Dispelling Wetiko Paul Levy, 2013-01-15 The mind virus behind human self destruction has a name wetiko See it clearly and it starts to lose power You see it everywhere smart people making destructive choices Companies poisoning their own customers Nations pouring trillions into war while their people suffer Social media built to connect us driving us apart We re the one species that knowingly degrades its own habitat at scale Why do we keep acting against our own survival From Indigenous North American traditions comes the term wetiko a life eating compulsion that turns us against one another and the living world Whether you approach it as metaphor psychology or spirituality the effects are real and they propagate through what we don t see In Dispelling Wetiko Paul Levy brings this insight into dialogue with Jungian psychology framing wetiko as a mind parasite that exploits our blind spots Drawing on teachings shared in public sources depth psychology and his own harrowing encounters Levy describes wetiko as ME disease Malignant Egophrenia a pathological self centering that mistakes the ego for the whole Like a vampire that can t see its reflection it hides in the very way we perceive reality The crucial insight the moment we recognize wetiko it begins to lose power The cure isn t waging war on evil or waiting for others to wake up it starts by noticing how our attention and reactions feed the very patterns we oppose and then withdrawing that food Dispelling Wetiko offers a clear diagnosis and a practical path back to sanity personally and collectively

Cope,2018-04-17 The current neuroscientific research in the field of emotion studies highlights a paradigm of scientific research that must be categorized as functional science As functional science the neuroscientific theory of the neuron doctrine combined with a Jungian theory of the complex doctrine hold significant potential for a natural human science and a psychological study of affectivity Though researchers utilize psychological constructs similar to those proposed by Carl Jung there appears to be a fear of Jung that is a professional fear of invoking Jung's name or his psychological research One familiar with Jung's works notice similar terminology ideas and even conclusions The marginalization and neglect of Jung's psychological insights from a serious empirical scientific approach to psychology is due to many factors Jung did not reduce psychological experience to the body or brain a reductive science does not consider seriously the reality of the psyche This work is an initial contribution to a psychological and neurological study of personal emotional experience

**Unedited** Kevin R. Nelson,2021-10-09 Our species has coexisted in the world in a healthy and balanced way for 97% of its existence It was only after our ancestors emerged from life in nature as hunter gatherers that this all began to change By the beginning of civilization some 6 000 years ago these changes rigidified and became destructive on a large scale They have accumulated to such an extent that our species now faces extinction or a dismal future of ever worsening ecocide Meaninglessness and confusion have become rampant in our postmodern era The human psyche has become utterly fragmented and rendered a stranger to reality other people and itself As dispiriting as this all seems the path forward has always been available to us if we can overcome the ignorance that prevents us from taking it We must reject the values of civilization and return to the naturalistic perspective of our ancestors where our values thinking feeling and actions are once again based on how nature and reality truly function While this approach should be evident we have until now been too terrified bewildered or arrogant to adopt it To help us succeed Reality Unedited provides a simple model of reality that serves as a foundation for establishing truth claims in the public sphere Then we can finally take the actions necessary so our species and all life on the planet cannot only survive but thrive
