*Emotion, Social Theory, and Social Structure* J. M. Barbalet, 2001-09-06 Emotion Social Theory and Social Structure takes sociology in a new direction It examines key aspects of social structure by using a fresh understanding of emotions categories Through that synthesis emerge new perspectives on rationality class structure social action conformity basic rights and social change As well as giving an innovative view of social processes J M Barbalet's study also reveals unappreciated aspects of emotions by considering fear resentment vengefulness shame and confidence in the context of social structure While much has been written on the social consequences of excessive or pathological emotions this book demonstrates the centrality of emotions to routine operations of social interaction Dr Barbalet also re evaluates the

nature of social theory for once the importance of emotions to social processes becomes clear the intellectual constitution of sociology and therefore its history must be rethought Rational Woman Raia Prokhovnik, 2012-11-12 To feminists and some postmodernists reason emotion and man woman represent two fundamental polarities fixed deep within Western philosophy and reflected in the structures of our languages and two sets of hierarchical power relations in patriarchal society Raia Prokhovnik challenges the tradition of dualism and argues that rational woman need no longer be a contradiction in terms Prokhovnik examines in turn the nature of dichotomy its problems and an alternative the reason emotion dichotomy dichotomies central to the man woman dualism such as sex gender and the heterosexualist norm **Reason and Emotion** John Macmurray, 1962 Emotion in Organizational Change Usman Talat, 2016-12-19 This book constructs a multi disciplinary interpretation of emotion specifically applied and discussed within Organizational Change environments Including a range of perspectives from Philosophy Evolutionary Sciences Psychology and Sociology Emotion in Organizational Change also provides a historical picture of our knowledge of emotion The author explores how this can contribute towards a novel understanding of a pervasive phenomenon in society and its organizations **Ethics, Emotion, Education, and Empowerment** Lisa Kretz, 2020-10-14 Universities teach courses in ethics but do they teach students how to be ethical in practice Lisa Kretz's Ethics Emotion Education and Empowerment explores the ways that philosophical ethics are currently taught and argues that dominant approaches fail to adequately support ethical action in part because emotions are all too often ignored or repressed in university classrooms In isolation abstract theoretical content fails to motivate The ability to reason through an ethical dilemma does not by itself of necessity impact ethical action Empowered action requires intentional emotional engagement Kretz argues that part of the reason affective pedagogy fails to get sufficient uptake is due to the operations of oppression There is a long history of the reason emotion dualism undermining recognition of the necessary and valuable epistemic roles emotions play in moral life and serving as a political tactic to undermine the experience of oppressed groups This impoverishes ethical pedagogy because it is to the detriment of their ability to teach ethics in a comprehensive way and strips the potential of supporting students to enact their own reflectively held ethical beliefs and values Using the example of the environmental crisis Kretz makes a case for supporting students as engaged activists aware of their capacity to ethically change the world **Emotion and Reasoning** Isabelle Blanchette, 2013-10-01 The interaction between emotion and cognition is a fundamental issue which has only recently been reintroduced as a legitimate object of study in experimental psychology This book examines the significant impact that affective processes have on reasoning and demonstrates how emotional reasoning cannot simply be equated with faulty reasoning Emotion and Reasoning presents contributions from leading researchers from a variety of disciplines including experimental cognitive psychology cognitive neuroscience clinical neuropsychology and experimental psychopathology The opening chapters consider how emotions affect reasoning processes in individuals living with psychopathology A second section focuses upon

experimental investigations of emotion and basic reasoning processes and a final section explores the physiological bases of emotion reasoning interaction Together the chapters in this volume provide a multidisciplinary overview of key topics on emotion and reasoning and a survey of recent research in this area Emotion and Reasoning will be of great interest to advanced students researchers and practitioners in the fields of cognitive psychology clinical psychology and affective neuroscience

**Black Natural Law** Vincent W. Lloyd, 2016 Black Natural Law offers a new way of understanding the African American political tradition Iconoclastically attacking left including James Baldwin and Audre Lorde right including Clarence Thomas and Ben Carson and center Barack Obama Vincent William Lloyd charges that many Black leaders today embrace secular white modes of political engagement abandoning the deep connections between religious philosophical and political ideas that once animated Black politics By telling the stories of Frederick Douglass Anna Julia Cooper W E B Du Bois and Martin Luther King Jr Lloyd shows how appeals to a higher law or God's law have long fueled Black political engagement Such appeals do not seek to implement divine directives on earth rather they pose a challenge to the wisdom of the world and they mobilize communities for collective action Black natural law is deeply democratic while charismatic leaders may provide the occasion for reflection and mobilization all are capable of discerning the higher law using our human capacities for reason and emotion At a time when continuing racial injustice poses a deep moral challenge the most powerful intellectual resources in the struggle for justice have been abandoned Black Natural Law recovers a rich tradition and it examines just how this tradition was forgotten A Black intellectual class emerged that was disconnected from social movement organizing and beholden to white interests Appeals to higher law became politically impotent overly rational or overly sentimental Recovering the Black natural law tradition provides a powerful resource for confronting police violence mass incarceration and today's gross racial inequities Black Natural Law will change the way we understand natural law a topic central to the Western ethical and political tradition While drawing particularly on African American resources Black Natural Law speaks

Philosophy of education as a discipline has undergone several turns: the once marginal perspectives of the various feminisms, critical Marxism, and poststructuralist, postmodernist, and cultural theory have gained ground alongside those of Anglo-analytic and pragmatic thought. Just as Western philosophers in general are coming to terms with the end of philosophy, pronouncement implicit in postmodernism, so too are philosophers of education faced with similar challenges. Contributors take up these challenges through a dialogical structure expressing differing positions without engaging in destructive critique.

**Diving into Harvard Education**, 2024-08-19 Just as Harvard University is a place where world class professors, innovative research, and a dynamic student community come together to advance education and foster change in the world, Harvard Graduate School of Education (HGSE) founded in 1920 grants students and visiting scholars who are determined to learn to change the world valuable opportunities to meet great professors and participate in shaping meaningful research. The book's twenty interviews are organized into five parts: Values and Goals, Development, Media, Student Life and Institutions, and Putting Learning into Practice. Engineering Education While our team of interviewees consists largely of HGSE professors and administrators, it also includes world renowned professors and deans from other Harvard schools as well as an outstanding representative of global engineering education transformation. Each chapter consists of an interviewee profile, editors' note, the interview dialogue itself, references, and notes so that our dear readers can experience the impact of the interviewees' ideas and reliably trace their sources. While each individual interview is an instructive snapshot of a specific area of educational research and practice, we hope that the collection as a whole will enlighten and inspire each of our readers to do their part to improve the world.
