**The Politics of the Earth** John S. Dryzek, 2013 John Dryzek provides an accessible introduction to thinking about the environment by looking at the way people use language on environmental issues He analyses the main discourses from the last 30 years and those likely to be influential in future

**Liberation Ecologies** Richard Peet, Michael Watts, 2004-08-02 **Liberation Ecologies** brings together some of the most exciting theorists in the field to explore the impact of political ecology in today's developing world

The book casts new light on the crucial interrelations of development social movements and the environment in the South the bigger half of our planet and raises questions and hopes about change on the global scale The in depth case material is drawn from across the Developing World from Latin America Africa and Asia The issues raised in contemporary political economic and social theory are illustrated through these case studies Ultimately Liberation Ecologies questions what we understand by development be it mainstream or alternative and seeks to renew our sense of nature s range of possibilities

**Critical Political Studies** Abigail B. Bakan,Eleanor MacDonald,2002-03-25 Written as a tribute to the remarkable intellectual career of Colin Leys the debates in this book deal with some of the most pressing problems confronting the majority of citizens in both first world and third world contexts Their contributions provide the confidence to pursue new possibilities that permit a more optimistic if critical outlook Topics covered include contemporary debates about globalization and the nation state African development prospects for British socialism after Blair social movements and current issues in political and social theory Contributors include Laurie Adkin University of Alberta Abigail Bakan Bruce Berman Queen s University Manfred Bienefeld Carleton University Alex Callinicos University of York UK Bonnie Campbell University of Quebec at Montreal Michael Chege University of Florida Radhika Desai University of Victoria Lauren Dobell PhD candidate Oxford University Phil Goldman Queen s University Banu Helvacioğlu Bilkent University Turkey Robert Jessop University of Lancaster UK Colin Leys emeritus Queen s University Eleanor MacDonald Marguerite Mendell Concordia University Leo Panitch York University Anne Phillips London School of Economics and Political Science and John Saul Atkinson College York University      Towards an Environment Research Agenda A. Winnett,2004-02-25 This is the third volume of papers in the topical area of environmental management Arising from work done by the International Centre for the Environment at the University of Bath the papers address inter disciplinary environmental themes particularly from a business and management perspective      *Critical Political Ecology* Tim Forsyth,2003 Describes new ways of looking at environmental science and politics and discusses the problems of formulating and implementing environmental policy particularly in the global arena and in developing countries      "*Landscape Imagery, Politics, and Identity in a Divided Germany, 1968?989* " Catherine Wilkins,2017-07-05 Landscape Imagery Politics and Identity in a Divided Germany 1968 1989 explores the communicative relationship between German landscape painting and the viewing public that developed in the wake of the student revolutions of the late 1960s The book demonstrates that contrary to some historical thinking more similarities than differences characterized the sociopolitical concerns of East and West Germans during the late Cold War Era and that it was these shared issues that were reflected in the revival of the Romantic painting genre Catherine Wilkins focuses on recovering the agency of the individual artist and in revising historiography with sensitivity to narration from below Interdisciplinary in nature art historians can benefit from the study s analysis of images and artists not widely known outside of Germany Additionally the consolidation of statistics and data regarding German postwar cultural policy are relevant for political and

cultural historians The author contributes to the ongoing multidisciplinary debates regarding Histoire Crois in arguing that a clear dichotomy between East Germany and West Germany did not exist but rather that the residents of both nations shared a concern over some of the same issues of the period and memory studies by using images as primary historical sources able to be employed in the recovery of potentially subversive memory and identity Issues related to gender relations environmentalism and spiritual belief are addressed by Wilkins with appeal for scholars working with those particular themes Poststructuralist and literary theorists as well can find arguments supporting an alternative means of writing history through artworks and private memories

**Post-Ecologist Politics** Ingolfur Blühdorn, 2012-10-12 Since the late 1980s ecological thought and the European eco movement have gone through a phase of fundamental transformation which has been widely acknowledged but not yet theorised in any satisfactory way This important text questions why radical ecological criticism has had so little impact on contemporary society despite the urgency of the issues it highlights The book offers a challenging theoretical critique of ecological thought itself

