Moving Pictures, Still Lives James Tweedie, 2018 Moving Pictures Still Lives revisits the cinematic and intellectual atmosphere of the late twentieth century Against the backdrop of the historical fever of the 1980s and 1990s the rise of the heritage industry a global museum building boom and a cinematic fascination with costume dramas and literary adaptations it explores the work of artists and philosophers who complicated the usual association between tradition and the past or modernity and the future Author James Tweedie retraces the archaeomodern turn in films and theory that framed the past as a repository of abandoned but potentially transformative experiments He examines late twentieth century filmmakers who were inspired by old media especially painting and often viewed those art forms as portals to the modern past In detailed discussions of Alain Cavalier Terence Davies Jean Luc Godard Peter Greenaway Derek Jarman Agn s Varda and other key directors the book concentrates on films that fill the screen with a succession of tableaux vivants still lifes illuminated manuscripts and landscapes It also considers three key figures Walter Benjamin Gilles Deleuze and Serge Daney who grappled with the late twentieth century s characteristic concerns including history memory and belatedness It reframes their theoretical work on film as a mourning play for past revolutions and a means of reviving the possibilities of the modern age and its paradigmatic medium cinema during periods of political and cultural retrenchment Looking at cinema and the century in the rear view mirror the book highlights the unrealized potential visible in the history of film as well as the cinematic phantoms that remain in the digital age

Popular Music and the Moving Image in Eastern

Europe Ewa Mazierska,Zsolt Gyori,2018-12-13 Popular Music and the Moving Image in Eastern Europe is the first collection to discuss the ways in which popular music has been used cinematically from musicals to music videos to documentary film in Eastern Europe from 1945 to the present day It argues that during the period of state socialism moving image was an important tool of promoting music in the respective countries and creating popular cinema Yet despite this importance filmmakers who specialized in musicals lacked the social prestige of leading auteurs and received little critical attention The resulting scholarly prejudice towards pop culture created a severe shortage of critical studies of the genre With the fall of state socialism and with it the need for economically viable film and media industries brought about an unprecedented upsurge of films utilizing popular music and a greater recognition of popular cinema as a legitimate object of study Popular Music and the Moving Image in Eastern Europe fills the gap and demonstrates why the popular music cinema interface needs to be theorized with respect to the political ideological and social forces invested in popular culture
