range of vital topics Written accessibly for advanced undergraduates graduate students and professional philosophers the Handbook explains the main ideas and problems of contemporary epistemology while avoiding overly technical detail *Philosophy of Science Today* Peter Clark,Katherine Hawley,2003 A state of the art guide to the fast developing area of the philosophy of science An eminent international team of authors covers a wide range of topics at the intersection of philosophy and the sciences including causation realism methodology and epistemology *SAGE Handbook of Mixed Methods in Social & Behavioral Research* Abbas Tashakkori,Charles Teddlie,2021-06-17 Surveying the differing viewpoints and disciplinary approaches to using mixed methods this volume helps readers explore the answers to a wide range of key questions in the field including Can using mixed methods offset the disadvantages that certain methods have by themselves What criteria can a researcher use to select the best mixed methods design for his or her project and What are the points of agreement and controversy regarding design issues in mixed methods research This breakthrough Second Edition containing all new chapters examines all aspects of mixed methods research across a variety of disciplines Key Features Covers all aspects of inquiry from conceptualizing research to selecting methods analyzing and interpreting data and reporting findings Draws on the work of a mix of internationally recognized researchers as well as new and emerging researchers to provide a diversity of perspectives Gives specific examples from a wide range of disciplines to help readers understand the issues and controversies in this evolving area Presents rich material for discussion and new ideas for implementing mixed methods research to provide readers with a cutting edge resource Provides pedagogical tools such as learning objectives discussion questions and exercises and extensive cross referencing **Triangulation** Maria Cristina Amoretti,Gerhard Preyer,2013-05-02 This volume breaks new grounds by bringing together a great variety of innovative contributions on triangulation epistemology and mind The notion of triangulation developed by Donald Davidson 1917 2003 during the last two decades of his life has changed our understanding of the relationship between subjective intersubjective and objective and shed new light on concepts such as externalism internalism communication interpretation and language At the same time however it has been strongly criticized

for several aspects The papers collected in this volume written by established contributors aim to provide new insights into the contemporary debate on triangulation The upshot is not only a deeper understanding of Davidson s ideas but also a new appreciation of some central problems of epistemology and the philosophy of mind with regard to adjoining disciplines such as for instance cognitive sciences and the philosophy of language *Common Sense, Reasoning, & Rationality* Renée Elio,2002 While common sense and rationality have often been viewed as two distinct features in a unified cognitive map this volume engages with this notion and comes up with novel and often paradoxical views of this relationship Donald Davidson on Truth, Meaning, and the Mental Gerhard Preyer,2012-09-06 The analysis of the connections between truth meaning thought and action poses a major philosophical challenge one that Donald Davidson addressed by establishing a unified theory of language and mind This volume offers a reappraisal of Davidson s intellectual legacy Twelve specially written essays by leading philosophers in the field illuminate a range of enduring philosophical problems and engage in particular with Ernie Lepore and Kirk Ludwig s interpretation of Davidson s philosophy The collection affirms Davidson s continuing influence on the study of language mind and action and offers a variety of new perspectives on his work

Subjective, Intersubjective, Objective Donald Davidson,2001-09-27 Subjective Intersubjective Objective is the long awaited third volume of philosophical writings by Donald Davidson whose influence on philosophy since the 1960s has been deep and broad His first two collections published by OUP in the early 1980s are recognized as contemporary classics Now Davidson presents a selection of his work on knowledge mind and language from the 1980s and the 1990s We all have knowledge of our own minds knowledge of the contents of other minds and knowledge of the shared environment Davidson examines the nature and status of each of these three sorts of knowledge and the connections and differences among them Along the way he has illuminating things to say about truth human rationality and the relations among language thought and the world This new volume offers a rich and rewarding feast for anyone interested in philosophy today and is essential reading for anyone working on its central topics **Reference and Referring** William P. Kabasenche,Michael

O'Rourke,Matthew H. Slater,2012 Original essays on reference and referring by leading scholars that combine breadth of coverage with thematic unity These fifteen original essays address the core semantic concepts of reference and referring from both philosophical and linguistic perspectives After an introductory essay that casts current trends in reference and referring in terms of an ongoing dialogue between Fregean and Russellian approaches the book addresses specific topics balancing breadth of coverage with thematic unity The contributors all leading or emerging scholars address trenchant neo Fregean challenges to the direct reference position consider what positive claims can be made about the mechanism of reference address the role of a theory of reference within broader theoretical context and investigate other kinds of linguistic expressions used in referring activities that may themselves be referring expressions The topical unity and accessibility of the essays the stage setting introductory essay and the comprehensive index combine to make *Reference and Referring* along

with the other books in the Topics in Contemporary Philosophy series appropriate for use in advanced undergraduate and graduate courses

Donald Davidson Urszula M. Zeglen, 1999-02-25 Donald Davidson has made enormous contributions to the philosophy of action epistemology semantics and philosophy of mind and today is recognized as one of the most important analytical philosophers of the late twentieth century Donald Davidson Truth Meaning and Knowledge addresses Davidson's writings on epistemology and theory of language with their implications of ontology and philosophy of mind the central issue of whether truth is the ultimate goal of enquiry challenged by contributions from Richard Rorty and Paul Horwich Davidson's approach to semantics and applied linguistics as addressed by Kirk Ludwig Gabriel Segal Peter Pagin Stephen Neale Herman Cappelen and Ernie Lepore and Reinaldo Elugardo Davidson's advances in the philosophy of mind in relation to the views of Willard V Quine John McDowell and Peter F Strawson in essays by Roger Gibson and Anita Avramides

Belief's Own Ethics Jonathan E. Adler, 2006-01-20 The fundamental question of the ethics of belief is What ought one to believe According to the traditional view of evidentialism the strength of one's beliefs should be proportionate to the evidence Conventional ways of defending and challenging evidentialism rely on the idea that what one ought to believe is a matter of what it is rational prudent ethical or personally fulfilling to believe Common to all these approaches is that they look outside of belief itself to determine what one ought to believe In this book Jonathan Adler offers a strengthened version of evidentialism arguing that the ethics of belief should be rooted in the concept of belief that evidentialism is belief's own ethics A key observation is that it is not merely that one ought not but that one cannot believe for example that the number of stars is even The cannot represents a conceptual barrier not just an inability Therefore belief in defiance of one's evidence or evidentialism is impossible Adler addresses such questions as irrational beliefs reasonableness control over beliefs and whether justifying beliefs requires a foundation Although he treats the ethics of belief as a central topic in epistemology his ideas also bear on rationality argument and pragmatics philosophy of religion ethics and social cognitive psychology

Knowing the Structure of Nature S. Psillos, 2009-04-30 In this sequel to the highly acclaimed Scientific Realism How Science Tracks Truth Psillos discusses recent developments in scientific realism and explores realist theses and commitments He examines the structuralist turn in the philosophy of science and offers a framework within which inference to the best explanation can be defended