**Imagining the Nation in Nature** Thomas M. LEKAN, Thomas M Lekan, 2009-06-30 One of the most powerful nationalist ideas in modern Europe is the assertion that there is a link between people and their landscape Focusing on the heart of German romanticism the Rhineland Thomas Lekan examines nature protection activities from Wilhelmine Germany through the end of the Nazi era to illuminate the relationship between environmental reform and the cultural construction of national identity In the late nineteenth century anxieties about national character infused ecological concerns about industrialization spurring landscape preservationists to protect the natural environment In the Rhineland s scenic rivers forests and natural landmarks they saw Germany as a timeless and organic nation rather than a recently patchworked political construct Landscape preservation also served conservative social ends during a period of rapid modernization as outdoor pursuits were promoted to redirect class conscious factory workers and unruly youth from crass materialism to the German homeland Lekan s examination of Nazi environmental policy challenges recent work on the green Nazis by showing that the Third Reich systematically subordinated environmental concerns to war mobilization and racial hygiene This book is an original contribution not only to studies of national identity in modern Germany but also to the growing field of European environmental history

Table of Contents Introduction 1 Nature s Homelands The Origins of Landscape Preservation 1885 1914 2 The Militarization of Nature and Heimat 1914 1923 3 The Landscape of Modernity in the Weimar Era 4 From Landscape to Lebensraum Race and Environment under Nazism 5 Constructing Nature in the Third Reich Conclusion Abbreviations Notes Sources Acknowledgments Index Writing squarely within the idiom of the invented tradition and the imagined nation Thomas Lekan argues that in the wake of belated unification and at a time of rapid industrialization the German landscape came to be seen as a touchstone of national identity He questions the idea that those engaged in landscape preservation were simply antimodern and he challenges both scholars who have seen a straightforward continuity from pre 1933 preservationist sentiment to Nazism and those who have made

exaggerated claims for the Third Reich as the progenitor of modern green politics This is a welcome contribution to the literature on local and national identity joining works by Celia Applegate and Alon Confino and on the environmental history of modern Germany Both scholarly and original *Imagining the Nation in Nature* is an impressive achievement David Blackbourn Harvard University This important and timely book contributes to our understanding of German identity as well as to modern concepts of environmentalism and nature Lekan's valuable contribution elucidates the modern technocratic and therapeutic vision of preservation that linked Weimar and the Third Reich His analysis of Nazi bio nature is significant and thought provoking Alon Confino University of Virginia

*Deliberative Democracy and Beyond* John S. Dryzek, 2002 The past few years have seen a remarkable ferment in the theory of democracy *Deliberative Democracy and Beyond* is a critical tour through recent democratic theory by one of the leading political theorists in the field It examines the deliberative turn in democratic theory which argued that the essence of democratic legitimacy is to be found in authentic deliberations on the part of those affected by a collective decision The deliberative turn began as a challenge to established institutions and models of democracy but it has now been largely assimilated by these same institutions and models Drawing a distinction between liberal constitutionalist deliberative democracy and discursive democracy the author criticizes the former and advocates the latter He argues that a defensible theory of democracy should be critical of established power pluralistic reflexive in its questioning orientation to established traditions transnational in its capacity to extend across state boundaries ecological and dynamic in its openness to ever changing constraints upon and opportunities for democratization Dryzek's reinvigorated approach enables deliberative democracy to respond more effectively to the criticisms that have been leveled against it Oxford Political Theory presents the best new work in contemporary political theory It is intended to be broad in scope including original contributions to political philosophy and also work in applied political theory The series will contain works of outstanding quality with no restrictions as to approach subject matter Series Editors Will Kymlicka David Miller and Alan Ryan

**Social Movements in Global Politics** David West, 2014-01-30 *Social Movements in Global Politics* is a timely new account of the unconventional extra institutional activities of social movements In the face of impending global crises and stubborn conflicts a conventional view of politics risks leaving us confused and fatalistic feeling powerless because we are unaware of all that can be achieved by political means By contrast a variety of recent social movements ranging from those of women gays and lesbians and anti racists to environmentalists the Occupy movement and the Arab Spring demonstrate the enormous potential of political action beyond the institutional sphere of politics At the same time religious fundamentalists racial supremacists and ultra nationalists make clear that movements are not necessarily progressive and are often at odds with one another West highlights the many ways in which national and global institutions depend on a broader context of extra institutional action or what is in effect the formative dimension of politics He explores some of the major contributions of social movements from the genealogy of liberal democratic nation states sixties radicalism and the

