## **Realism In Action Essays In The Philosophy Of The Social Sciences:**

**Realism in Action** Matti Sintonen, Petri Ylikoski, Kaarlo Miller, 2012-12-06 Realism in Action is a selection of essays written by leading representatives in the fields of action theory and philosophy of mind philosophy of the social sciences and especially the nature of social action and of epistemology and philosophy of science Practical reason reasons and causes in action theory intending and trying and folk psychological explanation are some of the topics discussed by these leading participants A particular emphasis is laid on trust commitments and social institutions on the possibility of grounding social notions in individual social attitudes on the nature of social groups institutions and collective intentionality and on common belief and common knowledge Applications to the social sciences include e g a look at the Erkl ren Verstehen controversy in economics and at constructivist and realist views on archeological reconstructions of the past *R. G. Collingwood: A Research Companion* James Connelly, Peter Johnson, Stephen Leach, 2014-11-20 R G Collingwood is an important 20th century historian archaeologist and philosopher whose works are the subject of continued interest analysis and study There is an unquestionable need to support this research activity with the provision of a reference guide which is fully up to date informed and authoritative The Companion therefore lists all primary and secondary material relevant to the study of Collingwood in all his fields of expertise historical theory philosophy and archaeology It also provides a guide to archive material relevant to his life together with sources and locations The resulting volume is an essential companion to the understanding of the life and thought of R G Collingwood

**Brouwer meets Husserl** Mark van Atten, 2006-11-08 Can the straight line be analysed mathematically such that it does not fall apart into a set of discrete points as is usually done but through which its fundamental continuity is lost And are there objects of pure mathematics that can change through time Mathematician and philosopher L E J Brouwer argued that the two questions are closely related and that the answer to both is yes To this end he introduced a new kind of object into mathematics the choice sequence But other mathematicians and philosophers have been voicing objections to choice sequences from the start This book aims to provide a sound philosophical basis for Brouwer s choice sequences by subjecting them to a phenomenological critique in the style of the later Husserl

*Conceptual Revolutions* Wenceslao J. González, 2011 **The Dynamics of Thought** Peter Gardenfors, 2005-07 This volume is a collection of some of the most important philosophical papers by Peter G rdenfors Spanning a period of more than 20 years of his research they cover a wide ground of topics from early works on decision theory belief revision and nonmonotonic logic to more recent work on conceptual spaces inductive reasoning semantics and the evolutions of thinking Many of the papers have only been published in places that are difficult to access The common theme of all the papers is the dynamics of thought Several of the papers have become minor classics and the volume bears witness of the wide scope of G rdenfors research and of his crisp and often witty style of writing The volume will be of interest to researchers in philosophy and other cognitive sciences *The Cognitive Foundations of Group Attitudes and Social Interaction* Andreas

Herzig, Emiliano Lorini, 2015-10-12 This book offers a widely interdisciplinary approach to investigating important questions surrounding the cognitive foundations of group attitudes and social interaction The volume tackles issues such as the relationship between individual and group attitudes the cognitive bases of group identity and group identification and the link between emotions and individual attitudes This volume delves into the links between individual attitudes such as beliefs goals and intentions and how they are reflected in shared attitudes where common belief collective acceptance joint intentions and group preferences come into play It pursues answers to the connections between trust and beliefs goals and intentions and attempts to investigate questions such as does trust have an affective component and how it may relate to hope and fear The volume also scrutinizes game theory and questions whether it can satisfactorily explain and model social interaction and if there may be any concepts which are not addressed by the current theory Contributors are derived from disciplines including philosophy economics psychology logic and computer science Interdisciplinary in scope and comprehensive detail this volume integrates a variety of approaches philosophical psychological and artificial intelligence to strategic normative and emotional aspects of social interaction

**Social Ontology in the Making** Raimo Tuomela, Raul Hakli, Pekka Mäkelä, 2020-04-06 This collection does not only include articles by Raimo Tuomela and his co authors which have been decisive in social ontology An extensive introduction provides an account of the impact of the works the most important debates in the field and also addresses future issues Thus the book gives insights that are still viable and worthy of further scrutiny and development making it an inspiring source for those engaged in the debates of the field today

**Philosophical Lectures on Probability** Bruno de Finetti, 2008-05-20 Bruno de Finetti 1906 1985 is the founder of the subjective interpretation of probability together with the British philosopher Frank Plumpton Ramsey His related notion of exchangeability revolutionized the statistical methodology This book based on a course held in 1979 explains in a language accessible also to non mathematicians the fundamental tenets and implications of subjectivism according to which the probability of any well specified fact  $F$  refers to the degree of belief actually held by someone on the ground of her whole knowledge on the truth of the assertion that  $F$  obtains

