Reality Of Linguistic Rules:

The Reality of Linguistic Rules Susan D. Lima, Roberta Corrigan, Gregory K. Iverson, 1994-11-24 This volume presents a selection of the best papers from the 21st Annual University of Wisconsin Milwaukee Linguistics Symposium Researchers from linguistics psychology computer science and philosophy using many different methods and focusing on many different facts of language addressed the question of the existence of linguistic rules Are such rules best seen as convenient tools for the description of languages or are rules actually invoked by individual language users Perhaps the most serious challenge to date to the linguistic rule is the development of connectionist architecture Indeed these systems must be viewed as a serious challenge to the foundations of all of contemporary linguistics Four broad themes emerged from the Milwaukee conference corresponding to the four parts of the volume Part I centers on arguments for the existence of symbolic rules in linguistic competence and performance Part II contains arguments against symbolic rules presenting connectionist models and other alternatives to the symbolic paradigm Parts III and IV take up two issues that are central to a number of language researchers Language acquisition and learnability and modularity These issues are addressed from within both rule based and non rule based perspectives Contributors Farrell Ackerman Michael Barlow Catherine Best David Corina Roberta Corrigan Kim Daugherty Bruce Derwing Jeff Elman Alice Faber John Goldsmith Helen Goodluck Neil Jacobs Richard Janda Brian Joseph Michael Kac Alan Kawamoto Suzanne Kemmer Susan Lima Brian MacWhinney Steven Pinker Alan Prince Gerald Sanders Hinrich Schutze Mark Seidenberg Royal Skousen Nicholas Sobin Joseph Stemberger Gregory Stone Ann Thyme Robert Van Valin **Ignorance of Language** Michael Devitt, 2006-04-27 What is linguistics about What role should linguistic intuitions play in constructing grammars What is innate about language Arguing that linguistics is about linguistic reality and is not part of psychology this book offers answers to these questions It is intended for those working on language and the mind **Quine and Davidson on Language, Thought and Reality** Hans-Johann Glock, 2003-02-27 Quine and Davidson are among the leading thinkers of the twentieth century Their influence on contemporary philosophy is second to none and their impact is also strongly felt in disciplines such as linguistics and psychology This book is devoted to both of them but also questions some of their basic assumptions Hans Johann Glock critically scrutinizes their ideas on ontology truth necessity meaning and interpretation thought and language and shows that their attempts to accommodate meaning and thought within a naturalistic framework either by impugning them as unclear or by extracting them from physical facts are ultimately unsuccessful His discussion includes interesting comparisons of Quine and Davidson with other philosophers particularly Wittgenstein and also offers detailed accounts of central issues in contemporary analytic philosophy such as the nature of truth and of meaning and interpretation and the relation between thought and language *The Doctrine of Atonement* Jack D. Kilcrease, 2018-03-22 Post Enlightenment theology has frequently rejected the historic Christian doctrine of substitutionary atonement For theologians standing in the tradition of the Lutheran Confessions rejection of

substitutionary atonement is particularly problematic because it endangers the unconditional nature of the justification through faith. If one rejects vicarious satisfaction then the only alternative is to make redemption dependent on what sinners do for themselves. In this study Jack Kilcrease argues for substitutionary atonement within the perspective of what he calls the Confessional Lutheran Paradigm. The author also critiques a wide variety of modern Lutheran theologians' understandings of atonement: Werner Elert, Gustaf Aul, n Gustaf Wingren, Robert Jenson, Eberhard J ngel, Wolfhart Pannenberg and Gerhard Forde. As Kilcrease demonstrates, although these authors often give many fine theological insights, their distortion or misrepresentation of the doctrine of atonement carries over to a problematic understanding of law, gospel and justification through faith.

Menkiti on Community and Becoming a Person Edwin Etieyibo, Polycarp Ikuenobe, 2020-07-24. Ifeanyi Menkiti's articulation of an African conception of personhood, especially in *Person and Community in African Traditional Thought*, has become very influential in African philosophy. *Menkiti on Community and Becoming a Person* contributes to the debate in African philosophy on personhood by engaging with various aspects of Menkiti's account of person and community. The contributors examine this account in relation to themes such as individualism, communalism, rights, individual liberty, moral agency, communal ethics, education, state and nation building, elderhood and ancestorhood. Through these themes, this book, edited by Edwin Etieyibo and Polycarp Ikuenobe, shows that Menkiti's account of personhood in the context of community is both fundamental and foundational to epistemological, metaphysical, logical, ethical, legal, social and political issues in African thought systems.

Ethical and Religious Thought in Analytic Philosophy of Language Quentin Smith, University Distinguished Faculty Scholar and Professor of Philosophy, 1997-01-01. This is a critical history of analytic philosophy from its inception in the late 19th century to the present day. The book focuses on the connections between the four leading movements in the field: logical realism, logical positivism, ordinary language analysis and linguistic essentialism.

Language, Mind and Computation P. Mondal, 2014-11-12. This book explores how and in what ways the relationship between language, mind and computation can be conceived of, given that a number of foundational assumptions about this relationship remain unacknowledged in mainstream linguistic theory yet continue to be the basis of theoretical developments and empirical advances.

Normativity, Meaning and Philosophy: Essays on Wittgenstein

Hans-Johann Glock, 2024-04-09 This is a collection of essays on Wittgenstein and Wittgensteinian themes that appeared between 1996 and 2019 It is divided into three parts with a common trajectory laid out in a substantial introduction The first part links meaning necessity and normativity It defends and modifies Wittgenstein's claim that the idea of a grammatical rule holds the key to understanding linguistic meaning and its connection to necessary truth The second part elucidates the connections between meaning concepts and thought in Wittgenstein and beyond It shows how he laid the grounds for a sound understanding of four contested issues radical interpretation concepts nonsense and animal minds The third part provides a qualified defence of Wittgenstein's controversial idea that philosophical problems are conceptual and thereby rooted in confusions concerning the meanings of and semantic relations between linguistic expressions Against irrationalist interpretations it demonstrates that Wittgenstein's method is argumentative rather than therapeutic The collection as a whole makes a powerful case for an analytic perspective on Wittgenstein The essays bring out the abiding relevance of Wittgenstein's reflections to contemporary debates on central topics such as the role of normativity the foundations of linguistic meaning the nature of concepts the possibility of animal thought and the proper methods of philosophy