new social movements to the politics of sexuality gender and identity the politicization of nature and climate and alter globalization The book also considers current theoretical approaches and sets out the basis for a critical theory of social movements This is a fresh and original account of social movements in politics and will be essential reading for any students and scholars interested in the challenges and the unpredictable potential of political action      *Environment and Global Modernity* Gert Spaargaren, Arthur P J Mol, Frederick H Buttel, 2000-06-02 This accomplished book argues that we can only make sense of environmental issues if we consider them as part of a more encompassing process of social transformation It asks whether there is an emerging consensus between social scientists on the central issues in the debate on environmental change and if concerns about the environment constitute a major prop to the process of globalization The book provides a thorough discussion of the central themes in environmental sociology identifying two traditions ecological modernization theory and risk society theory      **Radical Left Parties in Europe** Luke March, 2012-03-12 What has happened to the European radical left after the collapse of the USSR How has it reacted reformed even revived This new volume is one of the first to provide an overview of the main developments in contemporary European radical left parties those defining themselves as to the left of and not merely on the left of social democracy which are now an increasingly visible phenomenon in European party politics Unlike many of the existing studies it focuses on communist and non communist parties addresses their non parliamentary and international activity and takes a pan European perspective focusing on both Eastern and Western Europe March focuses on key contemporary left parties the nature of their radicalism and their ideological and strategic positions and overall addresses their current dynamics and immediate electoral prospects The book argues that radical left parties are still afflicted by existential crises about the nature of socialism and the future of communist parties in particular is under threat The most successful left parties are no longer extremist but present themselves as defending values and policies that social democrats have allegedly abandoned focus on pragmatism rather than ideology and increasingly orientate themselves towards government Providing a significant contribution to existing literature in the field this book will be of interest to students and scholars of comparative politics political parties and radical politics      **Policy Analysis in Germany** Sonja Blum, Klaus Schubert, 2018-03-01 This comprehensive study part of the International Library of Policy Analysis brings together for the first time a systemic overview of policy analysis activities in Germany Written by leading experts in the field including informed practitioners it outlines the development of the discipline identifies its role in academic education and research and examines its styles and methods The book also focuses on the role of policy analysis for governments and parliaments for parties social partners and interest groups By offering a rich and timely analysis of policy analysis in Germany this book is a valuable resource for academic exchange and for teaching particularly in the fields of political science social sciences economics and geography Moreover by its broad comprehensive understanding of policy analysis the book will be of practical relevance and shape the debate for the future development of policy analysis in

Germany and the different spheres where it is practised      **Risk, Environment and Modernity** Scott Lash, Bronislaw Szerszynski, Brian Wynne, 1996-01-31 This wide ranging and accessible contribution to the study of risk ecology and environment helps us to understand the politics of ecology and the place of social theory in making sense of environmental issues The book provides insights into the complex dynamics of change in risk societies      Historical Dictionary of the Green Movement Miranda Schreurs, Elim Papadakis, 2020-02-26 There are very serious environmental problems facing the planet Biodiversity loss has reached unprecedented levels Climate change is progressing so rapidly that within this century we are likely to see substantial sea level rise There has been dramatic loss of tropical rainforests Plastic pollution is killing wildlife and polluting our oceans Various movements old and new are addressing these green issues Civil society activism has taken on new strategies with the emergence of new technologies and global networks of green activists have formed A new generation of green activists are emerging and boldly criticizing the status quo At the same time in some parts of the world green movements that looked like they were beginning to gain a political foothold or were even doing quite well are in retreat The reasons are complex Some suffer from lack of funding and hostile political and legal environments Others are being attacked by populist politicians who see green activism as a threat The second edition of Historical Dictionary of the Green Movement contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced on green movements green politics green trends and major environmental agreements and events This book is an excellent resource for students researchers and anyone wanting to know more about the green movement      Solidarity Blues Richard Iton, 2003-06-19 A number of arguments have been made to explain the relative weakness of the American Left A preference for individualism the effects of prosperity and the miscalculations of different components of the Left including the labor movement have been cited among other factors as possible explanations for this puzzling aspect of American exceptionalism But these arguments says Richard Iton overlook a crucial factor the powerful influence of race upon American life Iton argues that the failure of the American Left lies in its inability to come to grips with the centrality of race in the American experience Placing the history of the American Left in an illuminating comparative context he also broadens our definition of the Left to include not just political parties and labor unions but also public policy and popular culture an important source for the kind of cultural consensus needed to sustain broad social and collectivist efforts Iton says In short by exposing the impact of race on the development of the American Left Iton offers a provocative new way of understanding the unique orientation of American politics