*The Evolution of Social Institutions* Dmitri M. Bondarenko, Stephen A. Kowalewski, David B. Small, 2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World from prehistory to the present This approach is based on examining social evolution through the evolution of social institutions Evolution is defined as the process of structural change Within this framework the society or culture is seen as a system composed of a vast number of social institutions that are constantly interacting and changing As a result the structure of society as a whole is also evolving and changing The authors posit that the combination of evolving social institutions explains the non linear character of social evolution and that every society develops along its own pathway and pace Within this framework society should be seen as the result of the compound effect of the interactions of social institutions specific to it Further the transformation of social institutions and relations between

them is taking place not only within individual societies but also globally as institutions may be trans societal and even institutions that operate in one society can arise as a reaction to trans societal trends and demands The book argues that it may be more productive to look at institutions even within a given society as being parts of trans societal systems of institutions since despite their interconnectedness societies still have boundaries which their members usually know and respect Accordingly the book is a must read for researchers and scholars in various disciplines who are interested in a better understanding of the origins history successes and failures of social institutions

### **The Limits of Logical Empiricism**

Arthur Pap, 2006-03-02 This volume collects some of the most significant papers of Arthur Pap Pap's work played an important role in the development of the analytic tradition This goes beyond the merely historical fact of Pap's influential views of dispositional and modal concepts Pap's writings in philosophy of science modality and philosophy of mathematics provide insightful alternative perspectives on philosophical problems of current interest

### **Philosophy, Science and**

**Cinema** Wenceslao J. Gonzalez, 2025-03-20 Now that cinema is offline and online the capacity of cinema to relate to philosophy and science has increased In this regard this book seeks to deepen the relationship between philosophy science and cinema in terms of bilaterality This analysis leads to several successive levels of analysis First between philosophy and cinema where the philosophical perspective bifurcates in several directions depending on the philosophical branch used This affects in both directions from the philosophical orientation to the cinematographic activity and from cinema towards the philosophical line used Second the relations between science and cinema also go in both directions Thus they are modulated by the type of scientific research used and by the film genre employed Thus bilaterality is altogether a network of bidirectional relations modulated by various possibilities of analysis

### **Blameworthy Belief** Nikolaj Nottelmann, 2007-07-18

Believing the wrong thing may sometimes have drastic consequences The question as to when a person is not only ill guided but genuinely at fault for holding a particular belief is an important one It touches upon the roots of our understanding of such notions as criminal negligence and moral responsibility The answer to this question may influence the extent to which we are willing to submit each other to punishments ranging from mild resentment to harsh prison terms This book presents an extensive effort to shed light on the conditions under which we may appropriately deem someone blameworthy for holding a particular belief It regiments and unifies several debates within contemporary epistemology ethics and legal scholarship Finally the book brings a new philosophical look on issues like our power to control beliefs and the extent and nature of foresight

### **I Am You**

Daniel Kolak, 2007-11-03 Borders enclose and separate us We assign to them tremendous significance Along them we draw supposedly uncrossable boundaries within which we believe our individual identities begin and end erecting the metaphysical dividing walls that enclose each one of us into numerically identical numerically distinct entities persons Do the borders between us physical psychological neurological causal spatial temporal etc merit the metaphysical significance ordinarily accorded them The central thesis of I Am You is that our borders do not signify boundaries between

persons We are all the same person Variations on this heretical theme have been voiced periodically throughout the ages the Upanishads Averro s Giordano Bruno Josiah Royce Schr dinger Fred Hoyle Freeman Dyson In presenting his arguments the author relies on detailed analyses of recent formal work on personal identity especially that of Derek Parfit Sydney Shoemaker Robert Nozick David Wiggins Daniel C Dennett and Thomas Nagel while incorporating the views of Descartes Leibniz Wittgenstein Schopenhauer Kant Husserl and Brouwer His development of the implied moral theory is inspired by and draws on Rawls Sidgwick Kant and again Parfit The traditional commonsense view that we are each a separate person numerically identical to ourselves over time i e that personal identity is closed under known individuating and identifying borders what the author calls Closed Individualism is shown to be incoherent The demonstration that personal identity is not closed but open points collectively in one of two new directions either there are no continuously existing self identical persons over time in the sense ordinarily understood the sort of view developed by philosophers as diverse as Buddha Hume and most recently Derek Parfit what the author calls Empty Individualism or else you are everyone i e personal identity is not closed under known individuating and identifying borders what the author calls Open Individualism In making his case the author offers a new explanation both of consciousness and of self consciousness constructs a new theory of Self explains psychopathologies e g multiple personality disorder schizophrenia shows Open Individualism to be the best competing explanation of who we are provides the metaphysical foundations for global ethics The book is intended for philosophers and the philosophically inclined physicists mathematicians psychiatrists psychologists linguists computer scientists economists and communication theorists It is accessible to graduate students and advanced undergraduates **Dynamic Epistemic**

