Services Research Branch,1979 **Hypocrisy** Vincent Shing Cheng,2019-10-25 Although the official

propaganda surrounding the drug detainees in China is that of helping educating and saving them from their drug habits and the drug dealers who lure them into drug abuse it is clear according to Vincent Shing Cheng that those who have gone through the rehabilitation system lost their trust in the Communist Party s promise of help and consider it a failure Based on first hand information and established ideas in prison research Hypocrisy gives an ethnographic account of reality and experiences of drug detainees in China and provides a glimpse into a population that is very hard to reach and study Cheng argues that there is a discrepancy between the propaganda of helping and saving drug users in detention or rehabilitation centres and the reality of humiliating them and making them prime targets of control Such a discrepancy is possibly threatening rather than enhancing the party state s legitimacy He concludes the book by demonstrating how the gulf between rhetoric and reality can illuminate many other systems even in much less extreme societies than China This book is highly original meticulously researched and insightful The study comes to very informative conclusions that contrast empirical data with the way drug rehabilitation is displayed in the media and government propaganda It is a must read for scholars in prison studies but should also be recommended to criminologists political scientists and lawyers Saskia Hufnagel Queen Mary University of London The book is an excellent account of the state s handling of drug abuse in China and convincingly argues that the institutions official purpose of helping the offenders is poorly served and largely hypocritical A