**Logic** Hans van Ditmarsch, Wiebe van der Hoek, Barteld Kooi, 2007-05-06 Dynamic Epistemic Logic is the logic of knowledge change This book provides various logics to support such formal specifications including proof systems Concrete examples and epistemic puzzles enliven the exposition The book also offers exercises with answers It is suitable for graduate courses in logic Many examples exercises and thorough completeness proofs and expressivity results are included A companion web page offers slides for lecturers and exams for further practice [Spinoza's Geometry of Power](#) Valtteri Viljanen, 2011-09-29

This work examines the unique way in which Benedict de Spinoza 1632-77 combines two significant philosophical principles that real existence requires causal power and that geometrical objects display exceptionally clearly how things have properties in virtue of their essences Valtteri Viljanen argues that underlying Spinoza s psychology and ethics is a compelling metaphysical theory according to which each and every genuine thing is an entity of power endowed with an internal structure akin to that of geometrical objects This allows Spinoza to offer a theory of existence and of action human and non human alike as dynamic striving that takes place with the same kind of necessity and intelligibility that pertain to geometry Viljanen s fresh and original study will interest a wide range of readers in Spinoza studies and early modern philosophy more generally **Theoretical Knowledge** Viacheslav Semenovich Stepin, 2005-07-12 He shows direct and inverse links

between foundations of science and new theories and empirical facts evolved from those how among many potentially possible histories of science a culture selects just those directions which become a real history of science The author analyses mechanisms of the generation of scientific theories and shows that those are changed in the process of historical development of science He displays three historical types of scientific rationality classical non classical and post non classical which appears in modern science and shows features of their coexistence and interplay It is shown that along with the emerging of post non classical rationality science increases the sphere of its worldview applications Science begins to correlate not only with the basic values of technogenic civilization but also with some values and patterns of traditional cultures

Visualization, Explanation and Reasoning Styles in Mathematics Paolo Mancosu, Klaus Froyen Jørgensen, S.A. Pedersen, 2005-04-20 This book contains groundbreaking contributions to the philosophical analysis of mathematical practice Several philosophers of mathematics have recently called for an approach to philosophy of mathematics that pays more attention to mathematical practice Questions concerning concept formation understanding heuristics changes in style of reasoning the role of analogies and diagrams etc have become the subject of intense interest The historians and philosophers in this book agree that there is more to understanding mathematics than a study of its logical structure How are mathematical objects and concepts generated How does the process tie up with justification What role do visual images and diagrams play in mathematical activity What are the different epistemic virtues explanatoriness understanding visualizability etc which are pursued and cherished by mathematicians in their work The reader will find here systematic philosophical analyses as well as a wealth of philosophically informed case studies ranging from Babylonian Greek and Chinese mathematics to nineteenth century real and complex analysis

**Scientific Progress** Craig Dilworth, 2007-09-18 Kuhn and Feyerabend formulated the problem Dilworth provides the solution In this highly original and insightful book Craig Dilworth answers all the questions raised by the incommensurability thesis Logical empiricism cannot account for theory conflict Popperianism cannot account for how one theory is a progression beyond another Dilworth's Perspectivist conception of science does both While remaining within the bounds of classical philosophy of science Dilworth does away with the logicism of his competitors On the Perspectivist view theory conflict is not contradiction and theory superiority does not consist in deductive subsumption or set theoretic inclusion Here the relation between theories is analogous to the application of individual concepts and the question of theory superiority becomes one of relative applicability In this way Dilworth succeeds in providing a conception of science in which scientific progress is based on both rational and empirical considerations

*Attitudes and Changing Contexts* Robert van Rooij, 2006-03-30 In this book the author defends a unified externalists account of propositional attitudes and reference and formalizes this view within possible world semantics He establishes a link between philosophical analyses of intentionality and reference and formal semantic theories of discourse representation and context change Stalnakerian diagonalization plays an important role here Anaphora are treated as referential

expressions while presupposition is seen as a propositional attitude The relation between belief change and the semantic analyses of conditional sentences and evidential knowledge and deontic desire propositional attitudes is discussed extensively

Optic Flow and Beyond L.M. Vaina, Scott A. Beardsley, Simon K. Rushton, 2004-04-30 Optic flow provides all the information necessary to guide a walking human or a mobile robot to its target Over the past 50 years a body of research on optic flow spanning the disciplines of neurophysiology psychophysics experimental psychology brain imaging and computational modelling has accumulated Today when we survey the field we find independent lines of research have now converged and many arguments have been resolved simultaneously the underpinning assumptions of flow theory are being questioned and alternative accounts of the visual guidance of locomotion proposed At this critical juncture this volume offers a timely review of what has been learnt and pointers to where the field is going
